Budget Summary

Spending cut by £1bn.

PUBLIC SPENDING programmes reduced by £1bn. last year and £1.5bn. in 1977-78. Cuts will hit food subsidies, roads, new housing, school building. Nationalised industries to reduce level of Government financing required by cutting spending and raising prices, notably a gas price increase in April. Details of cuts below.

BORROWING: Aim is to reduce public sector borrowing requirement (PSBR) by £2bn. to £8.7bn. in 1977-78 and by £3bn. to about same level in following year. Domestic credit expansion (DCE) expected to fall from £bn. this year to £7.7bn. in 1977-78 and to £6bn. in 1978-79. Growth in money supply (M3) for this year re-estimated at 9.13 per cent. Future targets to be set in terms of DCE, not M3.

IMF LOAN of \$3.9bn. expected to be agreed "in a matter of days after end of year," \$1.15bn. available immediately thereafter; over £1bn. more before end of 1977. In meantime, \$500m. swap facility offered by U.S., \$350m. standby credit by Germany.

BA SHARES: Government holdings of BP shares reduced from 68 per cent. to 51 per cent. of total. Sale will cut PSBR in 1977-78 by about £500m.

DRINK AND TOBACCO duties to rise 10 per cent. Increased tax charged on standard measures will be about: beer 1p; pint; spirits 31p a bottle; wine 5p; fortified wine 7p; filter cigarettes 4p for 20. Additional revenue £50m. this year, £280m. 1977-78. Effect on retail price index: "rather over 1 per cent."

INDUSTRY: Regional employment premium withdrawn to save £150m. in 1977-78, £170m. in 1978-79; more money for National Enterprise Board and Scottish and Welsh Development Agencies. New selective investment scheme with initial allocation of £100m. to be spent over period of years. Further money for sectoral schemes to cost £80m. in each of next two years.

UNEMPLOYMENT: Job creation programme and temporary employment subsidy, due to end shortly, to be extended to end of April when schemes to cut unemployment will be reviewed; £120m. more to be spent next year on cutting unemployment.

Income-tax cuts hinge on pay deal • Drink and tobacco up

IMF chief backs package

BY PETER RIDDELL, ECONOMICS CORRESPONDENT

PUBLIC SPENDING cuts of £1bn. in the next financial year and increases of one-tenth in duties on alcohol and tobacco from January 1 were announced by Mr. Denis Healey, Chancellor of the Exchequer, yesterday, in conjunction with the publication of the letter of application for the \$3.9bn. loan from the International Monetary Fund.

Mr. Healey was able to tell the Commons that Dr. Johannes Witteveen, managing director of the IMF, supported both the Government's economic strategy and its measures and was prepared to recommend acceptance of the British request for a loan.

The arrangements are expected to be completed "in a matter of days after the end of the year." The loan will be made available over two years with \$1.15bn. coming immediately and more than \$1bn. further before the end of 1977.

Mr. Healey was not, however, able to be very specific about the future of the sterling balances though he indicated that talks among central bank Governors and with the U.S. Government had "revealed a general desire... to achieve a satisfactory arrangement for the sterling balances, and I believe it will be possible to reach an agreement before long."

Mr. Healey later said at a Press conference that a "great deal of progress" had been made at the central bank governors' meeting last week-end. But

Healey speech Pages 8 and 9.

it is clear that the U.S. Government was not prepared to go any further on such talks until after agreement had been reached on the IMF loan.

The Chancellor's statement produced a favourable response last night both from Mr. William Simon, the outgoing U.S. Treasury Secretary, and from the EEC Commission in Brussels. A key test will, however, come in the foreign exchange market.

Mr. Healey said last night that the initial fall in sterling after the package reflected the extent to which the market had discounted the measures.

Standby

Further support is to be provided "In anticipation of further drawings under the agreement with the IMF which will take place later in the year" (1977), with the reserves being strengthened by \$500m. in the form of swaps from the U.S. Treasury and Federal Reserve Bank of New York and by a standby facility of \$350m. from the Bundesbank.

The aim of the measures is to hold the public sector borrowing requirement to £8.7bn. in 1977-78. This compares with the Treasury forecast of £10.2bn. before the package and the £9bn. projection made in July.

In addition to the proposed cut in public spending, this target is to be achieved by the sale during 1977-78 of part of the Government's stake in British

● Letter to IMF Page 9. ● Editorial comment Page 16. ● Special articles Pages 10, 16 and 27.

Petroleum to raise £500m., though the State holding will remain at 51 per cent.

A lower cost of debt interest is also assumed while the revenue from the increase in alcohol and tobacco duties will be used to finance higher spending on incentives for industrial investment and to reduce unemployment.

The measures are in addition to the £1bn. spending cut and £1bn. rise in National Insurance contributions in 1977-78 announced in July.

Mr. Healey, as expected, made no changes in direct taxation, apart from indicating his intention to improve the tax treatment of employees resident in the U.K. but working abroad on increasing exports.

However, the Chancellor again linked the prospect of an income tax cut in the spring Budget with the talks on the next stage of the pay policy.

He said that, provided a suitable agreement was reached on wages and that the public sector borrowing requirement would not be pushed above £8.7bn., he proposed to "use the available margin to reduce the present burden of income tax which I believe to be too heavy."

Mr. Healey indicated later that "significant" reductions in income tax could be made with the emphasis at the top and bottom ends of the scale. "But if there is a wages explosion, it would mean increased taxation."

Mr. Healey gave no indication as to where he expected this margin to come

from, so without any major alteration in the forecasts, there would have to be further fiscal changes.

He also said that he would be discussing with the TUC and other bodies the inter-relationships between changes in earnings, social security benefit, pension and rates of direct and indirect tax.

Mr. Healey who said that it "took some time to persuade the IMF that these were the right decisions," also outlined monetary targets which should allow a fall in interest rates. This decline might be "slow at first" with no substantial drop at any one time.

Monetary policy is in future to be monitored in terms of Domestic Credit Expansion rather than broadly defined money supply, M3, with a reiterated target of £9bn. for the year to mid-April 1977, and £7.7bn. in the following 12 months.

The latter application also makes it clear that if the methods of controlling the growth of bank credit produce a shift of the debt pattern, distorting the statistics, then the target for DCE will be adjusted accordingly.

Mr. Healey claimed that the measures would have a favourable effect on employment and that while unemployment is still likely to rise next year, the increase will be smaller than would have otherwise occurred. The package is expected to add less than 1 per cent. to the cost of living by the end of 1977.

Some Tory approval, but Labour MPs sceptical

BY RICHARD EVANS, LOBBY EDITOR

MR. DENIS HEALEY'S state coherent economic policy, All of it had been introduced on the available evidence, from the International Monetary Fund, but with deep and urgent need for a socialist government to be welcomed.

The Government's "belated conversion" to the importance of the money supply and to achieving reductions in public spending

is not shared by many Labour MPs who did not share the Chancellor's optimism that the package would bring the Commons to-day and the full

Parliamentary Labour Party will lead to economic solvency and a restoration of the Government's electoral fortunes.

There was no doubt to be a rough grilling over a package many MPs see as the end of some of Labour's most cherished aspirations.

A bigger worry for Mr. Callaghan and the Tribune Group meets in the Commons to-day and the full

Parliamentary Labour Party will lead to Labour backbenchers confirming to the Treasury that the reaction from the trade union movement to the proposed cuts in public spending will be far more difficult than the Tories' support served to confirm to Labour backbenchers the disastrous impact the package would have on the party's priorities.

Mr. Eric Heffer, MP for Walton, commented: "Many of us feel this is a very depressing day for the Labour movement. We called on Mr. Healey to consider what promises

A new procedure for monopolies

BY GEOFFREY OWEN

TO-DAY the Monopolies Commission report on "indirect electrostatic reprographic equipment"—in effect, on Rank Xerox—is expected to be published, more than three and a half years after the reference was put to the Commission by the Health Government. Is it really necessary to take so long? Two other references, one on architected' and other ways' scale factors and the other on bread and flour, are more than three years old, and the Commission is apparently still at work on them. For a company like Spillers, which is having to cope with the Monopolies Commission on petfoods as well as on bread and flour, the demands on management time are considerable. It should surely be possible to speed up the procedure.

Ministers' views

The delays are not just the fault of the Commission. There can be a lengthy period between submission of a report to Ministers and publication, while Government departments consider how they should respond to the Commission's findings. This can continue for several months if the recommendations affect several departments which have different views on the matter.

More important, there has been a tendency for companies themselves to be dilatory in providing answers to questions. Companies do not like having their affairs scrutinised by an outside body, especially if they have something to hide. Instead of looking into every nook and cranny of an industry, the Commission could focus attention on those aspects of its structure and behaviour which are relevant to the central question—which is whether a monopoly exists, and not the process as long as possible.

It was partly to give the Commission more authority in pressing for speedy replies that the Fair Trading Act of 1973 provided for a power to specify within which the Commission had to report. Since then it has been given anything from twelve to twenty-four months for monopoly references (merger references have a much shorter period), though in some cases it has been necessary to seek an extension, and copying materials, for instance, was referred in July 1974 originally with a twelve-month limit.

A body like the Monopolies Commission is never going to win popularity in a contest among businesses. It would not be doing its job if it did. It is criticised for being too slow, for being inconsistent for asking the wrong questions. The criticisms

are mild compared to those which are levelled at the Federal Trade Commission in the U.S. This body has been accused of trying to redefine monopoly without Congressional sanction and of indulging in fishing expeditions to extract a mass of information from companies without any clear notion of how the information will be used.

Nevertheless, there are ways of improving the operations of the Monopolies Commission. At present it has 24 members and only one, the chairman, Mr. J. Godfray Le Quesne QC, is full-time; the two deputy chairmen, Sir Max Brown, formerly Permanent Secretary at the Department of Trade, and Mr. E. L. Richards, a stockbroker, spend about two days a week at the Commission. The others spend only a few days a month there, working on the references to which they have been assigned: normally a group of about eight members, which must include either the chairman or a deputy chairman, will handle a monopoly reference.

There is a strong case for a nucleus of three or four full-time members (apart from the chairman) who would be fully committed to the Commission and provide a sense of stability, and one of whom would sit on each inquiry in addition to the chairman or deputy chairman. They would help to speed up the Commission's work and more importantly, could establish in advance, before the inquiry got under way, what the main lines of the investigation should be. Instead

of looking into every nook and cranny of an industry, the Commission could focus attention on those aspects of its structure and behaviour which are relevant to the central question—which is whether a monopoly exists, and not whether it operates against the public interest.

No theories

The businessmen, bankers and academics who serve as part-time members provide a useful source of knowledge and experience, but there are advantages in an "inner college" to provide a deeper and more continuous analysis of competition issues. It is true that, in contrast to the U.S., U.K. competition policy is not based on any theory about competition; every case is looked at on its merits, with no pre-conceptions. But inevitably some general views about competition emerge during the Commission's work, and these views would be more clearly and fully developed if there were a number of members thinking about the issues on a full-time basis.

Mr. J. R. Richardson and Mr. E. Tomlinson will retire as directors of RANKS HOVIS McDougall after the annual meeting on January 27. Mr. R. G. Rogerston, chairman and managing director of Coutts & Co., has been appointed a director. He also serves on the Bank's South-East Regional Board.

Mr. Richardson's executive re-

Doo'cot to win again

DOOCOT PARK who made up for two disappointing displays when winning at Nottingham last month, reappears at Uttoxeter this afternoon in the Second Division of the Sudbury Novices' Chase, and it will probably pay punters to back him for the follow-up.

In his race at Nottingham, a division of the Stour Novices' Chase, the Bury St. Edmunds five-year-old showed no signs of the erratic jumping which had marred his previous efforts over fences, and it became apparent some way from home that he would win, barring a major blunder or fall.

Ridden out with hand and heels, David Morley's charge was day's rivals, best of whom could not hard pressed to beat the well-beaten favourite. El

Meno, with the remainder well behind.

I feel confident that a reproduction of that running will see

SALEROOM

Mixed day for Old Masters

THE LONDON salerooms are slowing down towards the Christmas break, but Sotheby's managed a mass of relatively minor auctions yesterday. The most important of Old Master paintings, brought in £227,150.

Cortez, a Spanish buyer, paid top price of £8,500, well above estimate, for *Tabernacle For a Devotional Figure*, a late 15th-century triptych of the School of Cologne.

The Larger Gallery acquired *A Village Gathering* by Francisco de Mora for £5,000, about twice the forecast, while *Ships in a Breeze* by Willem van de Velde the Younger, sold for £4,600—below expectation.

Soldiers *Biznacking* in a cat's-eye and diamond circular church, by Philip Wouwermans, fetched £4,500, also less than forecast, while a Holy Family from the same price.

A sale of later paintings fetched £27,079. Dutch town cluster ring made £7,000. The silver added £31,125, with a set by Pieter Christian Dommeren sold for £2,500, and a pair of English silver-gilt bowls by Abraham Hulk made £1,700.

A minor Sotheby's auction of English and Japanese works of art totalled £35,167. Top price was £500 for a gold-lacquer inro.

Christie's held three rather routine sales. As usual, jewels attracted the top prices, with property of Lord Belvoir, for

total of £101,531. A chrysobery £29,156. All 360 lots sold.

APPOINTMENTS

NatWest executive changes

Mr. A. G. Touche, chairman of Touche, Remnant and Co., has been appointed a deputy-chairman of NATIONAL WESTMINSTER BANK to succeed Mr. J. F. Hay, who retired from that position on December 31 on reaching retirement age. Mr. B. N. Williams will remain a director of the Bank.

Mr. Touche has been a director since joining the Board of Westminster Bank in 1967 and is chairman of its outer London Regional Board. Mr. D. B. Money-Coutts, chairman and managing director of Coutts & Co., has been appointed a director. He also serves on the Bank's South-East Regional Board.

* * *

Lord Aldington has become a non-executive director of WESTLAND AIRCRAFT. Dr. G. S. Hislop has retired from the Board, but will continue in an advisory capacity.

* * *

EXCESS INSURANCE GROUP states that Mr. I. R. Blamey of C. T. Bowring (Insurance) Holdings and Mr. D. V. Palmer of Willis Faber and Dumas have resigned from the Board due to obligations imposed on them as directors of insurance broking companies by the Insurance Com-

sibilities for financial matters within the group. *

Viscount Weir, chairman and chief executive of the Weir Group, will resign from that part-time Board member of the BRITISH STEEL CORPORATION at the end of this month due to additional business responsibilities.

* * *

Mr. A. G. B. Young, of Arthuroth, Netham and Co., has been elected chairman of the INDONESIA ASSOCIATION for the ensuing year. Mr. R. McC. Cowan, of Paterson Ewart Group, becomes vice-chairman pro tem.

* * *

Mr. A. E. Gibbons has been appointed deputy chairman of EVER READY COMPANY (HOLDINGS). *

* * *

Mr. A. G. B. Young, of Arthuroth, Netham and Co., has been elected chairman of the INDONESIA ASSOCIATION for the ensuing year. Mr. R. McC. Cowan, of Paterson Ewart Group, becomes vice-chairman pro tem.

New York theatre

An empty Christmas stocking

by GEORGE OPPENHEIMER

With the approach of the holiday season, you'd think the satirical season would lighten up and provide at least better entertainment. Not a bit of it in the high hopes of Tennessee Williams' *The Eccentricities of a Nightingale*. The eccentricities have been shed, at least for me. As he has done so often, Williams has rewritten one of his plays, this time *Summer and Smoke*, and in the process munched it. The original play was not a success on Broadway when it was done in 1948. When it was revived off-Broadway four years later with Geraldine Page in the leading role, it made a star of Miss Page, a success of actress Jose Quintero and is generally credited with having started the off-Broadway movement.

Now Williams has revised it to ill effect. Where before Alma Lomax was a neurotic obtuse virgin, afraid to look at a medical chart of the male body, she is now the seducer of actor John, the man she loves. But the actress has been moved to the former small Don Juan move, a namby-pamby young man dominated by his incestuously inclined mother.

All the melodrama has been closed, the killing of the doctor's father by the parent of the doctor's mistress. In its place, inaction. Alma's efforts to bed actor John, her final success after her deterioration after she leaves him. Happily, Betsy Palmer is so good as the frenetic ma that she is able to make something for Williams' lapse. David Selby does what he can to bolster the character of actor John but it is an ungrateful task, not helped by Edwin Ervin's direction and an outcome set made to serve for everything from a garden to a tel room.

Herzl by Dore Schary, a one-time top executive at Metro Goldwyn Mayer and a playwright in one success (*Sunrise at Mysipolebo*, the biographical drama of Franklin D. Roosevelt) and Amos Elon. The latter is a author of a biography of Theodore Herzl, the founder of Israel and the father of Zionism, the play is based on Elon's work.

It is less a play than a tract, debate and a lecture. What drama there was in Herzl's quest for money and encouragement for his efforts to establish a Jewish state has been almost completely lost. The characters, including the Pope, the Kaiser and the Sultan of Turkey among other actual persons, are either

on your side and ours.

Elizabeth Hall

George Malcolm

by DAVID MURRAY

Mr. Malcolm proceeded through Bach's "Goldberg" preludes and variations on Tuesday with something less than his usual aplomb. By now he has surely ayed them more often than in the "Goldberg" set but it was undersold — Malcolm jogged through the 13th variation, and he dealt with the 25th, the famous — Chopinesque one, brazenly and curiously.

Except for the registration, in which Malcolm's risky taste for mixing his harpsichord-colours was sweepingly indulged. The weight of pathos which the variation bears went for little as each new melody limb arrived in next game. It is rather late in the day to rail at Malcolm's penchant for switching his stops to arbitrary junctures, but these variations really do not take well to internal colour-contrasts. It is one thing to prettify the Courante with an unexpected tint, a mere matter of taste; but it's quite another to assign such different sound qualities to two keyboards that when, as often in the brilliant variations, the two hands successively share a single passage it is split into an unequal duet. The perspective of the 25th variation, a confident Sarabande with sprightly running decoration was quite inverted. One wasn't bored; but the resolutely ponderous bass line made it a weightier close for without artificial aids.

A Theatre

Vinegar Tom

by MICHAEL COVENEY

With this inviolable venue in itself, spells out the fact that piracy date now set for Christ we all need to find something as Eve and a lively campaign to burn if not a witch, then a way to try and save it, perhaps a woman, a black or a Jew. Such sentiment, although in £24,000, closing the arguably admirable, is hardly sure to have explained the reappearing bass line in the 16th, presumably intended to make it a weightier close for without artificial aids.

The witch-hunter's assistant, a thirty girl with a speech about keeping herself healthy while keeping the country healthy, is an interesting character idea that remains just that. But it is the plug's earless scenes which stick in the memory: an old woman bogging for yeast while the farmer's wife chucks the butter; a white-faced girl wrapped up in a suit-jacket with some medical stuff about hysteria, coming on with the monthly period. Good work by Mary McCusker and Helen Glavin. Pam Brighton directs the strongest parts of the play with generous sensitivity.

Another 'Mousetrap'

But the play falters in its lack of dramatic analogy, let alone the power of the story as it stands. The music (lyrics by Marshall, music by Helen Glavin), admittedly, entertaining

Felix Rice and Eric Roberts in 'I Gotta Shoe,' which opened last night at the Criterion Theatre

London Opera Centre, Commercial Road

Il fratello innamorato

by ELIZABETH FORBES

Last term the London Opera Centre staged Pergolesi's comic opera, *Il fratello innamorato*, as a workshop production in the rehearsal room with a conventional proscenium set. The piece is now presented on the floor of the Centre's huge auditorium in the round; it works very well. The Neopolitan comedy concerns two families, whose houses stand in opposite corners of the acting area (which is square, rather than round), while the Trinity College orchestra from the Royal College of Music occupies the round. The score, a succession of charming, melodic arias interspersed with a couple of duets and a delightful trio (for Ascanio, Nena and Nina) is light-textured, inventive and apt.

Claire Powell makes a spiky but attractive figure, with a voice as keen as her back to some part of the audience. James Robertson conducts, assisted by Derek Clark, and despite the difficulties, keeps good ensemble. The score, a succession of charming, melodic arias interspersed with a couple of duets and a delightful trio (for Ascanio, Nena and Nina) is light-textured, inventive and apt.

I was an avid Pinter enthusiast up to but not through Old Times. With *No Man's Land*, which I first saw in London, he lost me, at least temporarily. Much as I admired the acting and the dialogue, it bewildered me to the extent that I was no longer willing to yield to its author's self-indulgent cryptograms.

It is all very well to make an audience do some thinking, but it seems to me that the playwright has a duty to do the thinking first. I strongly suspect that, with all his theatricality and gift of poetic prose, Pinter's mind has gone to his head. With *No Man's Land*, he gave me pause.

As for *Comedians*, I am of two minds, neither of them very kind. Over here it has been directed by Mike Nichols and he has done so in style. I found its first act hard going with its slow start, its English local references and some of its tired jokes. With the second and third stanzas it picked up considerably, thanks also to a fine cast with Milo O'Shea as the teacher and a sextet of incipient comedies, especially the aforementioned Pryce, who has made a great hit over here.

The Abbey Theatre came from Dublin to the Brooklyn Academy of Music for a limited stay with O'Casey's *The Plough and the Stars*. Much as I admire the play, the production belied the Abbey's glowing reputation.

I had seen O'Casey's comedy-drama first back in 1938 on a previous Abbey visit. This time it seemed a different matter completely. So thick were the brogues that the singing dialogue was almost completely incomprehensible and some of the performances, with the notable exceptions of those of Cyril Cusack as Fluther Good and Siobhan McKenna as Bessie Burgess, were below the high standard one expects from this group.

And so may I wish you a merrier Christmas and a lot better theatrical New Year both on your side and ours.

Record review

Keyboard year

by DOMINIC GILL

Horowitz's two performances were recorded during his 15-concert tour of the U.S. and Canada during this year and last. They are the most recent examples we can hear in this country of his playing, and neither betrays the slightest diminution of his extraordinary powers. On the contrary: it would appear that over the years they have grown more acute, still more sharply defined. Horowitz is now 72; yet at no time past has his playing sounded more closely focused, more powerfully contained, more electrifying than it does on this disc.

It is not clear from the record-sleeve whether each account is a single take, or whether we hear edited versions made up from various performances during the tour. But there are no audible splices; the sound-quality, like the remarkable flood of piano issues and reissues, many of them very fine, some of them truly memorable, which has continued right up to the year's end.

These three issues are exhilaratingly typical—each one a new arrival or revival to be recommended, without reservation. And instant dynamic command:

Aldwyck

Wild Oats

by B. A. YOUNG

Wild Oats is a safe bet for Christmas, or indeed for any other time. It is a farcical melo-drama by John O'Keefe, the blind Irish playwright (1747-1833), and the Royal Shakespeare Company presents its first production of the century, though it was popular enough in the hundred years after its original appearance in 1781.

Its plot is a fairly conventional one leaning heavily on exchange of identities. There is a scene in what is the second act in Clifford Babbington's production in which all three men on the stage using false personages; young Harry Thunder, the runaway cadet, is pretending to be an actor called Dick Baskin, his friend Rover is pretending to be Harry's father, Sir George Thunder, is being treated by Rover as an actor called Abram Wang, which is what Harry said he was in search of a quick profit.

Why these impersonations should have been adopted, and how they are resolved, everyone plotting ultimately into his proper status as inevitably as in the last scene of a Gilbert and Sullivan opera. I will not tell the plots of farces should never be recounted.

Rover is a comic character of pitch class. He yearns to be an actor, and is apt to fall at any moment into Shakespearean quotations (not quotation, appropriate or not) streams of quotations (not quotation, appropriate or not).

Tuesday's performance began, I thought, a trace sluggish, though I suspect the fault lay with the audience rather than with Mr. Williams' adept direction. As soon as they knew what they were in for, the plots of farces should never be recounted.

The Barrow Poets will return for a Christmas Show programme on December 29, which will include a late tribute to the U.S. bicentenary in the form of four poems by the Red Indian poet Black Elk, to be read by Jim Parker. Appearing on the programme will be speakers Heather Hall on December 27 and 31 at 2.45 p.m. *The Sound of Music*, one of the biggest box-office hits in film history, starring Julie Andrews and Christopher Plummer, will be shown on December 27 and 31 and January 3 at 6.45 p.m. The third film will be *Tales of Beatrix Potter*, featuring Frederick Ashton, Alexander Grant and members of the Royal Ballet, to be screened on January 2 and 9 at 6.45 p.m.

Ludovic Kennedy to be Lyceum chairman. Ludovic Kennedy, the writer and broadcaster, is to be chairman of the Royal Lyceum Theatre Company when the group becomes autonomous with its own board, in April 1977. The appointment was made as a result of a joint approach by the Scottish Arts Council and the Lothian Regional Council.

Another 'Mousetrap' milestone Agatha Christie's *The Mousetrap*, now in its 25th year, will set up a new world record when it clocks up 10,000 performances on Friday, December 17.

EUROPEAN NEWS

Spanish PM must bring parties into mainstream

King Juan Carlos votes in the referendum, watched by his wife, Queen Sophia, at El Pardo near the royal palace outside Madrid.

BY ROGER MATTHEWS

MILLIONS of Spaniards went to the polls to-day to cast their votes in a national referendum which, according to the Government, will open the door to democracy after 38 years of authoritarian rule.

Voters are being asked one simple question: "Do you approve the political reform proposals?" A hugely expensive publicity campaign was launched by the Government three weeks ago, advising voters to inform themselves well, and then to exercise their democratic right by voting Yes. A pop song entitled Speak, People, Speak was recorded by a group called Red Wind and several light aircraft swooped over Madrid throwing thousands of pamphlets urging people to the polls.

What Spaniards are being asked to vote for is a proposal which would set up a two-chamber Parliament to replace the present single-chamber Cortes that was almost entirely appointed under the Franco regime. The Senate would mainly be chosen by the provinces, each selecting four members, but up to one-fifth of the house would be directly appointed by the King.

Juan Carlos is understood to have promised his more successful ministers, especially Prime Minister Adolfo Suárez that they would be guaranteed seats, which would remove the need for them to resign and stand for election.

It is rather more difficult for

Spaniards to know what sort of parties to compete if he is to ensure that to-day's voting has any long-term relevance.

The Government was this morning supremely confident of winning a substantial majority for its proposals, but would like a Yes vote significantly below the last two referenda, of 1967 and 1966, in both of which General Franco had surprisingly scored more than 90 per cent.

Voting up until late afternoon was very slow in some areas, especially in the industrial zones of the Basque country, in north-

MADRID, Dec. 15.
napped from his office last week end. A brick hurled through the office window of a newspaper here this afternoon had wrapped around it a note stating that the hostage would die within 48 hours if 15 named prisoners, all convicted or awaiting trial for terrorist offences, were not released.

There is nothing yet to confirm the authenticity of the message, but the Government is rightly worried about a sharp escalation of violence if Senator Oriol is not released unharmed. Parts of the extreme Right which has been campaigning under the slogan "Franco would have voted no" is obviously restless and will do its utmost to realise its own forecast that liberalisation will only lead to civil and economic chaos.

Sr. Suárez said on television last night that violence was not and would not be the language of the Spanish people. But with over 40 political deaths in the year since General Franco died, who vote "yes" to-day will also be hoping that the law is now going to be applied more vigorously and impartially.

At the same time the Prime Minister has to begin convincing the many people who refuse to go to the polls to-day that his is a genuine democratic effort and not just a manoeuvre that will fill the new parliament with the same faces that have dominated the political scene over the past decades.

Most left-wing parties have told their supporters to boycott the referendum because democratic conditions do not exist.

Spaniards voting for the electoral law, which has still to be drawn up and which will fix such vital elements as constituency boundaries, availability of television and radio time, and many other important points. Equally, nothing is yet set down about how the Government should be chosen and the precise relationship between cabinet and parliament.

That the referendum is only a first step towards a more democratic system can be seen by the fact that nearly all left-wing and centre parties remain illegal. Somehow in the weeks ahead the Premier has to convince these

southern Catalonia, and in southern Madrid, where abstentions will be highest.

The two houses were defeated in the Basque region this morning and riot police charged left-wingers campaigning for abstentions in the city of Pamplona. Most left-wing parties, and especially those that are banned from participating in next year's general elections, have told their supporters to boycott the referendum because democratic conditions do not exist.

Meanwhile, casting a further cloud over the novelty of voting,

is the threat to the life of Senator Antonio Oriol, president of the Council of State who was kid-

Schmidt wins re-election on first ballot

BONN, Dec. 15.
BY ADRIAN DICKS

HERM HELMUT SCHMIDT was re-elected as West German Chancellor to-day on a first ballot by the newly-installed eighth Bundestag. Strenuous efforts by the whips of his Social Democratic Party, and of the Free Democrats, their coalition partners, succeeded in giving him 260 votes, one more than a bare majority.

Although the coalition parties combined have 254 deputies in the new Parliament, several cases of illness and increasing disaffection over the Government's handling of the pensions issue last week had led to uncertainty up to the moment the vote was announced about Herr Schmidt's chances of success on first ballot.

By avoiding the embarrassment of a second or even a third ballot, the Chancellor has gained a minor but useful demonstration of support.

But in other respects the morale of the coalition is more than a little subdued as it enters a new four-year term, and it will be important for Herr Schmidt to seek to rally deputies when he formally presents the Government's programme to Parliament to-morrow.

There was one last-minute change. Herr Schmidt has evidently not impressed by criticism that many of his ministers are "greenies," who may be competitive departmental administrators, in several cases lack political and popular appeal.

Herr Schmidt made little of it

man in Eastern European Politics

and still an important contact

between Bonn and Moscow

has left the development portfolio to become SPD Secretary General.

Otherwise the new Cabinet

shows little change. Herr

Schmidt has evidently not im-

pressed by criticism that

many of his ministers are "greenies," who may be competi-

tive departmental administra-

tors, in several cases lack politi-

cal and popular appeal.

Herr Schmidt made little of it

fact that at least two membe-

rs of the Government bench

appeared to have voted again-

him. It was believed here

last night that his success on the first

ballot was closely linked to the

sudden and unexpected resign-

ation of the Minister of Labo-

r Walter Arendt, who had fall-

en of the Free Democrats, be-

fore the parliamentary elec-

tion. The replacement of

Herr Arendt's replacement

Herr Herbert Ehrenberg at t-

he last minute was seen as a sign

of the strengthening of the Gove-

rment's economic team. He

widely acknowledged as

an expert, both on broad econo-

matters and particularly on

problems of old age pensions

earners.

Herr Arendt is to be replaced

by Herr Herbert Ehrenberg, a

former State Secretary in the

Labour Ministry. There are

two other new ministers: Frau

Willy Huber at the Health

and Youth Affairs Depart-

ment, and Frau Marie Schlett, a

former Parliamentary State Sec-

tary to Herr Schmidt, who be-

comes Minister for Overseas

Economic Aid.

Herr Egon Bahr, former Chan-

cellor Willy Brandt's right-hand

man in the Foreign Ministry, is

to be given the post of Minister

for Economic Cooperation.

Herr Egon Bahr, former Chan-

cellor Willy Brandt's right-hand

man in the Foreign Ministry, is

to be given the post of Minister

for Economic Cooperation.

Herr Egon Bahr, former Chan-

cellor Willy Brandt's right-hand

man in the Foreign Ministry, is

to be given the post of Minister

for Economic Cooperation.

Herr Egon Bahr, former Chan-

cellor Willy Brandt's right-hand

American news

Bank support still lacking for NY crisis plan

BY JAY PALMER

NEW YORK City financial and pension funds, whose officials were this morning re-operating, is essential to the success of any new scheme, were still insisting that they had not yet agreed to participate. In its latest financial crisis it is understood that this plan would enable the city to comply with the court-ordered repayment of more than \$1bn of its short-term debt. The plan, delivered this morning to the Flushing National Bank, the New York suburban bank which is the principal architect of the month's successful legal alliance to the city's moratorium on its debt payments. However, officials from the Municipal Assistance Corporation (MAC) and the Housing Board today refused to say if the plan had been accepted. The city has always insisted that it would stand by its self-imposed deadline and come up with a plan by today. As with nearly all of New York's past "solutions" to its numerous financial crises, this test scheme is understood to have been based on a combination of other interest and repayment. A further debt held by institutions and more cash grants to the city debt purchases by the big problem is that this early in the New Year no one can be sure if the key creditor banks feasible solution is discovered.

Byrd tipped in race for Senate majority leader

BY JUREK MARTIN, U.S. EDITOR WASHINGTON, Dec. 15.

SEEMS increasingly likely backers would switch to Mr. Senator Robert Byrd of West Virginia will become the next Democratic leader of the more or less in line with that of other Senators, though Mr. Humphrey, who has made a remarkable recovery from cancer surgery in the autumn, appears determined to fight on at least for a while. The major criticism of Mr. Byrd, given voice again this morning in a leading article in the New York Times, is that while he is a formidable parliamentary tactician and therefore an excellent Senate whip, he is not blessed with original ideas and the qualities that make a good leader. Mr. Byrd was once among the most conservative members of the Senate and he is still no Humphrey 12, with six undecided. Mr. Hollings had 12 pledges to support him but he said only to the left and has managed him in spite of his own personal endorsement of Mr. Humphrey. About five of his erstwhile him.

U.S. defence boost likely

BY OUR OWN CORRESPONDENT WASHINGTON, Dec. 15.

HE FORD administration is 30 days after the presentation of its budget in which to make changes. It is felt that on the defence side they cannot be more than cosmetic. Even cancellation of a major project such as the B1 bomber would have relatively little financial impact now because funding of the project is proceeding at only a reduced rate. This represents an increase of approximately \$10bn over the current fiscal year. The Pentagon had originally put in for a budget at least \$125bn, and preferably \$130bn, but was taken down by the Office of Management and Budget. Mr. Carter is likely to trim much from the budget, without making any cut in policy decisions. He may be reluctant to do this initially. In the course of the election campaign, Mr. Carter said that this could be cut from defense spending, mostly by constraining on the manpower side. Mr. Carter's case has been however, it was never quite clear whether he was talking of an absolute cut or a reduction of magnitude in the growth of defense spending. The new President will have the Soviet Union.

Young may be UN envoy

BY DAVID BELL WASHINGTON, Dec. 15.

METHER OR not he does get a post in the new Carter administration—the latest strong indication is that he may be to this yesterday, on his return from a trip to southern Africa, representative Andrew Young, a "I feel very much at home in Atlanta Congressman, is southern Africa—it was just like me to be playing an important role in Mississippi or Louisiana or Georgia when I was president-elect Carter has been a child for months that Mr. Young is the only man to whom the over political debt, while Mr. Young, close Lieutenant of the late Dr. Martin Luther King, has been insisting that he would not accept such post in the new team, it is his success in swinging the black vote behind Mr. Carter that probably assured his victory.

There are now some signs that Young may be on the verge of changing his mind. Even if he does not, his views on Africa are going to be very influential in the coming months and years. He gave the United Nations Press Association a foreign policy. He told his audience yesterday that he believed what a contrast he would make between southern Africa and most of his predecessors at the Cabinet level job of Ambassador to the UN.

Jamaica votes amid tight security

KINGSTON, Dec. 15.

VTING took place amid tight security in Jamaica's crucial general elections to-day after the anti-violent campaign. A number of people have been shot, including two candidates and one of them, Mr. Fergus. Some violence has always been part of Mr. Manley's People's National Party (PNP), was still active, but Prime Minister recently ill in an intensive care unit, had a new anti-violence yesterday that this

The United Nations

Pivotal role ahead for Waldheim as peacemaker

BY OUR OWN CORRESPONDENT

THE FIRST 90 days of Dr. Kurt Waldheim's second five-year term as United Nations Secretary-General, coinciding with the advent of a strongly pro-UN administration in Washington, may well turn out a critical testing period for the world body. If it comes through with a modicum of success, a base may be formed for other advances, and the fulfillment of Dr. Waldheim's aim of making the UN "more effective and more relevant to the life and the problems of the peoples of the world in the last quarter of the 20th century."

Work closely

His main preoccupation when he begins the new term, on January 1, will continue to be the Middle East. A General Assembly resolution adopted a few days ago gives the Secretary-General until March 1 to report on the need for greater UN involvement, will almost certainly give the Secretary-General a pivotal role in the peace-making effort. After Dr. Kissinger it may be Dr. Waldheim's turn to become famous for shuttle diplomacy. He believes in the usefulness of constant motion. It is a technique he has applied in previous dealings with the Arabs and Israelis and in the Cyprus dispute, another of his continuing major concerns. As he told an interviewer recently, even when Governments are not yet ready to move, it is better to keep them talking and exchanging messages.

The Israelis are ready to go to Geneva at short notice if participation in the talks is limited to those invited to the first brief round three years ago. But the General Assembly, at the insistence of the Arabs, has de-

clared that the Palestine Liberation Organisation also must be fully involved in the negotiations. That gives the Secretary-General very little room for manoeuvre. Nevertheless, he remains optimistic. On December 8, after the General Assembly had confirmed his appointment, he told journalists that the chances for progress on the Middle East question had never been better, and there was a good prospect of overcoming the obstacles and getting back to Geneva.

Dr. Henry Kissinger's impending departure from the international diplomatic scene and the entry of Mr. Cyrus Vance, an extremely active supporter of the UN as chairman of the UN Development Corporation and a director of the UN Association of the U.S.—combined with a renewed Arab emphasis on the need for greater UN involvement, will almost certainly give the Secretary-General a pivotal role in the peace-making effort. After Dr. Kissinger it may be Dr. Waldheim's turn to become famous for shuttle diplomacy. He believes in the usefulness of constant motion. It is a technique he has applied in previous dealings with the Arabs and Israelis and in the Cyprus dispute, another of his continuing major concerns. As he told an interviewer recently, even when Governments are not yet ready to move, it is better to keep them talking and exchanging messages.

Then, when they are ready, there is a channel—himself as the embodiment of the UN—open and available. It is probably a good augury that the General Assembly, at the insistence of the Arabs, has de-

dared of so many resolutions and declarations, and the failures in other trouble spots. Given the protection of human rights, smallest encouragement, he is unlikely to find them a severe setback. The fiercest critics of Ireland, in fact, has often been criticised for spending too much time in orbit—sometimes countries where dissent is put to rest by rival Dr. Kissinger's globe-trotting—and not enough time attending to pressing administrative problems of the far-flung UN family in its New York or Geneva headquarters.

It is easy to be sceptical about the UN and to cite its failures as evidence that all the talk and running around are so much wasted energy. But the question that has no answer is, where the world would have been without it. The problems facing Government's now, more than ever, are global. Most acknowledge that they can hardly be solved, let alone resolved, without an international sense of institutions in which all nations, large and small, rich and poor, are represented.

Shortly after his re-election, the Secretary-General expressed his own assessment of global priorities: "As far as the political situation is concerned, we shall be faced with more or less the same problems—the Middle East, southern Africa, Cyprus, and disarmament, among others. And we shall have to solve them. I hope that this will be possible in the coming years. But I think that what will have the most significant in the years to come is the North-South dialogue. That will be a great challenge. Let there be no doubt about it—if that relationship is not solved in a positive way, there can be no political stability in the world."

KURT WALDEIM

second term full of risks,

and a possible Middle East breakthrough.

the General Assembly session now drawing towards adjournment has been one of the calmest in the UN's 31-year history. Delegates on all sides appear to agree that it has been a period of marking time. As at every session there have been angry debates. But on the whole, tempers have been relatively cool. Even discussion of the southern African questions—which dominated the agenda, though seldom mentioned by the principal founders, especially the U.S. and Britain. Objective observers see

Electricity isn't just a pretty face

A recent survey of industrialists voted electricity into first place among power sources for all the things that make industrial life more pleasant.

Cleaner. Quieter. Lower pollution levels. And so on.

From our point of view, that's just not good enough. Because the real strength of industrial electricity has far more to do with

providing better products, at lower unit costs.

For example, a plastics firm switched to electricity and cut their reject rate from 5% to less than 1%. A heavy engineering firm found that only electricity could give them the high quality castings they needed—and which their market demanded. A chisel manufacturer introduced an electric process which increased output by 20%.

These, and many other examples we can produce—from all industrial fields—are far more serious reasons for considering an electric investment than simply a nice factory. That's just a bonus.

OVERSEAS NEWS

Iraq says Syria to blame for bomb blast

By James Buxton.

IRAQ yesterday accused Syria of responsibility for the bomb explosion at Baghdad airport on Tuesday evening which according to early reports killed at least three people and wounded scores more, at least ten of them seriously. According to the Iraqi News Agency the bomb was in a suitcase unloaded from an Egyptian aircraft, whose last port of call had been Damascus, the Syrian capital.

The agency, which made no statement for more than 12 hours after the explosion, said that an investigation had shown that the suitcase, containing 7 to 8 kg of high explosive, did not belong to any of the passengers on the aircraft, and that the whole operation had been carried out by the authorities at Damascus International Airport. Two Iraqis and a Saudi were killed, while those wounded included West Germans, Japanese and Greeks, as well as Iraqis and other Arab nationals.

In London, a British Airways spokesman said that as many as 100 people may have died and as many as 400 been wounded. The Iraqi Government produced no evidence to support its claim of Syrian involvement, but observers in the Middle East and in London believe that in the present context of deep distrust between the two rival Baathist regimes a Syrian-inspired move should not be ruled out.

Irqi officials have recently spoken openly of working for the downfall of President Hafez Assad's regime in Damascus. Palestinian terrorists who carried out an attack on the Semiramis Hotel in Damascus in September were said to have been trained in Baghdad, and Syria has accused Iraq of responsibility for the assassination of an Iraqi member of the National (pan-Arab) Baath Party leadership in Damascus in July.

Breakaway

A breakaway Palestinian movement known as Black June has claimed responsibility for the hotel attack, for another in Amman in November, and for the attempt on the life of Syrian Foreign Minister Abdul Halim Khaddam outside Damascus at the beginning of this month. The movement, led by Abu Nidal, is known to be based in Iraq and enjoys government backing.

Iraq only recently started withdrawing the four or five divisions it moved to the Syrian border in June to try to deter Syrian intervention in Lebanon.

Two other possible explanations of the explosion cannot be ruled out at this stage. The first is that it was organised by Kurdish opponents of the Iraqi regime. Although the Kurdish war ended in March last year, there have been some flickering of revolt since then. Earlier this year there were bomb explosions in both Kirkuk and Basra, the perpetrators of which have been officially named.

Earlier this week the Iraqi Information Minister, Mr. Tariq Aziz, accused a Damascene based Kurdish activist, Mr. Jalal Talabani, of being behind terrorist incidents inside Iraqi territory near the Syrian border. Mr. Talabani was once a close associate of the Iraqi Kurdish insurgents' leader Mulla Mustafa Barzani, and can be assumed to be operating with Syrian acquiescence, if not approval.

Western diplomatic sources, however, did not rule out the possibility that the explosion might have been caused by internal opponents of the Iraqi regime. With President Bakr unwell, and the "strong man" of the regime, Vice-President Saddam Hussein Tikriti in an increasingly influential position, there might be some temptation for his enemies to suggest that the regime was not as stable as it appears by staging a bomb explosion.

Anti-tax strike on West Bank

By Tom Ackerman

NABLUS, Dec. 15. SHOPS, schools and public transport in most cities of the West Bank of the Jordan and in the Gaza Strip shut down today in a largely peaceful general strike to protest against extension of Israel's value added tax to the occupied territories.

Israeli authorities made no effort to break the strike, although "preventive" curfews were imposed for several hours on sections of Nablus and Ramallah. In East Jerusalem, shop-keepers failed to head the strike call and implied warnings from police that they would be fined or have their establishments padlocked.

Van Der Byl opposed to an enlarged British role

BY BRIDGET BLOOM, AFRICA CORRESPONDENT

MR. IVOR RICHARD, chairman of the now adjourned Geneva conference on the future of Africa, has expressed himself optimistic that agreement on Rhodesia could be reached by January 31.

Referring in Geneva to his forthcoming visit to Africa, Mr. Richard said that he hoped to be able to take "positive new ideas" from Britain. The main task was to assure the nationalists on the black side "and then present us with an agreed formula which would be so far removed from the spirit and framework of the original Kissinger proposals that we would have to reject it," he said.

Mr. Richard felt that the elements for a "sensible interim Government" existed, but he did not deny the difficulty of "slotting them together." He suggested that this process could delay the resumption of the conference on January 17, although he hoped that it would not.

Quite how hard Mr. Richard's task in Africa will be was underlined in his remarks and his pessimistic attitude to progress so far. He said attitudes had been allowed to harden he said and the main business of the conference—the implementation of the Kissinger Plan, which Mr. Van Der Byl again termed a "contract" had not even been discussed.

The Foreign Minister was sceptical and suspicious of the value of Mr. Richard's mission to Africa. The main preoccupation of the British seemed to be to arrive at a consensus on the irreversibility of the transition to independence and to assure the nationalists on the black side "and then present us with an agreed formula which would be so far removed from the spirit and framework of the original Kissinger proposals that we would have to reject it," he said.

Meanwhile in a strongly worded joint statement, Mr. Robert Mugabe and Mr. Joshua Nkomo, leaders of the Patriotic Front, repeated their view that the conference's purpose was to arrange a speedy transfer of power to the majority. They ruled out of hand the Kissinger Plan, which they referred to as a "dangling imperialist carrot" but made it clear that the intended to return to the resumed conference next month.

PLO call for 'independent state' raises Mid-east peace prospects

BY HSAN HIJAZI

THE PROSPECTS for a Middle East peace settlement may have been significantly improved by a shift in the position of the Palestine Liberation Organisation, following the three-day meeting of its Central Council in Damascus. The council adopted a resolution calling for the establishment of an independent Palestinian state as one of the national rights of the Palestinian people.

This is the first time the phrase "independent Palestinian state" has been used in official PLO statements. Hitherto, the official phrase has been "establishing a Palestinian national authority."

Observers here say the shift may be tactical but is nevertheless quite important. They consider that the PLO may have started giving priority to a negotiated settlement of the conflict with Israel rather than armed struggle.

The shift does not yet spell out the specific boundaries for the proposed state. However, PLO leaders, including Chairman Yasser Arafat, have implied they would be prepared to accept a state in the West Bank and the Gaza Strip once the territory is given up by the Israelis.

The Central Council's statement made no mention of the PLO's original long-term goal of setting up a secular democratic state in all of Palestine to comprise Moslems, Christians and Jews and to replace the state of Israel.

The PLO's new process could eventually lead to the Palestinians following a uniform policy with that of Egypt and Syria. This policy seeks a negotiated settlement with Israel within the Geneva Conference.

The resolutions in Damascus are intended, observers believe, to set the stage for forthcoming discussions by the Palestinian parliament in exile. The Damacus statement, which reported other resolutions, said an enlarged National Council should meet not later than next February.

The banks managing the refinery loan—which is for seven years including a two-year grace period and at 12 per cent above the Singapore interbank rate—will be paid to the Cilacap refinery project in both Kirkuk and Basra, the perpetrators of which have been officially named.

The importance of the loan is that it marks a renewal of confidence among major Western and Banks in Indonesia's credit-worthiness following the revelation of the loan.

The refinery is already in operation and is designed to pro-

cess 100,000 barrels of Middle East crude per day, producing kerosene, gasoline, diesel and other fuels, as well as lubricants and asphalt.

Another big syndicated loan is now being negotiated by Bank Indonesia with a Japanese group

for the financing of the LNG plants in east Kalimantan and Achen. The international bankers do not seem to be affected at all by earlier reports of a possible technical cross-default by Indonesia on account of non-payment of instalments for Pertamina

tankers.

The system, which is scheduled to come into use at the end of 1979, will consist of four processing units with connections to 38 sub-stations. A later expansion to 120 sub-stations and seven power stations is planned.

Factory nationalised

The Government of St. Kitts-Nevis and the British Henckel Dubilson company have reached agreement on the nationalisation of the island state's only sugar factory, writes Tony Cozier in Bridgetown. The Government will pay £1m. for the factory and all its equipment under the agreement. The take-over will be effected on January 1, ending 68 years of British ownership of the factory.

Police gave no further details but said a postmortem will be held tomorrow. Police cordoned off the building for two hours while ambulance workers took away the body.

Five days ago police said a young black engineering graduate hanged himself in his cell at Johannesburg's John Vorster Square prison. They said Wellington Tshazibane, an Oxford graduate employed by the giant mining corporation Anglo-American, was held for questioning after a colleague of his was detained for throwing an explosive device into a crowded white restaurant.

The Institute of Race Relations, which opposes the white regime's apartheid laws, has called for a judicial inquiry into the death in police detention of the Institute's acting director Mr. J. G. Wolton, said the inquiry was necessary to "set at rest the minds of concerned people the world over."

members of the upper house and 260 members of the lower house will pick the party's candidate for Premier. At the same meeting, LDP officials agreed to shorten the tenure of the party's presidency from three to two years. That would entail a new vote on the party leadership at an LDP convention in January, which could mean that Mr. Miki will stay as party leader until then, even after a new candidate for the premiership is picked.

Meanwhile, the Government got opposition agreement yesterday to convene a special session of the Diet (parliament) on December 24, for a maximum of five days, during which the new

Prime Minister and top Diet officials will be elected.

Between now and the vote in the Diet's lower house, the LDP and opposition parties will strive to pick their respective candidates with a minimum of bloodletting. Mr. Masashi Ishibashi, secretary-general of the Japan Socialist Party (JSP), is holding talks with key opposition members of the lower house in an attempt to forge a united front to support the JSP president, Mr. Tomomi Naito, for Prime Minister.

But in talks this week with Mr. Junzo Yano, his counterpart in the opposition Komitei (Clean Government Party), Mr. Ishibashi failed to get an endorsement for Mr. Naito, who have since joined its ranks to give the party 260 seats.

Earlier this week, the party executive endorsed a plan by Secretary-General Tetsue Uchida to call a caucus of the LDP's parliamentary group on December 23, at which its 126

leading political commentators to predict that the opposition may split its vote between two or even three candidates.

The decision to hold the LDP parliamentary caucus on December 23 came in the midst of a bitter and increasingly vocal campaign by Miki supporters and members of other LDP factions to block the nomination of Mr. Takeo Fukuda, the runner for Mr. Miki's job, who resigned from the cabinet just before the December 5 lower house elections, in which the LDP failed to win an outright majority in the 511-seat lower house, although 11 independents have since joined its ranks to give the party 260 seats.

Meanwhile, the Government

got opposition agreement yesterday to convene a special session of the Diet (parliament) on December 24, for a maximum of five days, during which the new

GEC wins order for S. Korea

Following the supply of GEC equipment for the first stage of a major South Korean electricity transmission system, GEC Switchgear has been awarded a supply contract valued at approximately £31m. for the provision of substation equipment for the second stage.

The contract covers equipment for seven complete transmission substations, involving a total of 88 circuit-breakers, together with power transformers, high-voltage isolators, fuses, traps, and signalling equipment, instrument transformers, lightning arresters, protection and control equipment.

Delivery of the equipment will commence during 1977, with overall commissioning scheduled for 1980. Manufacture will be carried out at the company's factories in Manchester and Bradford.

Aircraft for Germany

Short Brothers and Harland, the aircraft manufacturer of Belfast, has signed a £15m. order for one of its twin-engined SD3-30 Commuter airliners with the German airline, DLT, of Frankfurt, with an option on a second aircraft. The deal brings the total number of firm orders for the SD3-30 so far to seven for three airlines, with options on three more aircraft.

Commission loan

The EEC Commission has granted Stahlwerke Roerhingen-Burbach of Voelklingen, Saar, a DM200m. loan to help finance long-term investment.

Sony video

The Sony Corporation of America is to add a second \$4m. manufacturing facility at its new magnetic video tape factory now under construction in Dothan, Alabama. The second plant will be to make plastic shells for Betamax videocassettes.

EIB loans

European Investment Bank (EIB) has announced two loans totalling £2m. units of account to help finance a telecommunications project in Ireland and small- and medium-size industrial ventures in Belgium.

Ecuador pipelines

The InterAmerican Development Bank has approved \$36m. in financing for two pipeline projects in Ecuador.

The borrower is Ecuador's national petroleum agency corporation, Estatal Petrolera Ecuatoriana.

Beirut open

Beirut's crippled port, once the busiest in the Middle East, officially went back to work, but no ships came. Only one wharf of more than a dozen was back in business to receive shipping.

Siemens in Kuwait

Siemens has received a contract valued at DM52m. from Kuwait for planning, delivery and assembly of an electricity distribution system that will automatically guide electricity to where the power is needed.

The system, which is scheduled to come into use at the end of 1979, will consist of four processing units with connections to 38 sub-stations. A later expansion to 120 sub-stations and seven power stations is planned.

Increase in Indo-Soviet cooperation

BY K. K. SHARMA</p

MICHAEL BLANDEN SUMS UP THE BANK OF ENGLAND BULLETIN

£9.5bn. rise in national debt double record

EVERY Government borrowing issue is also reflected in an increasing relative reliance on short-term funds are shown in the latest annual analysis of the national debt in the Bank of England Bulletin.

The analysis shows that on March 31 the nominal total of £11.75 per cent. during the year—most of the increase—was in the form of gilt-edged stocks.

The financial year was almost double the previous largest rise sharply, representing 12 per cent. recorded since 1958, when the debt held by the market rises started. Over the last year compared with only 4 per cent. in March 1971. Most which had already taken place of the increase came in the last two years.

Heavy official sales of gilt-edged stocks were required, with stocks issued during the year, a total there was an increase in the total outstanding amounts short-dated stocks.

This had the effect of raising the average amount of stock held in each of the last five years from £2.3bn. to £7.7bn. a year, compared with an average of less than £1.5bn. the years from 1970 to 1974.

In spite of the large number of stocks issued, moreover, the proportion of the total national debt in the form of gilt-edged stocks fell from 89.1 per cent. to 88 per cent. during the year. At the same time, the proportion in the form of Treasury bills rose from 16.8 per cent. to 11 per cent.

The rise in Treasury bill

Need to restrain monetary expansion emphasised

DOMESTIC credit expansion, the expansion was well above the main monetary indicator levels required to meet the targets which the Government had then adopted. Besides, the 12 per cent target for the increase of money supply on the wider definition (M3) in the third quarter to a figure of nearly £3bn.

The rise, already indicated by the published money supply figures, provides the reasons for the drastic actions taken to bring money supply under control. These have included sharp increases in interest rates and the application of the "corset" controls over the growth of the banks.

Following the £2.6bn. jump in financial year's debt has one up by 37 per cent. Heavy official sales of gilt-edged stocks were required, with

stocks issued during the year, a total there was an increase in the total outstanding amounts short-dated stocks.

This had the effect of raising

the average amount of stock held in each of the last five years from £2.3bn. to £7.7bn. a year, compared with an average of less than £1.5bn. the years from 1970 to 1974.

In spite of the large number of stocks issued, moreover, the proportion of the total national debt in the form of gilt-edged stocks fell from 89.1 per cent. to 88 per cent. during the year. At the same time, the proportion in the form of Treasury bills rose from 16.8 per cent. to 11 per cent.

The rise in Treasury bill

points out that bank lending to the private sector in sterling had increased by over £2.2bn. in the six months to mid-October, with the broader version of the money stock going up by nearly 8 per cent. in the same period.

Commenting on the further sharp fall in the value of sterling over the four-month period to the end of October, the Bank

remarks: "During this period, the need to conserve the official reserves became an increasingly important constraint on the amount of official intervention."

Initially, the Bank says, the market appeared to regard a rate of £1.77 as appropriate, and only occasional official support was needed to prevent undue fluctuations in the rate.

But towards the end of August, market sentiment began to turn against the pound, and in several periods of pressure it reached a little cost to the reserves."

The pause in gilt-edged sales during the summer was reflected in net sales of only £500m. of stock in the third quarter, though the Bank points out that since then large sales have been made. Some of the long-dated tap stock was sold on August 17—the first sale of a tap stock for six weeks—and there were no further sales until the latter part of September.

In the third quarter, the central Government's borrowing requirement, at £1.8bn., was smaller than in recent quarters and rather less than had been predicted earlier in the year. However, little more than a third was financed by domestic investors other than banks, taking it outside the figure for domestic credit expansion. Consequently, finance from other sources contributed over £1.1bn. to domestic credit expansion, compared with around £700m. and £900m. in the two previous quarters.

Bank lending to the private sector has also increased more rapidly this year, from a rise of only £100m. in the first quarter to £900m. in the second and over £1.1bn. in the third. After the

pauses two-thirds of employees were automatically, if partially, linked to the retail price index through the mechanism of three-part payments under the incomes policy then in force.

Nevertheless, wage settlements during the year were much larger than required to maintain real earnings or to anticipate the continuation of prevailing price increases. They were thus apparently in part an independent source of inflation."

From early last year, however, the impact of high-wage settle-

ment system, also affect the distribution of personal incomes.

Examining the effects on disposable income, the Bank points out that income tax and national insurance contributions have risen more proportionately to personal income, from 19 per cent. of the total in 1971-73 to 24 per cent. in the first half of this year.

Even taking account of the fall in value of money there was an unusually large increase of about 7 per cent. a year in real personal disposable income between 1971 and 1973.

The combination of pay restraint and rapid inflation, with a non-indexed and progressive tax system, also affect the distribution of personal incomes.

LABOUR NEWS

TUC plea for local power likely to be rejected

BY JOHN ELLIOTT, MANAGEMENT EDITOR

TUC DEMANDS for trade union by a majority of the association's representatives to be given seats on local councils are likely to be rejected next year. The Government has told the TUC that although experiments with non-voting seats will be approved.

This is emerging from talks now taking place among local government employers and their employee unions, with the local council associations playing a leading role in opposing any legislation which would give trade union representatives an automatic right to any type of direct representation on either local councils or their committees.

At the same time, however, some councils are going ahead with their own experiments, the first being the Greater London Council which has decided to exempt any legislation by planning a standing invitation to its trade unions to occupy up to a third of its committee seats, but without voting rights.

Voting Rights

A study of how to extend industrial democracy in local government without upsetting the existing electoral principle forms part of one of the internal Whitehall inquiries on industrial democracy in the public sector. These have been proceeding alongside the Bullock Committee of inquiry on the private sector, whose report is now being studied by Ministers. It is intended that the result of these Whitsun inquiries should be included in the White Paper on the Bullock proposals which Ministers are at present planning to produce next summer.

The most concentrated opposition so far against any widespread worker director type of system being adopted in local councils has come from three associations representing district, metropolitan, and county councils.

Together they have agreed that "although one or two authorities have developed, or are developing, proposals for having employee representatives present at meetings of committees in a non-voting capacity, this was felt to be unacceptable introduction of a local income

that "direct participation of staff as members of councils or committees is ruled out," but goes on to acknowledge that each individual authority has a right "to change its practice and have such employee representation at meetings of committees if it wants to."

But the Government will come under increasing pressure not to introduce any legislation that would force councils to accept employee representatives on the public, private sector pattern.

The TUC will now, however, continue to urge that there should be legislation giving councils and committee seats, maybe without voting rights, to employee representatives on more than departmental basis.

The Government might well feel, however, that to do this in local Government would make it hard to resist a similar incursion into central Government and might decide to resist any advance on either front.

At the same time, a growing number of councils are accepting that their employees, apart from chief officers, should be allowed to stand in the normal way in local council elections, and this idea has now been backed by the Metropolitan Association.

Role in council finance forums urged

BY OUR LABOUR CORRESPONDENT

TRADE UNIONS should be represented on a proposed new forum to plan local government finance, says the TUC in comments on the report of the Layfield Committee of inquiry into local government finance.

In a note commenting on the report, the TUC argues that its representation on the forum suggested by the committee would assist progress in resolving different problems of conflicting interest.

The TUC also maintains that the time is not right for the party of the TUC-Labour Party liaison committee to consider the feasibility of a wealth tax.

Leyland Cars almost back to normal to-day

BY OUR LABOUR STAFF

LEYLAND CARS will be back almost to normal to-day for the first time in several weeks with the recall of 3,000 workers on action that could endanger life or limb or damage equipment.

Earlier in the week there had been accusations of three welding machines having been electrically sabotaged.

With Leyland car production struggling back to normal after estimated losses of about £12m. payment during a previous and external disputes, the only strike enough production has been possible to support a return at the Sherpa van factory, Birmingham.

The electricians' shop stewards yesterday disputed the dispute by management to have failed to pay accordingly, and are on strike supported by 1,000 other workers. About 220 are laid off.

The Chancellor's Speech

Our aim—economic recovery and return to full employment

DEARER DRINKS and cigarettes and cuts in housing, education and defence spending were announced by Mr Denis Healey in his economic statement to a packed Commons yesterday. The Chancellor's fourth budget of the year.

But the Government will come under increasing pressure not to introduce any legislation that would force councils to accept employee representatives on the public, private sector pattern.

The TUC will now, however, continue to urge that there should be legislation giving councils and committee seats,

maybe without voting rights, to employee representatives on more than departmental basis.

The Government might well feel, however, that to do this in local Government would make it hard to resist a similar incursion into central Government and might decide to resist any advance on either front.

In order to avoid excessive strains next year, when the economy will still be operating well below capacity, the measures will cover the next two years.

"They will form part of a medium-term programme for national recovery to ensure that, in the 1980s, after the prospect of an economy fully restored to balance, with high levels of output, employment and real wages and an industry which is vigorous, expanding and profitable."

"Further elements in this programme for national recovery will be contained in my next Budget and in the next phase of the industrial strategy."

Benefits

"Once again we have avoided mechanical cuts across the board and have not reduced the main social security benefits, although we are concerned about the narrowing gap between them and the income of those in work. The cuts will therefore fall elsewhere."

"So far as the Civil Service is concerned, we intend to add nothing to the economies already announced to obtain further economies of some £30m. next year and £10m. in 1978-79."

"Local Authority current expenditure is now more strictly influenced by the central Government through the recent reduction of the main Rate Support Grant for England and Wales from 65p per cent. to 61 per cent. in 1977-78 and the corresponding reduction for Scotland. We are not re-opening these settlements."

"But there will be a reduction in Housing capital programmes. Without these adjustments there would have been a substantial overspend on housing. The reduction now decided will offset most of the likely excess in the next year and will contribute a saving of £30m. in the following year."

New construction will be suspended or curtailed in several other central and local government programmes, including roads, other environmental services, school-building and capital account, and Government account, and capital spending by the Water Authorities. This will save about £270m. next year and over £300m. in 1978-79.

"I am therefore announcing specific measures this afternoon which amount to some £1bn. in each year, all of which will be offset by the Retail Price Index over 1977/78."

"Expressed as a percentage of GDP the PSBR will fall steadily from 9 per cent. in the current year to about 6 per cent. in 1977-78 and reduce over 5 per cent. in 1978-79. These objectives are calculated on the basis of the economic forecast as I now see it."

"To achieve these objectives, the Government are proposing adjustments to recurrent plans amounting to £5bn. in 1977-78 and £2bn. in 1978-79."

"I am therefore announcing specific measures this afternoon which amount to some £1bn. in each year, all of which will be offset by the Retail Price Index over 1977/78."

"Borrowing approvals will be reduced to achieve a slower build-up of land acquisitions under the Community Land Act."

"In addition, the Government will make a further fiscal adjustment of about £5bn. in 1978-79. It is too soon to say what form this further adjustment will take."

Growing

"It is, of course, impossible to forecast with any confidence the present time what will be the condition of the economy in 1978-79. The extent to which further fiscal adjustment might be needed cannot be decided at this stage."

"If the forecasts at the time show the economy growing from the beginning of 1978 to the end of 1979 at a rate of more than 3½ per cent. a year, the Government intend to make a further fiscal adjustment in the 1978 Budget—of between £1bn. and £5bn. depending on the buoyancy of demand and the state of the world economy at that time—to ensure that, with those higher growth rates domestic conditions do not prevent us from giving the necessary priority to exports and investment."

"Besides reductions in school building, to which I have already referred and which will not affect the basic needs, the programme for current expenditure will be reduced by economies in the administration of school meals, and by other minor savings."

"Under the new treatment of the nationalised industries on which we have consulted the Expenditure Committee, we shall in future be included in public expenditure for these industries rather than their investment programmes as such."

"We intend to agree with the nationalised industries action which will reduce the level of Government financing by £10m. and £15m. in the next two years."

"As well as economies in spending there will be increases in revenue, notably a gas price increase which the Government are asking the British Gas Corporation to effect from April 1978."

"As I told the House in July, the Government want to move progressively towards a more progressive approach to assistance for industry. It is doubtful whether Regional Employment Premium now fulfils the original purpose of attracting employment to the regions."

"We therefore believe that it should now give way to more selective measures and it will be withdrawn." Statutory Order early in the New Year, saving £150m. next year and £170m. in the year after.

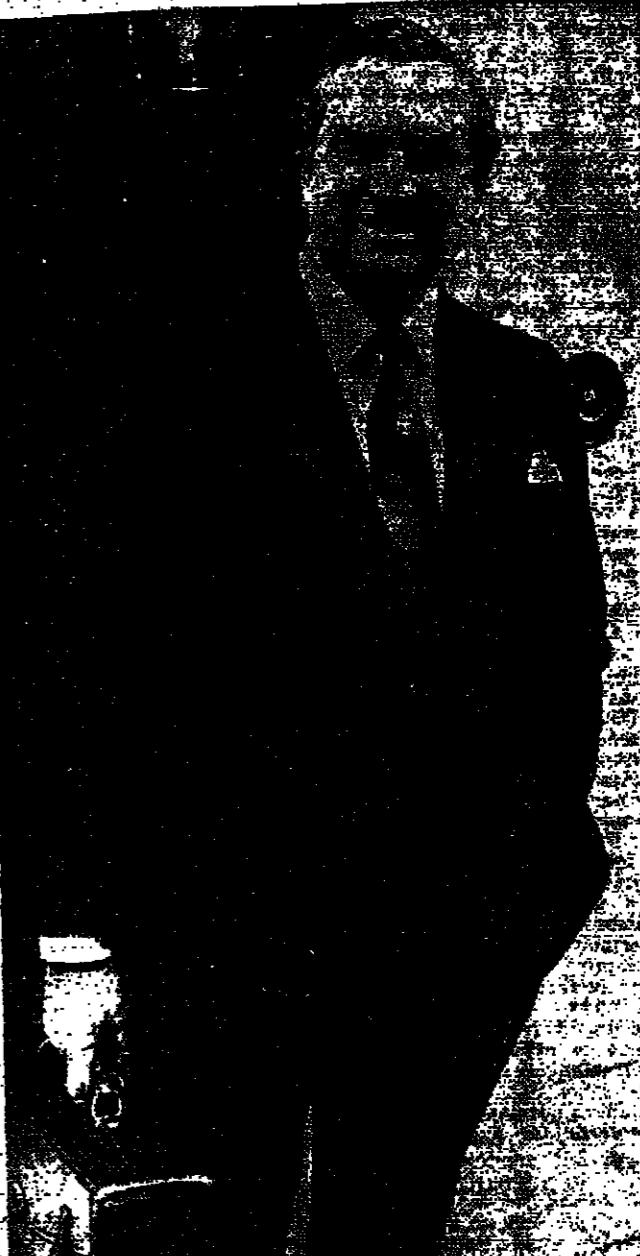

"I shall be describing in a moment other measures in the industrial field designed to assist employment and investment to the regions."

"In an exercise of this magnitude, spending in support of our external policies must inevitably play its part. Despite the big cuts which we have already made in defence expenditure, we cannot achieve the necessary reductions in public expenditure and the PSBR without a contribution from the Defence Budget."

"We are looking to defence for further savings of £100m. in 1977-78 and £100m. in 1978-79."

"The White Paper which we published in February this year set out our medium-term strategy for the provision for overseas aid to public expenditure."

"In accordance with this almost entirely protected from State at the Home Office 1977-78 and in July he proposed

Mr. Denis Healey leaving No. 11 Downing Street.

"The refinancing by the Government of fixed rate credits for exports and shipbuilding were announced by Mr Denis Healey in his economic statement to a packed Commons yesterday. The Chancellor's fourth budget of the year.

"In carrying out the 1976 public expenditure survey we have already made certain adjustments so as to keep within the February White Paper plan for each year, as modified by the measures I announced in July."

"In order to achieve the new PSBR targets to which I have referred, we have now decided to reduce public expenditure programmes further by £1bn. in 1977-78 and £1bn. in 1978-79 at 1976 Survey prices."

"The details are being circulated in the Official Report and are available in the Vote Office, but I will now describe the main changes which are being made to the programmes as they emerged from the survey."

"We are therefore taking steps to encourage the use of foreign currency financing and to control the rate at which new offers of fixed rate sterling finance will be approved by ECBD."

"All these measures will reduce expenditure on refinancing and together produce a net saving of £100m. in 1977-78 and £200m. in 1978-79, below that shown in Cmd 6393."

"We are aware of the concern of industry about the future of the cost escalation scheme which, as matters stand, is due to end in March 1977. We now propose that it should be continued for a further year. The necessary draft Order will be laid before the House in due course."

"Revised expenditure programmes for 1977-78 and 1978-79, taking account of these measures and of other adjustments made during the public expenditure Survey, will be set out in the public expenditure White Paper in due course."

"These decisions will reduce planned expenditure by a little over £1bn. and £1.5bn. in the next two financial years. Both figures are at 1976 Survey prices. In current prices they will be much additional expenditure, although the impact on employment next year of the are fully justified at this larger

"On the other hand, we have decided to add to expenditure in other areas which we believe should have the highest priority—the development of infrastructure, incentives for investment and expansion of employment.

"There will be an increase in the resources of the National Enterprise Board and the Scottish and Welsh Development Agencies. A new selection investment scheme will be introduced to follow up the very successful Accelerated Projects Scheme."

"Borrowing approvals will be reduced to achieve a slower build-up of land acquisitions under the Community Land Act, which will come into force for the current year. The rate at which it is spent will depend on how many good projects come forward for support. Further money will also be made available for additional sectoral schemes in support of the industrial strategy and for other measures to help industry."

"Taken together, these measures will add rather over 0.5 per cent. to the Retail Price Index.

"They will raise the tax charge on a pint of beer of average strength by a little under 1p, and on a standard bottle of spirits by about 31p."

"They will increase the charge on a standard bottle of table wine by about 5p, and on a bottle of fortified wine such as sherry by about 7p."

"The tax on a packet of 20 filter cigarettes of average size will be increased by about 4p."

"We have decided to extend these schemes to the end of April, and then to review their future along with the other new schemes which the Government will have in 1977-78."

"As the House will be aware, these shares are currently subject to a legal claim by Burnham against the Bank of England.

"We are advised in the terms of this claim, it is merit but so long as it is pursued it may prove an important success."

"If this impediment is removed, the Government will appropriate additional BP shares and, of course, will make good holding by securing the transfer of the Treasury of an equal amount of the BP stock held by the British Petroleum Company."

Aware

"We now propose that Bank should sell enough of its former shareholding to leave the total of the Government's and the Bank's holding at 51 per cent. as against 50 per cent. held by the Government before the ex-Burnham BP shares.

"As the House will be aware, these shares are currently subject to a legal claim

Leyland to split truck and bus group

By Stuart Alexander

RIGHTS LEYLAND is to split its truck and bus group into two separate divisions from January 1.

Each is expected to be self-supporting and will have its own management structure, and all will report to a separately appointed main board.

The four divisions will be medium and light vehicles, heavy vehicles, passenger vehicles and parts.

Tractors and power systems will continue under medium and heavy and Sealab and service depots will be managed by the heavy division.

Each division will be responsible for its own profitability and will be controlled by a general manager who will report directly to the group managing director, Mr. D. H. Fletcher.

The move has been made because of the widely different products made by each division and is designed to make model development and rationalisation easier by being considered in their own rather than a wider context.

Engineering

Functions within each of the four divisions will include personnel, finance, administration and systems, sales and marketing.

Additionally, the three vehicle divisions will super-supply quality control, manufacturing, product engineering and service.

A separate engineering services division will also be available on a group basis for such things as testing and research.

The parts division will also control buying, supply and warehousing.

On the main Board, to which one appointments have yet to be made, five group directors will be responsible for marketing, planning, finance and systems, quality and personnel.

Additionally, there will be an executive director who will look after strategy and major policy and will act as deputy to the managing director.

Leyland is expected to announce the full list of appointments in the near future.

Equity bank to name top executives soon

By MARGARET REID

A MERCHANT BANKER and a City accountant are among three senior executive appointments to be announced soon at the equity bank. Equity Capital for Industry, which will soon move into its own premises in the City to begin full operations in the New Year.

Mr. David Cole, of J. Henry Schroder Waggs, the merchant specialist, and Mr. Brian Deas, a chartered accountant now with Coopers and Lybrand, will be secretary of the bank, a post hitherto held temporarily by Mr. David Lomas of the Bank of England.

They will be joined by one other senior executive to handle the industrial side, bringing to four the full-time team which will be led by Mr. Alan Barrett, the solicitor and deputy chairman of ICI's plastics division who has been appointed chief executive.

The bank, created last year after some controversy over a £2m. of capital put up by investors to invest in companies which may not be able readily to raise capital on the market, will operate from Little House, Grosvenor Street.

Mr. Barrett will devote most of his time to the new venture from January and will be completely full-time from February. The inquiry which the Bank of England is sponsoring into the clothing industry and its

Prospects of bread price war recede

By ELEANOR GOODMAN, CONSUMER AFFAIRS CORRESPONDENT

THE POSSIBILITY of a bread price war receded yesterday when the major unions in the industry said it would not go ahead. They fear that if a price war was to break out, it would be self-defeating and possibly hit 25 per cent maximum.

A second of the major baking groups has told its customers that it would not increase its discounts in spite of the Department of Prices' decision to abolish the present statutory limit from January 4.

The Bakers' Union said its executive had agreed to call its members out for one week at any factory belonging to the major bakers selling bread at a discount of more than 25 per cent. Workers at independent bakeries giving discounts of more than 25 per cent would be called out for two weeks.

The union decision followed an announcement from the van run a special promotion would drivers union that they would give slightly better not deliver bread being sold at a terms — similar to those announced by ABF.

Bigger market share for British TV sets

By MAX WILKINSON, INDUSTRIAL STAFF

DELIVERIES OF colour televisions in the U.K. totalled 126,000 in October, a 5 per cent. increase on the figure for October last year. The figures, from the British Radio Equipment Manufacturers' Association, show that the proportion of imports has been reduced significantly, with U.K.-made deliveries up by 11.5 per cent.

The year's sale of colour sets is now expected to exceed the previous estimates of 1.6m. sets by up to 100,000.

A big stimulus to demand last month was the rumour spread by some retailers that the VAT rate would increase in the mini-Budget.

The comparison with last year

must be treated with caution, because the increase in VAT to 15 per cent. in 1975 made a very unusual sales year. The increase concentrated sales into the early part of the year and led to very slack trading in the late summer and autumn.

The association figures show that U.K.-made deliveries of colour sets reached 133,000 in October — 83 per cent. of the market.

Deliveries of U.K.-made monochrome sets, however, were only 43,000 — 4 per cent. down on last year — and represented 45 per cent. of the total market.

Deliveries of U.K.-made radio sets were 23,000, only 6 per cent. of the total market.

The deficit problems appear to date back to the Norcros acquisition in 1974 of the Criftall companies from Slater Walker.

Parts of Adamson Butterley were formed part of Criftall until Norcros carried out a major reorganisation of its various

Nuclear finance

By Graham Hatton

A CONSORTIUM of French banks, led by Credit Lyonnais and Banque de l'Indochine et de Suez, has concluded an export credit agreement with South Africa's Electricity Supply Commission to finance the Koeberg nuclear power station. It was normal way, as if child benefit could be obtained, and inviting people who thought they had a

parents will still be able to claim claim to apply for the allowance tax allowances as at present.

Longer term arrangements £300 for a child born on or after April 7, 1978, for children living

after April 7, 1981 but before a later statement.

Management's 'vital role'

BRITAIN would win the battle for national recovery, but she need every scrap of initiative, imagination, enterprise and skill she could muster, Mr. Gordon Oakes, Minister of State for Education, said yesterday.

Opening a management education and training conference in London sponsored by the Government, he said it would be a long hard march, but if we did

not try, "we might as well kiss tomorrow goodbye."

While curbing public expenditure had to take priority, one of the most crucial elements in releasing the nation's creative potential was proper management.

Many shortcomings could be traced to inadequate management, so Britain had to look again at the process by which managers were produced and trained,

they will provide 165 temporary posts mainly for unemployed people under 24 but including some for people over 50.

It brings the total number of schemes approved on Merseyside

so far to 461 offering 6,455 jobs at a total cost of £15m.

New chief at Office of Fair Trading

By Our Consumer Affairs Correspondent

MR NEIL BURTON is to take over as director of the restrictive trade practices division of the Office of Fair Trading. He will succeed Mr. Philip Harris, who is retiring after 10 years of work on restrictive practices.

It appears that the equity bank is likely to make its investments only against holdings of shares or capital convertible into shares. It will act sometimes alone, or in association with the bank-backed Finance for Industry, which could advance loan capital, and sometimes in association with others, through a package, as in the Dunford case.

Few names of companies which have been in touch with the bank are known. It is understood, however, that Chamberlain Phipps, a Northamptonshire manufacturer of components for the shoe, clothing and other industries, has already received a bid from Johnson and Firth Brown. The bank had been unwilling by itself to put up the whole £m. to finance the bid.

Some investment propositions involving the bank are being considered by the Bank of England, whose network of regional branches is closely in touch with industry. It may on occasion put a company with need for investment in touch with the equity bank.

The talks have been deferred but could be revived later.

Chamberlain Phipps, whose turnover in 1975-76 was £35m., saw its pre-tax profit in that year dip to £633,000 from £1.3m. in the previous year. There was marked recovery in April-September this year to £833,000, however, compared with £227,000 a year earlier.

So far about 110 agreements in the service field have been put on the register.

Mr. Burton, who is 46, joined the Civil Service in 1951 as an assistant principal at the Ministry of Supply.

Among his first jobs will be signing through the 400 or so agreements which have been submitted to the office as possibly coming within the scope of the law.

At constant prices, new work output in the public housing sector during the third quarter was 6 per cent. down on the previous quarter and 6 per cent. below the level of a year earlier.

Provisional figures issued yesterday by the Department of the Environment show that the current price value of construction work carried out by contractors between July and the end of September stood at £1.27bn. in the second quarter of this year and 3 per cent. below the same period of last year.

Private commercial building output was also down, by 1 per cent. from the preceding three months and by 18 per cent. from the same period of last year.

The Department calculates that repair and maintenance work carried out by the construction industry was, during the third quarter, 4 per cent. down on the previous three months and 5 per cent. below the output level achieved in July-September of last year.

In constant price terms, however, the industry's output showed a continuing fall, which is expected to extend throughout 1977, particularly in the wake of yesterday's measures.

According to the Department, construction output in the public non-housing sector was down by 1 per cent. from the previous three months period and 7 per cent. last year.

Worst month for building societies since 1974

By MICHAEL CASSELL, BUILDING CORRESPONDENT

THE INCREASE in consumer spending in advance of yesterday's mini-budget helped to make last month the worst for building society receipts since the beginning of 1974.

Figures released yesterday by the Building Societies Association confirmed that the movement is experiencing its most difficult period for three years.

At the start of this year, societies had net receipts nudging £400m., but last month the figure slumped to only £23m.

The Association believes that about £50m. of November withdrawals can be attributed to spending in advance of yesterday's economic package.

This month is likely to show an overall net outflow of funds. The Association's Council is due to meet in January to decide whether building society interest rates, which rose to record levels in November, should be increased again.

Much will depend on the effect of the Chancellor's measures on interest rates generally. Opinion within the movement seems divided between those who feel that higher rates are

their £6bn. advance figure for 1987 as a whole, despite their recent failure to attract funds.

The volume of advances can be expected to fall substantially from next month onward.

Last month, a further £460m.

was committed to mortgage applicants, the lowest monthly total since the beginning of the year and an indication of the likely trend of advances next year.

At the end of the month, societies were committed to lend £1.21bn.

Commenting on the November figures, Mr. Norman Griggs, secretary general of the Association, said: "It remains to be seen how the present high interest rates offered by competitive institutions will be affected by the Government's package."

An interesting feature is the continuing high level of money lent to home buyers during November, and also the money promised to them.

"This was made possible by societies drawing on the substantial funds they had put aside when money was plentiful."

Construction industry output down 4% in July-September

By MICHAEL CASSELL, BUILDING CORRESPONDENT

THE CONSTRUCTION industry's output in the three months to the end of September was 4 per cent. down in real terms on the previous quarter and 6 per cent. below the level of a year earlier.

Provisional figures issued yesterday by the Department of the Environment show that the current price value of construction work carried out by contractors between July and the end of September stood at £1.27bn. in the previous quarter.

In constant price terms, however, the industry's output showed a continuing fall, which is expected to extend throughout 1977, particularly in the wake of yesterday's measures.

According to the Department, construction output in the public non-housing sector was down by 1 per cent. from the previous three months period and 7 per cent. last year.

Premium bond sales booming

Financial Times Reporter

THERE WAS a boom in sales of premium bonds in October. Purchases for the five-week period are estimated at £17.7m. the highest total since April 1971, when the maximum holding was increased to £2,000. The boom started in the best net gain — £9.5m. — since March 1973.

But repayments of British Savings Bonds to investors of £6.4m. led to a net loss of £3.2m.

Overall national savings figures for the period made a gain, including net accrued interest, of £1.3m., the highest increase since March.

Total national savings receipts for the period are estimated at £17.5m., including interest, against repayments of £623.8m.

Refirement

Trustee Savings Banks' overall net gain of £30m. was the best in seven months. Deposits of £447.7m. in ordinary deposits exceeded withdrawals by £422.2m. by £25.5m. There was a net gain in special investments of £6.5m. with deposits of £90.5m.

National Savings bank ordinary accounts, however, showed a net loss, with deposits at £56.8m. against withdrawals at £58.6m.

Investigations by the Department of the Environment, the Nuclear Installations Inspectorate told him on Tuesday that over the last year round monitoring at Windscale had revealed detectable levels of tritium on the beach.

It is thought that the material, which is a by-product of reprocessing nuclear waste, could have come from the sea, still where a seepage of radioactive water was discovered recently.

This latest incident will come as a further embarrassment to British Nuclear Fuels at a time when it is seeking to extend the plant for the reprocessing of nuclear waste at Windscale to deal with material from abroad, including Japan.

It follows the controversy over the leak from the silo which was not made public until several months after it had occurred. Mr. Benn has now asked that all incidents should be reported to him immediately.

In his written answer, he said that the nuclear installations Inspectorate told him on Tuesday that over the last year round monitoring at Windscale had revealed detectable levels of tritium on the beach.

Investigations by the Nuclear Installations Inspectorate had not yet established the source of the tritium. But they could not rule out that it may have come from the silo, which was the probable source of the recent seepage of radioactive water.

Mr. Benn said: "I am advised that the tritium level on the beach is well below that permissible in drinking water and constitutes no hazard to employees or the general public."

He promised to report to the Commons when the source was found.

Plan for Fife plant draws more protests

Conservationists have joined protesters against the Shell/Boco proposal to set up a big petrochemical plant at Mossmorran in Fife. They said yesterday that it would make Fife "a dumping ground" for one of the dirtiest industries of the industrial world and ruin tourism in the area of Aberdour, where a jetty for tankers is planned.

Mr. Metrebian, an Armenian who came to Britain from Cyprus, started Brentford Nylons in 1959 with a capital of £75,000. He established it as one of the leading suppliers of sheets, pillowcases, and other bedding in the U.K.

The company had a turnover of £24m. in 1974 and at its peak reached total profits of about £1m.

Mr. Metrebian was taken seriously in last year with a stroke at a time when the company was building up production at a big new plant in the North of England and problems associated with the venture eventually led to the company being placed in the hands of the receiver and then sold to the Concorde group.

Mr. Metrebian, who remained in poor health, had been intending to start another company but more recently had put his Kensington home on the market for £1.6m. and had been planning a return to Cyprus.

THE JOBS COLUMN

Accountant dismayed · The case for graduates

BY MICHAEL DIXON, DAVID LOGDON, AND NEIL SCOTT

THE OTHER day David Logdon, senior partner of the ever hope to justify the sort of declining public image on the Nottingham University protests personal material to an ex-subsequent occupations, and perhaps less disturbing.

generosity offered from the public purse. After a career as a tax inspector, retiring at 60 or earlier by choice if you were to drop out of the promotion fast stream, your services would be easily sought by outside firms.

"In the outside world, where we have to cost-justify our existence, trainees are an expensive luxury which a contracting industrial and commercial client base cannot support unless these are employed as a sort of cheap labour."

"If you are not able to succeed in the competitive entry to the Civil Service, and cannot get into local authorities or nationalised industries, you should aim at a 'Top 10' firm of accountants. You probably have no chance in London unless you can compete with 21-year-olds with law degrees and professional qualifications obtained in their spare time. The soft option is to get in via one of their provincial offices in places like Bradford or Workington. These big firms have public sector audit work (or bankruptcy specialisation) and are thus best placed to survive at the standards we have come to accept."

"However, superb offices (many air-conditioned), short hours, long holidays and the best pension scheme in the world are open to tax inspectors as civil servants. Additionally, "In short, the bulk of the training schemes and accountancy profession is caught facilities are second to none, between an aggressive bureau-

cracy, spiteful legislature and careers advisory service at is unethical to transmit any further specific training for would be very different and devoted to careers education?

Even the universities the best endowed institutions where careers services are concerned, spend less than 1p in the pound of their annual revenue on this aspect of education.

The statistics have also provided evidence, neglected until recently, of other crucial trends. They include:

A decline in the proportion of graduates entering manufacturing industry from 14 per cent to only 8.

A rise in the proportion entering government service from 7 per cent to 14.

A decline in the proportion of mathematics and science graduates entering school-teaching from 15 per cent to 11.

Even though, as I have said, the statistical material is not itself complete, it can't be doubted that the evidence provides of trends such as these is significant beyond purely educational circles?

So whatever may be the view point of different individuals, it is clear that the statistics merit close continuous scrutiny. In my view, the Jobs Column is to be congratulated for discerning this and for provoking discussion on the topic, especially if it were to induce the University Grant Committee to publish statistics earlier than almost year in arrears.

Dons' pride

NEXT The Jobs Column returns to the universities' performance in the 1973 employment market, as reported and tabulated here last week. Judged by readers' response, much interest has been provoked by the table which showed that the percentages of the individual institutions' new graduates known to have taken more than temporary work in the United Kingdom ranged from 87 per cent down to only 22, and that the percentages whose later movements were "unknown" to their Alma Mater varied from less than 2 per cent to nearly 30.

The general tenor of the response so far is that the figures are definitely a cause for public concern. Some university dons, says one correspondent, seem to take a positive pride in declaring that they have no idea what happens to a lot of their students once they leave.

But Neil Scott, head of the week. But others believe that it

THE SUSPICION has been voiced that a high percentage of graduates recorded in the statistics as "destination unknown," means a lack of concern by the institution about the fate of its students. However, there is every possibility that in practice it may, indeed, indicate the reverse.

When university careers and appointments services collect the information on graduates' movements it comes, in most cases, directly from the individual concerned who agrees to its being passed on to the Universities Statistical Record.

But some news of what has happened to graduates comes from other sources, such as academic departments,

employers, family and friends, and how to treat this "indirect" information is a problem.

Some universities take the view that reliable indirect information should be included in the return to the Universities Statistical Record, which forms the basis of the statistics published in the Jobs Column last

To the lay observer this may seem surprisingly low. But as director of a university careers service, I do not think it can be true that only two out of every five U.K. graduates actually add their labour to the considerable element of sandwich courses in Dixon's ranking, which places in Dixon's ranking, which is largely only an indication of the nature of graduates' further training needs.

If the table were reconstructed to take account of these of different career structures factors, and of those graduates who went overseas and so were years. Could this be due to insufficient career preparation in schools? Are enough resources

Doubled

That 11 per cent of new university graduates are six months later still either seeking work or in temporary jobs, is an important statistic, particularly as the consequence is that not virtually all the graduates need employment market, the picture

is somewhat misleading. Are enough resources

ACCOUNTANCY APPOINTMENTS

CJA**RECRUITMENT CONSULTANTS**

35 New Broad Street, London EC2M 1NH

Tel: 01-588 3588 or 01-588 3576

Telex No. 887374

FINANCIAL MANAGEMENT INSURANCE BROKING**C. £7,000**

Our Client is one of the largest international Lloyds broking companies with one of the most dynamic growth records in the country. He currently wishes to strengthen his financial management by making the following appointments, both of which are located in London:

MANAGEMENT ACCOUNTANT

Your duties would include the review of accounting practices throughout the Group, monitoring trading results and performance of subsidiaries, regular reviews of the Group's financial performance on a consolidated basis and the preparation of consolidated accounts.

You will be aged between 28-35 and be a qualified Chartered Accountant. You will have experience of dealing with complex consolidations involving multi-national situations and will have experience of working in great detail and without supervision. In addition, you will have the ability to develop close working relationships with your peers in an entrepreneurial, City environment. Promotional prospects for the right man are exceptional.

SENIOR ACCOUNTANT

The duties of this position are twofold: first to investigate, on a continuous basis, the financial standing of the company's trading partners. In the second instance, you will be called upon to act as Chief Accountant and Financial Officer of a specialist company within the Group.

You will be aged between 25-35 and be a qualified Chartered Accountant. You will be familiar with the preparation of insurance company accounts and Department of Trade insurance regulations. You must have experience of investigation work and have top level analytical experience. In addition, you must have the ability to communicate with senior people not trained in financial disciplines and financial matters.

Your name will not go forward to our Client until you have had a full briefing on the job and have given your consent. Please send a summary covering employment history, achievements, current remuneration and age to:

Diana Maw,
Business Development
Consultants (International) Ltd.,
26 Dorset Street,
London W1M 3FU.

**Group Accountant****LONDON £7500**

A major international company with extensive investments in the United Kingdom requires a Group Accountant for its London headquarters. The successful applicant will head a small team at the group's London office reporting directly to the Financial Director. He or she will be responsible for monitoring, consolidating and reporting to North America on the financial information received regularly from the various UK locations. Applicants should be ideally aged 30-35 and have acquired several years experience preferably with an international company since qualification. Experience of consolidations and a good knowledge of UK taxation is essential. Knowledge of latest U.S. reporting requirements would also be a distinct advantage.

The salary will be £7,500 and a company car will be provided together with other attractive benefits. This is an exciting opportunity to join a rapidly expanding company which offers extremely good career prospects.

Please write in complete confidence giving full career details to:

Box A.5779, Financial Times,
10, Cannon Street, EC4P 4BY.

P.A. TO TAX PARTNER**LONDON — UP TO £10,000 P.A.**

The city office of a national firm of Chartered Accountants with international associations require a personal assistant for their tax partner. A thorough knowledge of taxation in particular personal taxation including capital transfer tax will be necessary.

A qualified chartered accountant would be preferred, but a number of years of taxation experience is as important as a qualification.

A salary of up to £10,000 p.a. will be paid and benefits include 4 weeks annual holiday.

Please apply with full curriculum vitae to:

Box A.5778, Financial Times, 10 Cannon Street, EC4P 4BY.

Cosmetic Accounting-Honestly!

Most industries like to believe that they have very special problems requiring a very special approach and experience. This belief is often not justified in the Finance areas, but the cosmetics industry, with its pressures and unpredictable speed of movement, can reasonably make the claim. We are working for a leading cosmetics company, based in the South of England, whose Finance Director covers an unusually wide range of functions and therefore depends upon high calibre support, to whom he can delegate responsibilities more often reserved for the top man. This applies to both the positions outlined below, so we are hoping for quality, rather than quantity, in our response. The opportunities for development in this very successful international operation are appropriately exciting.

Finance and Administration Manager**c £10000 plus car**

The right candidate will be a qualified accountant, probably late thirties, whose track record demonstrates both professional and industrial management talent. In addition to historical accounting responsibilities, the position also controls the Systems and D.P. function, so we will be looking for knowledge of computers and a breadth of experience in addition to the ability to enjoy a high pressure environment. Reference 631/TRW.

Fast Moving Consumer Goods Budgetary Controller**c £7500 plus car**

Here knowledge of the cosmetics industry is more important, although there are other industries with similar tendencies towards unpredictable market changes, often occurring at hectic speed. Candidates should be in their thirties, appropriately qualified and experienced, and their work pattern should ideally have been oriented towards sales and marketing budgets. Again, we will be looking for management skills as well as professional ability. Reference 631/TRW.

Applications, which may be from male or female candidates, will be treated in complete confidence, and should be sent, with full career details and quoting the appropriate reference, to Terry Ward.

BROOKSTREET EXECUTIVE RESOURCES LIMITED

47 Davies Street, London W1Y 2LN. Telephone 01-499 7382.

ACCOUNTANT MERCHANT BANKING**S. G. Warburg & Co. Ltd.**

S. G. Warburg & Co. Ltd. wishes to engage a young Chartered Accountant or Chartered Secretary (age 26-29) for a position which will lead to appointment as Assistant Secretary.

The candidate should have had as wide a general experience as possible and preference will be given to those with knowledge of Secretarial affairs in a Financial Company.

The work will involve the full range of statutory requirements as well as observance of the demands of other Regulatory Organisations. A large number of companies are administered. There will be frequent contact with senior members of the firm and there is ample opportunity for career development for a person of the right calibre.

Attractive salary depending on qualifications with a range of excellent staff benefits.

Applications, enclosing a concise curriculum vitae, should be sent in confidence to:

G. E. Wood, S. G. Warburg & Co. Ltd.,
30 Gresham Street, London EC2P 2EB.

International Appointments

INTERNATIONAL BANK REPRESENTATIVES

London

PUBLISHING EXECUTIVE

London

GROUP FINANCE MANAGER

Nairobi

COMPANY ACCOUNTANTS

Dar es Salaam

Details of these vacant will appear in tomorrow's International Appointments.

ASSISTANT TREASURER

International Company

Re-organisation has resulted in a vacancy occurring for a young executive to join the European Treasury Department of Avis Rent a Car based at Bracknell, Berks.

The work will initially be concerned with the funding and financial management of the European subsidiaries of Avis. There will also be opportunities to participate in special studies and projects offering considerable scope for initiative and original thoughts.

The executive appointed will be expected to be able to work without close supervision, make an early contribution to financial policy and be ready to accept a significant increase in responsibility in a comparatively short term. Success in this appointment could lead to interesting career prospects.

The appointment calls for a working knowledge of the money markets and a general understanding of corporate finance. Ideally candidates should be qualified accountants who have experience in banking or the treasury department of a large company. A European background and languages would be particularly useful. Terms and conditions for this appointment are attractive and include a Company Car.

Applications should be made in writing to George Brown, Personnel Administration Manager, Avis Rent a Car, Trident House, Station Road, Hayes, Middlesex.

MEAT MARKETING CHIEF EXECUTIVE LONDON APPOINTMENT

Associated New Zealand Farmers Limited is a meat marketing company formed with an equal shareholding by the three major New Zealand farmer-owned freezing companies—Auckland Farmers' Freezing Co-operative Ltd., Hawke's Bay Farmers Meat Co. Ltd. and Alliance Freezing Co. (Southland) Ltd.

The company now holds a majority interest in Associated New Zealand Farmers (U.K.) Ltd., which owns two well known meat companies—Michie & White Ltd. and Fred Curzon & Son Ltd., including a Smithfield stall.

The appointee will probably be a marketing person with considerable proven administrative experience.

This is a highly responsible position and the successful applicant will be a skilled negotiator, have a proven initiative and be capable of interpreting and carrying out marketing strategy and company policy.

Ability to quickly interpret and report on all aspects relating to the meat trade, such as market trends, political decisions and so on, is a vital part of this position.

Experience in the meat industry would be an advantage but it is acknowledged that suitable applicants could well come from other business sectors.

The age group preferred would be 35-45 years.

Salary and all benefits will be commensurate with the demands made by this important position.

Applications giving a full account of business experience and qualifications, present position, responsibilities, copies of references, plus details of age, marital status, personal interests should be sent to:

"Meat Executive"
C/o J. C. Belcher, Box 6042, Auckland, New Zealand.

All applications will be acknowledged and treated in strictest confidence.

BANK EXECUTIVES

International bank is seeking senior banking executives to assist with the setting-up of its Edinburgh branch and the subsequent development of its business in Scotland. Applications from those with extensive international banking experience should be forwarded to Mr. N. A. M. Mackay, Box 264, Biggar, Balliol and Gifford, 3 Glenfrias Street, Edinburgh EH3 6YY.

FINANCIAL PRINTING SALES EXECUTIVES

The Oyez Press Limited is the Printing Subsidiary of the successful Solicitors' Law Stationery Society Ltd.

We are well established and expanding in City and Financial Printing, specialising in corporate finance documents and reports and accounts. Our factory is situated just South of Tower Bridge. The premises are modern providing excellent working conditions and parking facilities.

We need three Sales Executives, responsible to the City and Financial Sales Manager, to join a professional team to sell our fast reliable service. An exceptional candidate may be given the opportunity to head a section.

Experience in City and Financial Printing would be ideal, but other suitable applicants will be considered provided they possess personal qualities of energy, enthusiasm, intelligence and resilience.

We offer good basic salaries, commission, expenses, 4 weeks holiday, company car, pension scheme and free life assurance.

Write briefly, one page only, in confidence to:

OYEZ

A subsidiary of The Solicitors' Law Stationery Society Ltd.

FINANCIAL CONTROLLER

Location: Nairobi, Kenya. Salary: c. £10,000 plus housing and attractive fringe benefits.

A major international, London based, Lloyds broking company seeks a Financial Controller/Director Designate to manage the financial affairs of its substantial operations in Kenya.

The successful candidate will be responsible for all aspects of financial planning and control, including the co-ordination of financial budgeting and, in particular, cash flow management and credit control procedures. He will also be responsible for developing existing management information systems and improving management control.

You should be aged between 30-45 and be an A.C.A./F.C.A. or equivalent. You should have a minimum of 5 years' experience in a senior financial role outside the profession. Previous experience in the insurance industry is not obligatory but would be an advantage. You must be able to show evidence that you have controlled a substantial cash flow and are capable of revitalising systems.

Your name will not go forward to our Client until you have had a full briefing on the job and have given your consent.

Please send a summary covering employment history, achievements, current remuneration and age to:

GENERAL APPOINTMENTS

More Opportunities at Guinness Mahon

As an international merchant bank, a member of the Accepting Houses Committee, and part of the Guinness Peat Group with worldwide trading and financial interests, Guinness Mahon can offer challenging career opportunities to people of ability and flair. Due to expansion, they now require these new posts to be filled:

Corporate Finance Director

To join a small but growing Corporate Finance Department. Applicants should be aged 33-38, with proven corporate finance experience or, possibly, professional qualifications in accountancy or law.

Corporate Finance Executive

Aged 23-28, who has experience of Corporate Finance work in a merchant bank, preferably in the international banking field, or who is a qualified accountant or solicitor in private practice.

Banking Executives

Aged 23-28, with some practical experience in international banking. A university degree would be an additional advantage.

Considerable scope is offered for individual career development, and in all cases a highly competitive salary is negotiable, plus the expected substantial fringe benefits.

Applicants should write (enclosing a résumé of experience and qualifications) to David Ewart for the Corporate Finance appointments, to Bruce Urrell for the Banking appointments at: Guinness Mahon & Co. Ltd., 32 St. Mary-at-Hill, London EC3R 8DH.

Qualified Accountants Qualified Bankers

International Banking

We are a major International Bank, long established in London. Recent expansion in the U.K. and Europe has necessitated increased manpower requirements in our London based Internal Audit team.

Rewarding posts at senior and semi-senior levels are available in a highly professional systems oriented environment. Well qualified Accountants and Bankers seeking a progressive career involving some travel to major European cities are needed to fill these positions. Applications are invited from candidates aged 30 or under, preferably with practical or audit experience of International

Banking. Knowledge of a European language would be an added advantage, as would experience in Data Processing.

An excellent salary will be offered to the successful applicants with attractive and generous fringe benefits normally associated with a first class banking institution.

Applications, which will be treated in complete confidence, should contain a full and detailed curriculum vitae with a passport sized photograph and be addressed to: Box No. A.3761, Financial Times, 10, Cannon Street, EC4P 4BY.

INVESTMENT MANAGER

Small but rapidly growing trust management company is seeking to expand investment department.

The job will involve all aspects of fund management, including analysis and dealing, and will be varied, demanding and challenging. Applicants should have good knowledge of all markets worldwide, particularly U.S.A.

Ideally aged 25-32, with experience in investment management.

Salary negotiable.

Replies in confidence to: Mrs. C. Carter, Chieftain Trust Managers Ltd., 30/31 Queen Street, London EC4R 1BR. Tel: 01-248 1155/6.

CHEFTAIN TRUST MANAGERS LIMITED

International Bank

requires for the expansion of its London Branch operations.

Departmental Head of Forex and Euro-Deposit Settlement
for all aspects of administration for expanding dealing operations. At least three-four years' experience in similar capacity is expected.

Senior Credit Analyst
Several years' experience in company analysis, drafting of loan agreements, credit reporting for both sterling and Euro-currencies is required.

Senior Clerk Loan Administration
experience in all aspects of sterling and Euro-currency loans, related statistics and returns.

Senior Clerk Documentary Business
with thorough knowledge and experience of all aspects of international documentary business, guarantees, etc.

Knowledge of German would be an advantage. Successful candidates would at times encounter pressure resulting from increasing business volume but would find close team work co-operation, above average salary and pleasant working climate.

Applications with details of personal and working background are invited under Box F.485, Financial Times, 10, Cannon Street, EC4P 4BY.

EDUCATIONAL

ALDENHAM SCHOOL Elstree, Herts. WD6 3AJ. MUSIC AWARDS 1977

Scholarships and Exhibitions, which range in value up to two-thirds of school fees, will be offered in May 1977. Musical tuition is free. Special consideration is given to promote young string players and to the musical experience of Cathedral choristers.

The Director of Music, Alan Venning, will be pleased to see prospective candidates. Further details and entry forms may be obtained from: The Headmaster, Tel: Radlett 6131 (STD code 09276).

COMPANY NOTICES

CANADIAN PACIFIC LIMITED (Incorporated in Canada)

DIVIDEND NOTICE
At a Meeting of the Board of Directors held today, the following dividends were declared:

ORDINARY CAPITAL STOCK

A final dividend of forty-six point five cents (46.5 cents) per share on the outstanding common stock, valuing C\$100 million, for the year 1976, of which twenty-three point five cents (23.5 cents) per share will be paid in Canadian funds, and the remainder in Canadian Pacific Investments Limited, payable in Canadian funds on January 10, 1977, and record date January 10, 1977, close of business on December 29, 1976.

73% CUMULATIVE REDEMABLE PREFERRED STOCK

A dividend of thirty-five point two cents (35.2 cents) per share on the outstanding preferred stock, valuing C\$100 million, for the year 1976, payable on January 10, 1977, record date January 10, 1977, close of business on December 29, 1976.

By Order of the Board,
Montreal, December 13, 1976.

THE myth that advertising has been up prices is exploded in two years have come in publishing, financial and Government analysis of advertising/sales ratios conducted by David under J. Walter Thompson on behalf of The Advertising Association and published in the booklet "Advertising expenditure 1960-1975". It shows at in 1975 advertising as a percentage to sales had an average fallen by 20 per cent since 1973, and 10 per cent since 1974.

Another surprise is that it has not only been the MCA category advertising from the private sector directed at consumers), which has done badly, but also the rest of advertising which is believed to be on a strong growth trend. In fact both the CA categories and the remainder in 1975, show the best ratios overall since records began in 1969, and the fall in both categories since 1973 is virtually identical.

The only sector to show any increase at all on 1973 figures, as retail advertising which increased its A/S ratio from 0.55 to 0.57 per cent. Although this is no means a large increase, it looks good in comparison with the disasters shown in most other sectors.

Housewives not keen on price cuts

BY OUR MARKETING EDITOR

ALTHOUGH housewives might economy packs — perhaps their not believe it, this has been the year of the price cut. Estimates on companies below-the-line promotional expenditure in 1976 — leaving out the incalculable millions spent on bonus deals with big retailers — show that price reductions rose by almost £20m. to account for a half of all promotional expenditure. Advertising the special offers was the other big cost area.³

The figures are produced by Harris International and although necessarily estimates, they are probably the best available. Rather ironically, the figures come from a source which regularly campaigns against price promotions.

Harris International justifies its attitude by quoting recent inter-viewing in Britain according to its latest survey less than a half of those quizzed regarded price reductions as "genuine," a decline on the previous report.

Another finding from interviewing housewives leaving supermarkets was that fewer than a half can name even one of the 20 or so products on promotion at any one time. Although shoppers bought special offers (it is hard to avoid doing so) the Harris International view is that constantly changing prices unsettle them.

They prefer more obvious bar-

gain promotions like coupons — a half of housewives now claim to redeem coupons as against a third in early 1975; extra quantity packs; and banded packs. Younger ABC1 housewives in the south east seem to be moving against the large

low prices and no frills.

Asda is the classic example, but Kwik-Save has done equally well, and other retailers are now experimenting in offering the basic grocery lines at the cheapest possible prices.

Fine Fare's Shoppers Paradise conversions of less successful stores to discount operation is working nicely, and more recently, William Low, the Scottish supermarket chain decided to offer 100 lines at permanently low prices.

Clearly, these figures are bad news for the advertising industry. Can we be a little more cheerful about prospects for 1976? Some slight improvement is to be expected, particularly in the MCA sides, probably A/S ratios will be back to about the 1974 levels. But 1974 was the worst year on record, with the exception of 1975, so this scarcely means that happy days are here again.

Food still accounts for 64 per cent of all the coupons offered but there is a broadening out in such markets as confectionery, tobacco and drinks. This will bring more retail groups face-to-face with coupons. In the past retailer's resistance slowed down expansion but now coupons are prepared with more consideration for the retailers handling problems, and the handling allowance has risen from 19.6p a 1,000 in 1973 to 27.1p this year.

The Researcher gives the likely redemption rates for coupons appearing in the various media. Coupons in newspapers usually have a 1 to 4 per cent redemption rate, and the same for magazines. In Shopping magazine the range grows from 5 to 8 per cent. Door-to-door distribution lifts it to 10-20 per cent, and is particularly good on new product couponing, while on pack tops the lot with 15-25 per cent return.

LAST Friday J. Walter Thompson polled 745 of its employees on whether they wanted to belong to a union. There were 308 votes from 608, of whom 30 wanted the unions in and 547 were against. Only 15 people actually named a union they would like to belong to, and significantly there were no votes for SLADE, which is trying to recruit new members from advertising agencies.

CASTROL has returned to Dorlands. The oil company was there for 40 years before it moved to Bates in 1971. Now Dorlands, which has had a very good year, has won back the £1m. advertising account.

This is not because the industrial salesman is any cheaper. It is that only in a fifth of the companies that replied did the average salary, plus commission, is between £3,000 and £5,000, with a car and other responsibility for the sales force.

Selling in the industrial area is him an overall annual cost to his discipline apart, with the sales manager reporting either to a sales director or to the managing director. There could be room for streamlining here. Perhaps the marketing director is investigating how much it costs to getting alternative forms of selling.

Another interesting discovery is that almost two-thirds of overseas sales negotiations (outside of English-speaking countries) were concluded in English.

The survey is only a start, but it is remarkable that in an area like marketing, which attracts a plethora of books and articles, this should claim to be the first which actually attempts to produce some realistic statistics on what actually happens.

Studying the wines

Inertia in industrial selling

BY ANTONY THORNCROFT

ACUMEN, the market research firm, has just been working on one of its most nerve-wracking assignments — it has been asked to quiz London down-and-outs on their drinking habits. Apparently they are such an important sector of the market that one leading drink company is probing into their favourite suicide sticks. Drink has become Acumen's jam if not its bread and butter and over a fifth of its turnover now derives from studies in this market, usually for overseas companies. Its wine and spirits division has now statistical information on 21 countries from the U.K. to Argentina, based on the basis of the data Acumen carries out feasibility studies for clients. For example, when looking for a new market for a wine, it decided on France, which for all its own product is generally ignorant about wine, and very susceptible to well advertised and positioned new brands.

Among recent nuggets of information published is the fact that sparkling wine production in the USSR is 160m. bottles, of which around 10 per cent, is produced by the Champagne process, and that port shipments in the first half of 1975 reflected well, with France taking 43 per cent more, while both the U.K. and Germany imported less. French Champagne sales this year are also well up, by 15.5m. bottles in the first six months to 58.5m. France consumed 43.5m. bottles and there was a big fall to Italy with 2.5m. bottles, and the U.K.'s 3.2m., which is double the early 1975 intake, but less than imports in the first half of 1974. The Ivory Coast drinks twice as much Champagne as Denmark and NATO Forces outside Sweden.

The basic reports suggest that the U.S. is drinking less whisky, while the 1975 intake at 238.5m. gallons is the third successive fall. Imported whisky has grown, however, with Canadian almost catching up Scotch. Most whisky drunk in the U.S. is home-made. A link between two worlds

by Dominick J. Coyle

TURKEY RIGHT now is in something of a holding pattern, waiting for the inauguration of President Carter to see if he will "persuade" the U.S. Congress to approve finally a new bilateral defence agreement; waiting for Britain to assume next month the Presidency of the EEC in the hope that London may give new impetus to overdue negotiations for a "re-structuring" of Turkey's association agreement with the Community; waiting for the general election, scheduled for next October, to see whether either the Justice Party or the Republican Peoples Party can secure overall majority in the national assembly and (hopefully) use it for purposeful government to advance a declared economic and social programme instead of the present pattern of drift and compromise, an inevitable process, perhaps, even the nature of the existing ruling coalition.

The coalition is headed by the P leader, Mr. Suleyman Demirel, an experienced politician with an impressive survival record which has used repeatedly and well since 1965, when he first became Prime Minister. He who professes to believe in following serious university training and street killings in 1971, the EEC as a "club of the military, still the most potent force in Turkey and one almost far removed from the centre of political power—albeit exercised generally on an arms length basis. Yet Demirel managed to make a comeback early last year (with the benign blessing of the army) when he jolted together an unlikely two other small parties making up the ruling coalition, and the surprise resignation of RPP leader Mr. Bulent Ecevit, in Prime Minister status, there is the former army colonel,

of Cyprus. The Prime Minister's main achievement since National Action Party is, on any assessment, extremely Right-wing, and Professor Turhan Feyzioğlu, the distinguished intellectual, who heads the Republican Reliance Party. He leans instinctively in the direction of the opposition, RPP (Feyzioğlu and Ecevit are personal friends who entered politics together in 1957), but believes that it is coming increasingly under the influence of a Marxist faction, a charge which for the record Ecevit himself dismisses as nonsense. Feyzioğlu may even lead his handful of deputies directly into the JP before the next general election.

As a political mix in Government, the present Demirel administration is something of a phenomenon, as indeed in a way is the country itself. Turkey is vast—roughly one-tenth the size of the continental U.S.—is both European and Asian, non-Arab but Islamic. It has among the highest population growth rates in the world (an annual average of 1 per cent) which is a faltering and politically controversial family planning programme is doing little to erode. The Turkish population in 1937 was under 14m., it had doubled by 1960, is now above 40m. and

on present trends could be 70m. privileged and often illiterate out of Istanbul is already such masters that NATO is a mutual alliance endorsed wholeheartedly by the vast majority of the Turkish people—and certainly by the Turkish armed forces—and that the population's commitment to it can only be put at risk "if we are over Cyprus, merely because in 1974 we exercised a perfectly legitimate right in international law under the Zurich and London agreements." As they now tell it, Turkey intervened from these barriers, or indeed as a guarantor power to re-establish the status quo in a strategically-important Mediterranean island only 40 miles off Turkey's southern coast in the face of an attempt by the (then) Greek Junta to annex Cyprus to Greece.

Turkey's failure—or more correctly the failure of the Nine—to reach agreement on a restructuring of Ankara's association agreement with the EEC ("we committed publicly our faith in, and commitment to, Europe as far back as 1964 in the pre-association agreement") is another cause of resentment. "Our relations just now with the Community could not be worse," Mr. Ihsan Sabri Caglayangil, the Foreign Minister, told the Financial Times in Ankara earlier this month, and he suggested that political as well as economic consequences could result. Turkey has, in fact, seen the value of its own concessions for agricultural exports to the government of Archbishop Makarios. But the resultant U.S. arms embargo (since lifted) and the under direct pressure by President Ford) and the continuing ministerial association council

CONTINUED ON NEXT PAGE

TURKEY

Turkey is a vast country with one of the highest population growth rates in the world; it is both European and Asian, and Islamic but non-Arab. Its dilemma is summed up in its desire to join the EEC, based more on foreign policy than on domestic economic considerations.

Partner

The JP is essentially a right-of-centre party, supported strongly in the vast rural areas and favouring generally a private enterprise approach to economic development. Its principal coalition partner is the staunchly pro-Islamic but broadly left-leaning National Salvation Party headed by the colourful and enigmatic Professor Necmettin Erbakan (and since 1965, when he first became Prime Minister, economic self-sufficiency for Turkey and sees, incidentally, that he was forced out of office by the military, still the most potent force in Turkey and one almost far removed from the centre of political power—albeit exercised generally on an arms length basis. Yet Demirel managed to make a comeback early last year (with the benign blessing of the army) when he jolted together an unlikely two other small parties making up the ruling coalition, and the surprise resignation of RPP leader Mr. Bulent Ecevit, in Prime Minister status, there is the former army colonel,

of Cyprus. The Prime Minister's main achievement since National Action Party is, on any assessment, extremely Right-wing, and Professor Turhan Feyzioğlu, the distinguished intellectual, who heads the Republican Reliance Party. He leans instinctively in the direction of the opposition, RPP (Feyzioğlu and Ecevit are personal friends who entered politics together in 1957), but believes that it is coming increasingly under the influence of a Marxist faction, a charge which for the record Ecevit himself dismisses as nonsense. Feyzioğlu may even lead his handful of deputies directly into the JP before the next general election.

As a political mix in Government, the present Demirel administration is something of a phenomenon, as indeed in a way is the country itself. Turkey is vast—roughly one-tenth the size of the continental U.S.—is both European and Asian, non-Arab but Islamic. It has among the highest population growth rates in the world (an annual average of 1 per cent) which is a faltering and politically controversial family planning programme is doing little to erode. The Turkish population in 1937 was under 14m., it had doubled by 1960, is now above 40m. and

on present trends could be 70m. privileged and often illiterate out of Istanbul is already such masters that NATO is a mutual alliance endorsed wholeheartedly by the vast majority of the Turkish people—and certainly by the Turkish armed forces—and that the population's commitment to it can only be put at risk "if we are over Cyprus, merely because in 1974 we exercised a perfectly legitimate right in international law under the Zurich and London agreements." As they now tell it, Turkey intervened from these barriers, or indeed as a guarantor power to re-establish the status quo in a strategically-important Mediterranean island only 40 miles off Turkey's southern coast in the face of an attempt by the (then) Greek Junta to annex Cyprus to Greece.

Turkey's failure—or more correctly the failure of the Nine—to reach agreement on a restructuring of Ankara's association agreement with the EEC ("we committed publicly our faith in, and commitment to, Europe as far back as 1964 in the pre-association agreement") is another cause of resentment. "Our relations just now with the Community could not be worse," Mr. Ihsan Sabri Caglayangil, the Foreign Minister, told the Financial Times in Ankara earlier this month, and he suggested that political as well as economic consequences could result. Turkey has, in fact, seen the value of its own concessions for agricultural exports to the government of Archbishop Makarios. But the resultant U.S. arms embargo (since lifted) and the under direct pressure by President Ford) and the continuing ministerial association council

failure of the U.S. Congress to approve the subsequently negotiated bilateral defence agreement do contain the seeds of a growing feeling in Turkey "that the West does not really want us." This is right now coupled with the wholly unsubstantiated assumption by most Turks that President-elect Carter is strongly pro-Greek, an assumption regularly voiced by the Turkish Press which, perhaps, has failed to distinguish between American presidential electioneering (after all, an estimated 4m. Greeks live in the U.S., against perhaps no more than 70,000 Turks) and the determining of foreign policy both in the direct interest of the U.S. and of the Western Alliance as a whole.

How would you sum up the Koc management team?

Blue chips off the old block

Earlier this year, the Koc Group in Turkey (pronounce it scotch without the s) celebrated its first 50 years.

It is the nation's largest private business. The founder is still chairman, and the group of companies he has developed stands comparison with any Blue Chip in the world. But he didn't do it all alone.

No group gets to the over-\$850 million in consolidated assets unless it has first-class management in depth. The "old man", Vehbi Koc, started with nothing in an economically backward nation, and he built his management structure as soundly as his corporate structure.

Internationally-minded

Today's Executive Committee are blue chips off the old block. The founder trained them to be internationally-minded and to think big. Some of the 56 companies in the group are purely domestic, but others have links with names such as Ford, Fiat, General Electric, Siemens, Uniroyal, Burroughs, Thyssen Edelstahlwerke, Hitachi, Honda, etc. These links bring the very latest technological know-how to Turkey.

The best management attracts the best managers

Each company is run by a general manager who is free to act within the policy guidelines set forth by Koc Holding A.S.

the parent company. His compensation is linked to the profits of his company. Managers and employees own 12% of the shares of Koç Holding. The Pension Fund owns another 2%. That's why the best managers strive to get into the Koç Group. The right man gets the right job. A management trainee who is able to make the grade rarely leaves.

Control is vested in the seven-man Executive Committee. Each of the three operating divisions (automotive, industrial and marketing) is run by a man who climbed to the top the hard way. Each was a pioneer in his respective field.

What 'Fortune' says about Turkey

FORTUNE Magazine lists Turkey as the fourth fastest-growing economy in the democratic world over the period 1970-75...second among those without the benefit of oil exports. GNP grew by 8% in real terms last year, and is expected to grow this year by another 8%. Turkey is a strong mixed economy.

The Koç Group itself also has an impressive record of continuous growth. Over the past ten years we have grown at an annual compound rate of 24%. And all through conservative financial management. Like any Blue Chip.

Planned growth and cost control

Managers in the field get every assistance from the parent company in order to achieve optimum results. In this they are supported by, among others, our Research and Development Division.

Our Long Range Planning Division is organised to ensure that each individual manager makes the right new investment and introduces the right new products. Targets are yearly updated within each 5-year plan, because promotions are at stake as well as profits... Investment targets create jobs for the ever-increasing working force.

But, internal auditing is tough and the cost control system highly efficient.

The Koç Group in Turkey

- The nation's largest private business

- 50 years old

- 56 companies

- Total consolidated assets at June 30, 1976:

- \$850 million

- 1975 turnover: \$1.25 billion

If you would like to check our debt to equity ratio please ask for our 1975 Annual Report in English, by writing to Mr. Erol K. Aksoy, Vice-President, International Finance, Koç Holding A.S., Istanbul-Turkey.

RELATING PERFORMANCE TO plans, the Turkish economy has, broadly speaking, developed well, and practically on target in recent years. GNP growth in real terms has averaged some 7 per cent since 1963, when the concept of planning came into force. In the six years since 1970, taking into account provisional estimates for the current year, the growth rate overall has come out at 7.3 per cent, while the rise in manufacturing industry specifically has been an average of 8.5 per cent. The former is an improvement on the planners' forecast, the latter some 1.5 per cent below target.

Taken as a whole, this performance has encouraged economists in the State Planning Organisation in the accuracy of their projections through to 1995 when, on the basis of present assumptions, Turkey should be a full member of the EEC.

The growth rate of GNP over the 15 years from 1972 to 1987 is estimated at 8.6 per cent, and at 9.6 per cent for the 1987-1995 period, while average growth rate is estimated at 8.9 per cent for the full 23 year period. These targets exceed those planned during the 1970's for other developing economies in Europe, which means that the gap between the Turkish and the later economies will narrow."

Discounting for the moment Turkey's present conflict with the EEC (see elsewhere in this survey), the objective of achieving full Community membership by the mid-1990's remains a cornerstone of Government economic policy, and it is an objective also endorsed by the opposition RPP. True, there are reservations in the private industrial sector, in the sense of some questioning (mostly in private) whether the country's relatively infant economy can be developed sufficiently and in time to withstand full European competition. Yet it is accepted generally in Turkey that the primary motivation is political. There is no question in Ankara that Turkey must join the Community if only because Greece has applied for full EEC membership; and indeed the sole "political" observation right now concerns whether Greece inside the Community could not veto Turkey's full membership.

Impressive

But to return to the short-term position: Turkey's performance on external trading account in the first nine months of this year has been impressive, although the trend line does nothing to disturb the general pattern of a country with a chronic trade deficit. An exports boom in the early months of 1976, in one sense at least artificial, in that it reflected a one-off dispersal of some accumulated stocks, pushed the January-September total to \$1.5bn., or 50 per cent higher than in the corresponding period the previous year. Imports, on the other hand, rose by only 5 per cent in the nine months to \$3.7bn., although this reflected a delay (more politically inspired than the result of an over-staffed and cumbersome bureaucracy) in the granting of licences rather than any underlying reduction in demand. The outcome, none the less, has been

Economic performance is matching its planned targets, and achieving full membership of the EEC by the mid-1990s remains a cornerstone of Government policy.

a 13 per cent reduction in the either raw materials or investment crude trade deficit to \$2.2bn., suggesting that the deficit for last year amounted to only 3.2 per cent of total imports, and remains true in 1975, perhaps even further in 1976.

Such a final outcome (figures inevitably run well behind events) would be in line with official projections for the fourth year of the third five-year plan (1973-77). The January figure this year, with an inflation rate put at 15 per cent, was \$300m. (compared with officially at around 15 per cent, \$360m. last year) and the total for 1976 is likely to reach \$1.8bn., closer to 20 per cent, than to 15 per cent, representing more than a fifth of total imports. Yet for all that deal football as Turkey prepares to meet roughly one-third of its petroleum needs from domestic resources—further discoveries would seem to be more likely in the eastern provinces—and the Central Bank calculated earlier this month that total remittances this year would be some \$160m. lower at \$1.15bn.

This suggests, after allowing for other small items on the invisibles side, that the current deficit this year should be of the order of \$1.5bn.

Given some recent foreign borrowings, investments abroad and international aid

WORKER REMITTANCES \$m.

1976*	1,150
Central Bank estimate	

facilities, Turkey would appear to require borrowings of about \$1bn. or thereabouts in 1976, less any run down in the reserves (\$1bn. at end-August) to balance her payments. This is by no means an impossible task, not least because of the sizeable inflows throughout the year to the valuable if volatile Turkish lira convertible accounts.

But the payments problem is not just for 1976, and Turkey's debt commitments continue to rise. The country's total foreign debt, excluding the convertible accounts, stood at just over \$3bn. in March of this year, and the annual servicing cost is rising as the grace period of many long-term debts runs out. On average, debt repayment (principal and interest) will be some \$300m. over the next decade or so. In passing, however, it is only fair to record that among developing countries, Turkey's debt obligations are relatively low, both on a per capita basis and as a percentage of even her limited foreign exchange earnings.

Nonetheless, a combination of Turkey's almost perennial shortage of hard currencies and her rising foreign debt commitments must put a question mark over whether the country will not be obliged to cut back on the rate of growth of imports over the next few years, and thus threaten her expectations for a continuing high level of overall national growth. On present plans there is certainly little remaining room in which to manoeuvre on the imports side, since more than 95 per cent of all imports represents

Viewed in isolation and exclusively in the context of Turkey, or indeed of other countries at a broadly similar stage of development, these problems are not acute. But this country has committed itself to Europe, to free and open trade and competition before the end of the century; and in that context, a great deal remains to be achieved, and not only in tackling the unemployment situation. The entire social and economic infrastructure of the country must be expanded urgently to achieve even minimum European standards, not least in the fields of education (and its children do not now get even a primary school education), and health (almost half the country's population still live in poverty, and it is acknowledged openly in the third five-year plan that "sanitation, child nutrition, workers health and security standards are below the required norm.")

The next plan disconcerts some grandiose "political" projects which almost certainly will not be able to be financed anyway. It is likely to continue the emphasis on achieving principal economic goals—raising overall living standards, industrialisation, decreasing dependence on external resources, solving the problems of unemployment and improving the distribution of income. There is much to be done within the short time-scale, moderation has set itself.

TURKEY III

Political parties woo the voters

PARTY POLITICS, like much else in modern Turkey, stem from Ataturk. The Republican People's Party (RPP) was, in a real sense, his own creation, and it now forms the opposition in the National Assembly under the leadership of the former Prime Minister, Mr. Bulent Ecevit. The present Government of Mr. Suleyman Demirel is a four-party coalition headed by Mr. Demirel's Justice Party (JP), effectively the successor to the ill-fated Democrat Party of Mr. Adnan Menderes (he was executed in the aftermath of the 1960 military coup) formed by a breakaway faction of the RPP.

Of the three other coalition partners, both the National Salvation Party (NSP) and the Nationalist Movement (NMP) were set on course by, respectively, former members of the JP and the Democrat Party. Professor Turhan Feyzoglu's Republican Reliance Party (RRP) was born from an ideological split in the RPP. Professor Feyzoglu resigning because he claimed, socialist policies were being advocated by Mr. Ecevit while his predecessor, Mr. Ismet Inonu. Indeed, for a while it seemed as though the professor's forecast at that time—

"Once you make the party discriminate between bourgeois and proletarian, it will disintegrate" — would be borne out as the RPP saw its support in the country slide in three successive general elections.

Thus, all of Turkey's constitutional parties had their origins in the RPP, although this is merely an interesting historical footnote rather than of any real contemporary relevance, since there is little to link them to-day. Political

commentators are inclined to give (and readers seem to appreciate) a rough rule-of-thumb guidance) ideological "labels" likely to take place before them, who account for the RPP's system, of course, has its limitations, but with that proviso the RPP is generally social democrat with a small but vocal minority in Ankara give him not the most likely place for putting it. That, of course, is an exaggeration. Few, if indeed any, Turks are in Turkey, which is ruled alone. They are not even

professes at least to champion elections the JP did push its

Prime Minister Suleyman Demirel's four party coalition is likely to remain in power until the October, 1977, general election. What may happen after that is anybody's guess.

The cause of private enterprise, share of the vote from under the NSP, formed only four years ago, is led by Mr. Necmettin Erbakan, something of a religious fanatic. It captured almost 12 per cent of the popular vote in the 1973 general election on an openly pro-Islamic platform in a country whose laws unambiguously prohibit the exploitation of religious sentiment for political ends! The RPP is strongly anti-communist and to the right of centre: the NMP under the former army officer, Alparslan Turkes, is, to put it mildly, neo-Fascist.

That is Turkey's political mix to-day, with the additional and interesting fact that the leaders of the three parties which really count in electoral terms are all, relatively speaking, young men. Mr. Demirel, who first became Prime Minister in 1965, is 52, or just one year older than the RPP leader Mr. Ecevit, while Mr. Erbakan is 49. However, political wags in Ankara, while conceding that Ecevit and Erbakan do look their respective ages, consider that the Prime Minister "must be at least 60," adding as an intended after-thought that sitting around the Cabinet table with such a

TURKEY has the largest army in Europe and spends a higher percentage of its Gross National Product on defence than any other Nato ally. Of just over 5m men, the Atlantic Alliance has under arms, nearly one in ten is a Turk.

And this is indeed the nub of the present political situation. The comparable figure for the armed forces of the Warsaw Pact is 4.6m. It is therefore not surprising that Turkey, Turks and Feyzoglu and their respective supporters, "would be other Nato ally. Of just over 5m men, the Atlantic Alliance has under arms, nearly one in ten is a Turk."

Mr. Demirel's main concern is to survive until the next general election, which is scheduled to take place in October next year and is an aggregate of 480,000 Turkish officers and men. Nevertheless, if one takes the straits between the Black Sea and the Mediterranean, the Turkish contribution is important. One can see, for Syria, Iraq and Iran, as well as Turkey, which is the most likely place for a conflict to take place before them, who account for the RPP's system, of course, has its limitations, but with that proviso the RPP is generally social democrat with a small but vocal minority in Ankara give him not the most likely place for putting it. That, of course, is an exaggeration. Few, if indeed any, Turks are in Turkey, which is ruled alone. They are not even

professes at least to champion elections the JP did push its

party and, as with the case of the JP, it too advanced sharply in the last mid-term contest, raising its popular vote from 33 to 40 per cent.

Turkish mid-term elections are, of course, more than a good random sample, but on the last occasion only one in ten of the elected seats were at stake. October.

so the results are not necessarily

wholly reliable guide to electoral sentiment nationally.

TURKEY V

Suleyman Demirel

MR. SULEYMAN DEMIREL, the Turkish Prime Minister, is like an empire which has passed its zenith. In 1965, four years after his meteoric rise in politics, he had his pro-private enterprise Justice Party (JP) to a big victory at the polls, and then again in 1969. Two years later it was toppled by the army and in 1973 he suffered defeat at the elections. The JP relinquished its place as the country's biggest party to Mr. Bulent Ecevit's Republican People's Party (RPP). It is unlikely that the JP will come to power one day in the foreseeable future; one are the days of comfortable power for Mr. Demirel.

This is not because of any lack of acumen on his part. At 75 he is vastly energetic, assesses a phenomenal memory, is probably the best parliamentary manoeuvrer in Turkish history and certainly its greatest survivor.

His problem is that the right wing, which was almost solidly behind him in the sixties, is splintered.

Mr. Demirel's prospects of lifting the Right wing under his leadership are very slim. In the past 21 months the absent-born politician has been in charge of a four-party coalition which includes Mr. Erbakan's, Mr. Feyzoglu's anti-communist Republican Religious Party (RPP) and Mr. Arkes's Neo-Fascist National Action Party (NAP). All three men hold posts as Deputy Prime Ministers.

There has been more competition than co-operation in this coalition, the former gaining more impetus with the approach of the elections, and within the last two but never the hint of fusion at all. Well aware of this, Mr. that he has had enough.

Suleyman Demirel.

Vehbi Koc

AT THE age of 75 Mr. Vehbi Koc is the doyen of Turkish industrialists, actively at the helm of the Koc group of industries, the biggest in Turkey and among the 300 biggest companies in the world.

More than 50 years have elapsed since he dropped out of school of his own volition to open a grocery shop in Ankara, then a dusty little town 48 hours away from the nearest railway station and then a trading company. From trading Mr. Koc went on to assembly industry, establishing ties with many American and European companies.

Now he is entering banking and heavy industry through a process of backward integration. Mr. Koc's progress is a virtual mirror of that of the Republic which was first buyer with no industries, then a country of import substitute assembly industries, and which is now going through heavy industrialisation.

Mr. Koc's two new ventures include a plant under construction for casting automotive blocks and agricultural machinery components and \$100m. special steel plant, the construction of which will begin soon, and his personnel manager in charge of 26,000 employees are both in their mid-thirties.

Mr. Koc has recently acquired the control of Garanti Bankasi, said to be numbered among the top five privately owned banks in Turkey and is making plans to modernise and expand it, creating a cushion of cash funds for his 70 companies and ten affiliates.

The Left-wing has been tolling the bells of collapse for Mr. Demirel for many years and continues to do so, but this is mere wishful thinking. Nothing short of an absolute disaster at the polls or a monumental personal scandal is likely to remove him from politics. Mr. Demirel is a man who never gives up. He has spent almost half of his 15 years in politics as Prime Minister, growing visibly older with the approach of the elections, and within the last two but never the hint of fusion at all. Well aware of this, Mr. that he has had enough.

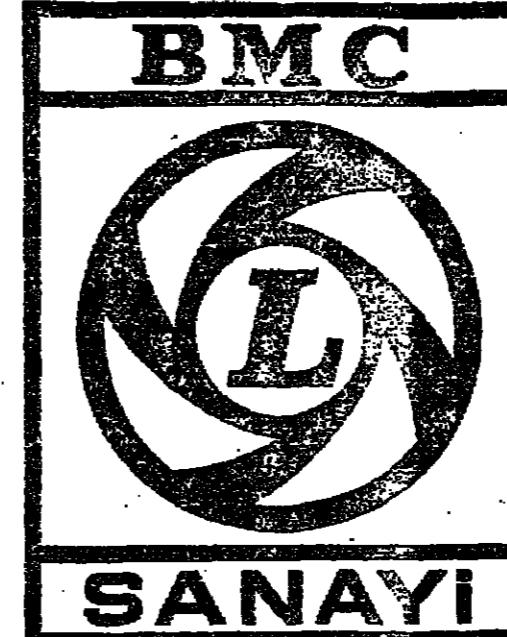

Vehbi Koc.

Although he speaks no foreign languages, he keeps himself well informed on world affairs and domestic political developments which he discusses with a remarkable insight.

One of Mr. Koc's most remarkable talents has been his ability to choose young and well-educated people and put them into very senior positions. His vice-president of finance for example, is 31-year-old Erol Aksay, a Harvard business graduate and a former Smith-Barney employee. The director of his special steel plant, the construction of which will begin soon, and his personnel manager in charge of 26,000 employees are both in their mid-thirties.

Mr. Koc still holds the reins tight and said in an interview that "I am going to work until I die, retirement would bore me." Company sources say that a gradual shift of power is taking place towards his only son 48-year-old Rahmi Koc, who is now his deputy. The sources say that the old guard will gradually withdraw and that Koc himself will move and more retreat into the position of an advising godfather for the empire he built from a handful of pounds, letting his son Rahmi take over.

The Koc name is almost a by-word for wealth and success in Turkey. The man leads a modest and frugal life with virtually no luxuries except the comfort of several houses and villas and a small chauffeur-driven car.

Like the Bridge across the Bosphorus BMC is linking Europe with Asia

BLMC's unrivalled experience in the manufacture of commercial vehicles is being brought directly to the benefit of the Turkish people.

Her plant in Izmir is producing the Austin and Morris range of light and heavy commercial vehicles, Leyland

agricultural tractors and Leyland diesel engines.

The only fully integrated commercial vehicle manufacturing plant in Turkey, it is helping to bridge the gap between Western European technology and the yet untapped potential of Turkey's economy.

Greece is the key to foreign policy

IT IS OUR basic policy to restore to Turkish-Greek relations the climate of friendship and trust of the 1930s and to turn the Aegean Sea into a lake of peace uniting the two countries."

Earlier this year Prime Minister Demirel finished with these words a long letter to Mr. Constantine Karamanlis, the Greek Premier, in which he called for a "step-by-step" approach to the resolution of outstanding problems between them, a quarrel between two strategically important Mediterranean countries which has resulted in Greece's withdrawal from NATO's integrated military structure and the closure to the Americans of important military intelligence gathering base facilities in Turkey. It is a serious dispute, both in bilateral terms, and in its consequences for the Western Alliance, whose eastern European flank is now easily exposed.

Turkish foreign policy, like that of all countries, is designed to advance her own national interest, but in a real sense its direction is being dictated by the "confrontation" with Greece. The implication of the Cyprus dispute is obvious, while the essentials of the eco-Turkish argument in the Aegean—over the extent of the continental shelf, problems relating to air space control and Greek "militarisation" of some islands, notably Rhodes and Kos—all pre-date the 1974 Turkish invasion of Cyprus, the tension has been heightened greatly as a direct result of it.

Similarly, the U.S. embargo on Turkey (now partially lifted) related directly in the at least minimal shutdown of American bases in Turkey, although it was tended primarily by Congress to persuade Ankara to negotiate "realistically" over Cyprus. A teen Turkey and the U.S. is ill awaiting Congressional approval, and there are suspicions (more popular than at official level) in Ankara that President Carter is "pro-Greek".

Again, while Turkey's current difficulties with the EEC are mainly to do with improved access for both agricultural produce and surplus Turkish relations.

On Cyprus, Mr. Caglayangil is much less optimistic, claiming that while the Karamanlis Government could be reasonably—there is nowadays a noticeable emphasis in the Turkish Foreign Ministry in Ankara on how "statesman-like" Mr. Karamanlis really is, that aircraft approaching one another could quite easily form up later for a concerted attack on, say, Izmir." Mutual suspicion is, after all, one of the few constants in Greek-Turkish relations.

Greece plays a major role in Turkish foreign policy, clouding a myriad other issues—but Turkey is making a big effort to resolve differences with its neighbour state.

the actual value of the financial advantages of the deal.

There is in Turkey a genuine failure to comprehend why Washington should withhold arms supplies to an enthusiastic NATO partner when she supplies military equipment to some 90 other countries, including Communist Yugoslavia.

Some diplomats in Ankara profess to detect a note of "blackmail," to the effect that Turkey might turn to the USSR if the U.S. Congress does not finally approve the defence agreement, but this is rejected out of hand by Mr. Caglayangil. "We are

a European country because

Ataturk set us on that course, we are in NATO because we believe in the Alliance, and we are committed to the EEC for similar reasons."

But he noted with perhaps just the gesture of a smile, you can delegate, say to your lawyer, your authority in some areas—buying a house is one—but not when you are going to be married, and certainly not control over your own defence!"

Ironically, Turkey is, in fact,

prepared to yield some of the captured territory, but only as part of a new all-round agreement in Cyprus providing for a new constitution, a weak central

bilateral government in Nicosia and, as is now de facto the case, the virtual total separation of the two Cypriot communities. But

there is a real conviction in Turkey, mirrored by a similar

TURKEY VIII

Road improvements badly needed

LAST MONTH'S earthquake in Van, Eastern Turkey, was most revealing of the inadequacy of the Turkish communications network, particularly roads.

Six of the 570 villages in the mountainous province could only be reached five days after the disaster and contact was eventually made with them by Army helicopters as there were no roads.

Van airport had to be equipped by the Americans with portable runway lights and ground to air communications before its use could be extended from the short daylight hours to 24 hours a day. The railway was unsuitable for emergency transport. Trains cover the 1,200 km between Ankara and Van in 30 hours and lorries take more than 20 hours. Reporters in the region said that it took them about three hours to travel from Muradiye to Caldiran, the two ruined towns, a distance of less than 100 kms.

The communications network elsewhere in Turkey is better but not sufficient for demand or up to European standards. Of Turkey's 770,000 sq kms, half is in parts as jammed as the narrow cobbled streets of Istanbul.

Mr. Erbakan, the Deputy Prime Minister, said: "The highway, railway and maritime communications, the airports and harbours, indeed all communications networks are very inadequate. We must build these quickly in order to meet future demand."

He announced that the government has plans to build or expand 16,000 km of roads (a length nearly equivalent to a third of all surfaced national and provincial roads), improve the railways network, build 37 airports (including 21 feeder lines) and construct or improve 60,000 rural settlements.

There is no doubt that all of this is badly needed and that in development plan which ends next year, having this role of a modern road thrust upon it for the and Iranian railway gauge.

Turkey is like a grown up man wearing the clothes of a boy. But a monumental amount of financing is required to implement this plan — the Italian company Societe Per Condotte Acque, which proposed to lead an international consortium to finance and build a road between Turkey's European and Iranian borders estimated the cost at \$5.5bn. — a sum more than twice the amount of planned exports for 1977 and twice the amount targeted to be spent on communications under the third five year de-

velopment plan which ends next year, having this role of a modern road thrust upon it for the and Iranian railway gauge.

In the last few years Turkey's communications problems have been insufficient for its own suffering from congestion and gained international importance needs let alone for those of selves and the Lebanon is of the question because of the war.

The Government, which spends an average \$60m. each year for road repair and maintenance claims that 70 per cent. of the damage is being inflicted by TIR juggernauts.

In order to make up for this loss and finance the expansion of new roads the Government this year imposed a series of new transit fees on international lorries.

Turkey is not pleased with the anger of Iran, which receives about 80 per cent. of the traffic travelling through Turkey. The Shah froze a \$1.2bn. loan for Turkey earmarked mainly for communications improvement projects.

Work is underway on a compromise settlement which will reduce the transit fee burden on Iran and give Turkey access to the loan.

It is clear that with concessions in Gulf ports and high import demands persisting Turkey will continue to be a major transit route. In fact there are no other short-term feasible alternatives. Whether conditions in the Soviet Union

Traffic waiting to cross the Bosphorus Bridge.

TRADE WITH TURKEY

Just as the Bosphorus Bridge is the successful LINK between Asia and Europe, so is our Group of Companies a successful BUSINESS LINK between Turkey and Europe EXPORTS from and to Turkey through the medium of our Companies averaged over the past two years above 4 MILLION POUNDS AND 3 MILLION POUNDS respectively.

No mean achievement in a period of recession!

The EEC connection

TURKEY'S links with the EEC go back almost to the very foundation of the Community. Within little more than two years of the signing of the original Rome Treaty, Ankara had applied for a form of association, although it took another four years before what amounted to a pre-association agreement was signed. In that sense, although this time for obvious economic rather than political reasons, Turkey had to serve a sort of apprenticeship in much the same way as (owing to Anglo-French and Scandinavian opposition) it had to accept in 1950 an interim relationship with Nato pending a full membership of that body.

The point is made here merely to underline Turkey's established and genuine commitment to Europe, and official criticism in Ankara of the Community's failure—or rather, that of the governments of the Nine—to agree on a "restructuring" of the association agreement is made almost more in sorrow than in anger. There are right now difficulties on a number of fronts, but the politi-

cally most sensitive issue concerns Article 36 of the additional protocol which stipulates that freedom of movement for workers between Turkey and the Community is to be secured by progressive stages between December 1 last and December 1986, or over a similar ten-year period—as was necessary to achieve freedom of movement for workers within the original Community of Six.

The Commission, for its part, suggested last May that the first significant measure towards realising this objective should be taken at the very beginning of the ten-year period, but the Council of Ministers failed to agree, and the December 1 deadline has come and gone. In reply, the Turkish Government has threatened to "freeze" the association agreement until (in the words of Foreign Minister Caglayangil) Brussels honours its obligations.

This is by no means the sole dispute between Ankara and Brussels. The Turkish Government is demanding better Community access for its agricultural produce, claiming that preferences since afforded to other Mediterranean countries have eroded the value of agricultural concessions made originally to Turkey. Again, Ankara wants to be free to afford greater protection to its developing industries, although the Government appears to have dropped its earlier insistence that it should be left free to reintroduce unilateral customs duties and quotas whenever it considered this to be necessary.

Yet the freedom of movement for Turkish workers is still the big issue, even if the Ankara Government appreciates full well that such movement is irrelevant if actual jobs cannot be secured, as is the case at present, given that the Nine have more than 5m. unemployed. Turkey's present jobless total is put officially at some 23m. but is certainly higher in fact. It is, said an EEC official in Ankara, with understatement, a "delicate problem." There is no doubt but that the Commission itself is disappointed over the failure—now seemingly inevitable, given the Christmas recess—to arrange for an association council meeting in Ankara as scheduled before the end of the year.

From the viewpoint of the Ankara Government, the issue is vital. Not only are workers' remittances from abroad a vital (if lately declining) element in the balance of payments; it is acknowledged freely that there is no question of eliminating unemployment in Turkey even by the mid-1990s on the most optimistic assumptions of the planners. Thus, a continuing European outlet is seen as being essential, both in economic and social terms, if not immediately then at least when the overall economic situation in Europe improves.

The current suspicion in Ankara, again to quote Mr. Caglayangil, is that the Community wishes to backpedal somewhat on its commitments. "Would say that the Community is rather inclined to compensate for the lack of fulfilment of its

obligations by according Turkey more flexibility in the fulfilment of those obligations falling upon it. We cannot accept such an understanding."

That is not to say that Turkey is not insisting on some concessions itself. "Since the last world economic crisis," said the Foreign Minister, "Turkey also has faced problems relating to its industrialisation. The obligations of Turkey arising from the additional protocol should be in line with its actual economic conditions and flexibility should be brought to this field." On the other hand, because of the deficit in the foreign trade balance with the Community, the means of the association agreement should be exploited to the maximum in order to make it possible to realise for the partners the objectives of the association."

Yet the Ankara Government is hopeful that agreement with the Community will be possible, and an initiative to break the present deadlock is expected from London after January 1 when Britain takes over the Presidency of the Council. Prime Minister Demirel, for his part, has a general election campaign to fight next year, and he is unlikely to ignore the prospect of getting the \$380m. which Brussels has already earmarked for Turkey as project aid.

Bumper harvest helps out

TURKEY, WHICH has the biggest 'cultivable' land area in Europe after the Soviet Union and France, is enjoying an excellent harvest for the third consecutive year, the result of a combination of favourable weather conditions and increased modern inputs. The overall production of major commodities is expected to be 13 per cent. higher than in 1975, making 1976 the best-crop year in Turkish history.

This high production level, coupled with growth in world demand for Turkish cotton and tobacco, has given a boost to agricultural exports, which constitute an average of about 60 per cent. of annual totals: agricultural exports amounted to \$812m. in the first half of this year alone, surpassing total agricultural exports in 1975 by over 2 per cent.

Raw cotton and tobacco exports, traditionally the biggest items on the list, in the first nine months doubled compared with the same period last year, the former to \$885m. and the latter to \$226m.

With the 1976-77 export season well under way, Turkey has sufficient stocks of tobacco, fiberts, raisins and olive oil for export.

Some 180,000 metric tonnes of raw cotton stocks are expected to be available for export this season. This is considerably less than the stocks earlier this year which decreased due to strong local and foreign demand.

Overall cereal production in 1976 is officially expected to be 10 per cent. more than last year. Wheat production is officially estimated to be 15.7m. tonnes, 19 per cent. higher than last year's actual output and if realised will set a new record.

This year has been the best crop season in Turkish history. Fine weather, as well as better use of fertilisers and increased mechanisation, have been the main contributors.

Foreign observers believe the expectation to be too high. tonne (3.5 per cent. higher) Due to this excellent harvest and sugar beet 7.9m. tonnes stocks are at their highest ana, (13.7 per cent. higher). Sun the government says that two flower seed production will million tonnes of wheat are retreat by 4.4 per cent. compared available for export.

Sales, however, have been disappointing for the government which underestimated the low international demand for wheat. Several tenders opened by the government met with little interest and the prices offered were considered to be low.

Inadequacy

Two points are worth mentioning in this connection: first, the cumulative good harvests have aggravated the inadequacy of the silo capacity, in particular for wheat, increasing the amount of cereals stored by burial in large underground holes. Second, Turkey's wheat sale efforts are being hampered by the fact that the government is in trouble with Continental Grain and a few lesser companies for having opted out of wheat purchases it contracted to make in 1974.

The Ministry of Agriculture say that \$50m. worth of cereal exports were made by the beginning of September and shipments were continuing.

The barley production is estimated at 4.5 million tonnes, or the same as last year. An overall increase is expected in industrial crop output as well, with exportable surpluses in many commodities. Cotton is expected to be 467,000 tonnes, about the same

"In 1976," said Mr. Ozal, "utilisation of better strains of seeds, saplings and stud animals had increased by over 20 per cent. compared with the previous years." The use of fertilisers in the same period grew from 3.7m. tonnes to 5.5m. tonnes and preparations were under way to raise this to 5.5m. tonnes next year. The number of tractors sold to farmers was 52,000 in 1975 and 75,000 in 1976. The Minister said that 100,000 tractors would be made available for sale next year from domestic production and exports.

Some Turkish economists believe that the obvious export potential of agriculture is being depressed by unfavourable price conditions at home. These maintain that the Turkish lira is overpriced and argue that this, coupled with high domestic demand, is reducing the price attractiveness of Turkish crops abroad while tempting producers to sell at good prices at home.

These experts point out that, for instance, that the market gardening sector, which is being encouraged with special projects and low-interest loans, is now almost entirely directed towards meeting local demand as a result of this phenomenon. Turkey must adopt a more realistic foreign exchange policy, adjusting the value of the lira at a more realistic level so as to increase competitiveness abroad and curb demand at home.

Misfortune

There is no indication that the Government is contemplating such an overall adjustment.

One basic misfortune of Turkish agriculture has been that development plans have put the emphasis on industrialisation despite the fact that the agricultural sector is the biggest employer, GNP contributor and exporter.

The percentage of investment foreseen for agriculture under the third five year development plan which will end next year is 11.8 per cent. compared with 37.7 per cent. for industry and 50.5 per cent. for services. Agriculture is more prominent than this concentration of capital. Agricultural exports are expected to average 51 per cent. under the third plan period, despite the superior priority awarded to industry. Employment-wise the sector's importance is greater: experts say that when the fourth five year plan is implemented in 1978 some 58 to 60 per cent. of the population will be making their living from agriculture and agricultural activities.

There is no indication that the emphasis will change in any significant degree under the fourth five year development plan which is expected to be more industry-oriented than past plans.

M.M.

The cotton success story

COTTON IS one of the agricultural success stories of Turkey. In the past 22 years the area under cotton cultivation has increased by 9 per cent., while output has grown by 400 per cent. from 145,000 tonnes in 1955 to 598,000 tonnes in 1974.

Cotton is Turkey's biggest single export item, constituting an average 14 per cent. of export revenues. It is of significant domestic importance as well: cotton contributes 80 per cent. of the raw material used by Turkey's fast growing textile industry. 35 per cent. of the edible oil consumed, and comes after barley as animal fodder. About 4m. of Turkey's 40m. population make a living from this crop, whose contribution to the national income in 1975 was about \$700m.

The Agriculture Chambers Union of Turkey has suggested that the Government lends money for irrigation, particularly in south eastern Anatolia, and introduces better pest control so that land under cotton cultivation can be increased with the previous year. According to estimates in 1976 cotton output amounted to 470,000 tonnes and cultivation to 581,000 hectares, the former recording a 2 per cent. decline and the latter a 13 per cent. decline compared with the previous year.

In the 1976-77 third five-year development plan ending next year, anticipated by over 200,000 hectares, in response to the current favourable application of fertilisers, able price conditions.

TURKEY X

Earthquake takes its toll

TURKEY IS one of the countries of the world most repeatedly and seriously affected by earthquakes. Faults and folds of recent origin are widespread features of the country's geological structure and according to geographers, movements still continue along innumerable lines of tectonic weakness.

The worst earthquake in this century occurred in 1939 in Erzincan, killing 20,000 people. Within the past few years earthquakes occurred in Varto, Bingöl and last month in Van, with relatively lower loss of life. Minor shocks have been felt in Izmir, Istanbul and Ankara, the state's most populous and industrialised urban centres, a warning that no part of the country is immune from this danger.

The last earthquake, near Van, killed over 5,200 people, destroyed 142 of the 570 villages in the province and devastated two townships.

There were two fortunate coincidences in the Van disaster. One was that the earthquake, measuring a severe 7.8 on the Richter scale, occurred in the afternoon when the majority of the population was outdoors and awake. If it had occurred a few hours later the death toll would certainly have been much larger. Secondly, temperatures were above the seasonal norm, eliminating the danger of a big loss of life due to heavy snowfall and virtually constant night-time sub-zero temperatures.

The third favourable development—fortunately not coincidental—was that the United Nations Development Programme (UNDP) in Ankara co-ordinated foreign aid to the earthquake victims with excellent results. UNDP, which has done similar work in Turkey on a smaller scale in the past, got in at the beginning this time.

The organisation held continual meetings with the Turkish authorities and compiled lists of urgently needed items among potential donors in Geneva. The result was very gratifying. Mr. Erol Dessa, the UNDP deputy resident representative in Ankara, said that international UNDP, was "staggering." The response was "fantastic." The People queued up at blood dona-

The recent earthquake near Van, which killed over 5,000 people, was followed by an impressive relief operation. But there is a need for better co-ordination of relief work.

type, timeliness and quality of aid sent was "the best so far" in response to a Turkish and other items. Literally earthquake disaster—particular scores of organisations were from the U.S. and West established to collect money and Germany. Less than a week after millions of lira were donated in the disaster 300 plane loads of a matter of days.

supplies had been sent to Turkey. However, the overall result from 31 countries and various international organisations.

The consignments, due to good planning, did not include relief agency.

Clearly, long term planning is required to minimise deaths which came in great quantities and damage from earthquakes after previous earthquakes and in Turkey. After every major which ended up on the black list the need for such a plan becomes a much talked about topic. But as soon as the dust settles and public attention turns away from disaster areas these disappear until a new tremor.

The problems are admittedly formidable. Turkey has nearly 60,000 rural settlements where the majority of the population live in roadless villages of mud-brick homes notoriously unresistant to earth tremors. Turkey is not rich enough to put all these people into modern homes. This will happen with the slow spread of prosperity.

But the alarming thing is that even modern buildings in the big cities are not built strictly according to the rules of earthquake architecture. The quality of buildings is very low.

Building rules are slack and control even slacker, so one cannot even talk about a gradual shift to stronger structures as new houses are being built.

Buildings are known to have collapsed of their own accord even in places like Ankara and Istanbul where one would have thought control would be stricter. There is no guarantee that if a severe earthquake of the intensity of that of Van struck a highly populated industrial area the result would not be catastrophic.

M.M.

Twenty-four hours after the Americans arrived on the scene they had installed portable runway lights, and ground to air communications, and Van airport's capacity had increased five-fold.

Turkish radio and television were also used. On occasions of national disaster these tend to cancel their programmes to play sombre Turkish classical music. After the Van quake this happened again but the music was frequently interrupted.

In result, in the words of the

Ankara said that international UNDP, was "staggering."

The response was "fantastic." The People queued up at blood dona-

Relief work after the Van earthquake last month.

Tourist potential

Despite its great potential, tourism's contribution to Turkey's foreign earnings remains low. Huge capital investment will be needed to improve this situation.

up to expectations as a consequence. In terms of both facilities and revenue, tourism has consistently lagged behind development targets, despite the increase in tourist arrivals and the rapid expansion in domestic tourism.

Deficiency in communications, shortage of accommodation suitable for mass-tourism and lack of expertise are the main bottlenecks apart from the low capital investment which is the root of the problem.

Istanbul is a typical example. This city of over three million people receives three-quarters of the tourists coming to Turkey but is chronically short of accommodation. A Sheraton Intercontinental and a hotel run by Wagon-Lits, the Etap, are recently opened but many more hotels of similar quality are required. Istanbul's Yenikapi Airport and the Istanbul

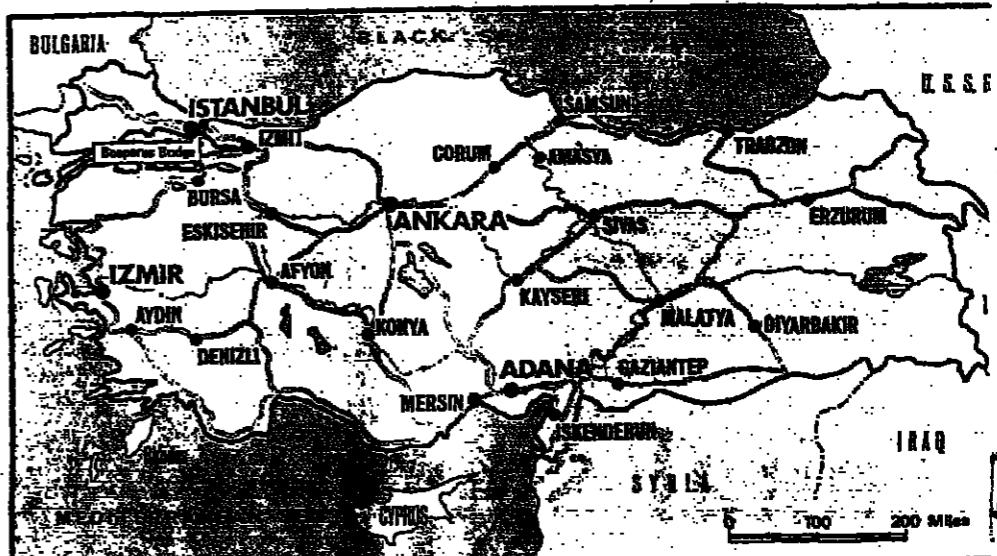

harbours are nowhere European standards from point of view of capacity standards of services provided. There is not even a tourist map and guide available.

Because of these problems Turkey has been unable to attract and deal with tourism like the other Mediterranean countries. Third of tourists visiting Turkey are excursionists staying less than one day. Over the decade, the average stay foreigners has averaged a consistent five days or half average in countries like Spain and Britain.

Change

Any economic change in picture will follow from foreign capital, a fact the governments have long known.

Tourism has been the sector in which foreign participation or direct investments have been conspicuously sought and encouraged. This does not mean that the bureaucratic red-tape and other culprits involved in foreign capital investment Turkey are missing in sector. They are not. But progress appears to be made. A quarter of Turkey's nearly 40,000-bed capacity has been established and is operated by Turkish ventures. When the pipeline or under construction are completed this capacity will be increased 70 per cent with foreign investments.

Altinayildiz

A bit of a mouthful isn't it?

Yes, but if you're interested in mohair you'd better get your tongue round it because the best mohair tops, mohair yarns and mohair fabrics in the world are being made by Altinayildiz.

For the past twenty years the company—the biggest privately owned textile plant in Turkey has been producing and exporting mohair of an extraordinarily high quality. It is now being used in the fashion houses of Paris, London, Milan and New York.

But isn't that what you would expect? After all mohair was being exported to Britain from Turkey over three hundred years ago when it was much in demand for cloaks. The fleece of the Angora goats on the Anatolian plateau was being woven into the finest mohair then as it still is today.

Moreover, just as in those days the sultans used the finest local fabrics for their own robes so today the best dressed men in Turkey can find Altinayildiz fabrics styled in some of international elegance at BEY'MEN, a member of the Altinayildiz group.

So if mohair is part of your business or if you're interested in finding out more about us please write to:

THE ECONOMIC PACKAGE

MONETARY ASPECTS

A new way of looking at Domestic Credit Expansion

EN BRITAIN devalued in July and asked the International Monetary Fund for financial support to cover the loss before the balance of payments responded. The Fund developed the concept of Domestic Credit Expansion as a central measure of our financial progress. The idea was simple: a measure of credit which included the lending used to finance the balance of payments deficit would provide a régime in some ways similar to the gold standard: living at home would have to be tightened if progress with the balance of payments was disappointing, but could expand much more rapidly as soon as necessary funds were being made abroad.

This rule meets the demands of common sense, since the balance of payments is the id's central concern, and in political reality, since a country which has achieved a plus is no longer subject to very effective pressure from the Fund, and it is not surprising that DCE is again the it, inconsistent with an inflationary measure of financial rate which is forecast to be considerably lower by the end of 1978 than over the next ten years. It is possible, of course, that the fundamentals have changed: there is no improvement as much as the more optimistic forecasts suggest. Instead, there is an authority which could considerably tighten regime than envisaged radically if events do not change. Broadly, the Jenkins did in 1970, the figures for DCE should therefore improve by some £5.4bn, and be regarded as a maximum of £5.4bn, over the next three years. In the same period, money supply regime, which Chancellor has said that normally—in the U.S., for instance—implies a relaxation of credit policy when monetary growth falls below the planned rate. But for the markets, DCE is the governing rule as long as the balance of payments remains weak, so that the trade figures—and, much more important, the quarterly figures for official settlements—will become very useful pointers for interest rates for some time to come.

Apart from the balance of payments, the main determinants of DCE are bank lending—now in sterling only—and the public sector's borrowing requirement: the more successful the authorities are in funding this requirement from the investment market, the more the banks will be allowed to lend to commercial borrowers. The Chancellor has said that will equally free capacity to the progress of DCE and the seek orders which will bring in borrowing requirement will be currency earnings.

monitored closely through the year, which implies that a much more determined effort will be made to finance the Government's needs as they arise, instead of in bursts when the gilt's market is buoyant. This could simply more stable credit growth and more volatile in interest rates—which would result if, for example, the Government took some City advice and went over to a monthly tender system of placing Treasury bonds. It could, however, mean some new form of security which will sell even when the news is bad. Proposals for floating-rate bonds and some form of indexation are under very active study.

Apart from ideas on funding, there are one or two ingenious proposals to make the targets somewhat easier to achieve. One is the change of emphasis in the financing of export credit.

The Government has unloaded £100m of refinancing onto the banks, a marginal help in funding. More important, it wants more export finance in foreign currency—which is outside DCE as now defined in sterling terms.

This displays one perfectly real benefit of the new definition; for since the reserves are under heavy pressure, it clearly makes sense to ensure that so far as possible exports are matched by foreign currency inflows, even if the customer is given time to pay. The small cut in foreign aid, which will probably be matched by a cut in export orders on this account, will be seen whether investors find their lighter diet more appetising in the absence of corresponding cuts in real spending.

Anthony Harris

LOCAL AUTHORITIES AND CONSTRUCTION

Capital spending takes the brunt in six-month moratorium

NCE AGAIN the Government only a month ago by the transfer of more than £100m. from capital spending to current spending by local authorities next year simply in order to make the 1977-78 current spending targets more attainable. Now a further £270m. is to be cut next year and £300m. in 1978-79. Local authorities will of course complain bitterly about yet further postponements of this or that project and in some instances where tenders have to be withdrawn and design staff left idle they could face genuine administrative difficulties. But last month's support grant settlement is not being reopened. Above all—and most unexpectedly—they are now to be allowed to spend even more than planned, not less, on housing next year. Indeed, yesterday's measures not only leave local authority housing programmes untouched: there is also to be no reduction in the existing 1977-78 allocations for local authority spending on improvements and repairs and mortgage lending to house buyers. And the forecast average increase in local authority rents next year (almost £60m.) and new killed off.

Planned level of public authority rents programme in 1977-78 remains unchanged at 60p a town house building (£22m.). Construction industry leaders, some £300m., were followed week, the same as the maximum.

Even if one counts the £35m. still coming to terms with the permitted increase this year, reduction in Community Land £300m. expenditure cuts announced in July, last night cessation of two minor subsidy next two years (reducing the estimated that the latest Government measures would throw at least another 100,000 building workers out of jobs by the time the cuts had worked through the building programme. At the moment, about 220,000 building operatives are out of work and a growing number of small- to medium-sized contractors are expected to cease trading next year.

The industry's total output this year is expected to show a fall of at least 2 per cent over 1975, when work levels dropped by 6 per cent. In 1974 output fell by 10 per cent and industry leaders believe that there is now no hope of an end to the worst post-war recession before 1980 at the earliest.

Mr. Bob Willan, president of the National Federation of Building Trades Employers, said yesterday there was now a real danger that the industry would be forced to contract to a size which would leave it totally incapable of meeting demand when the next upturn came.

Michael Cassell and Colin Jones

DRINKS AND TOBACCO

Hangover is still to come

MR HEALEY has devised a time when trade is falling in: urgently to have the system w torture for the wine, spirit volume and they are not allowed changed, so that, like the Scotch whisky producers. He has to increase margins of profit, brewers in Britain and liquor layed the proposed increase. The Department of Prices and businesses in all other Common duties until January 1, and Commodity Protection said last Market countries they are given make sure that the new duty el's bite quickly has imposed actioning system.

The complicated scheme ms at first sight to mean that the next two weeks pro-

cess may take from bond only per cent. of the wine, spirit and tobacco

which they withdrew in the first week of December.

Yet to take one example, the Scotch whisky industry will have

to find roughly £12m. more from

"This is bound to deprive its cash flow as a result of the companies of money urgently needed to promote Scotch

It is so because duty on whisky sales abroad, just at the rise exactly what the quota item means to their individual

The longer range problem is higher levels, the wine and collect around £50m. from

w to finance the extra duty at spirit trade campaign more smokers and drinkers in the

current financial year. In a full year the Chancellor would expect his increases to bring in an additional £280m. and add 0.5 per cent to the cost of living index. Of the extra

duty, some £30m. will be provided by spirits, £80m. by wine, and £100m. from beer. According to the Brewers' Society the price of the average public-bar pint will go well past the psychological "five-bob" or 25p level to 27p. Smokers will have to find another £120m.

For the cigarette manufacturers there will follow a hard look at how pricing structures can be doved-tailed with marketing policy. The two-tier effect of the increases in leaf duty from midnight-to-night and the increase in end-value tax from January 1 will allow considerable flexibility. Once the industry has paid the extra duty on the total weight of leaf drawn from bond, it will be allowed to redistribute that extra cost unevenly among the products it markets.

The likely consequence is that all manufacturers will seek to protect their share of the

market.

Stuart Alexander and Kenneth Gooding

MEN AND MATTERS

The Bank looks back

With Denis Healey yesterday lifting the veil not just on immediate new austerity plans but on progressive cuts to come up to 1979, the future becomes cloudier by the moment. It was a point I mentioned earlier this week, noting that gloom ahead seems to make companies keener to delve into their pasts.

Now that august institution, the Bank of England, seems to be in on the act. To-day's Bank Quarterly Bulletin has an article on the work over the years of the economic intelligence department. There have been previous historical items (the last in 1970 on the cashier's department) but the latest has a diverting way of describing the shaggy growth of the role of economists within the Bank.

"The Bank's more specific

economic work," the bulle-

tin reports, "was on a very

limited scale until some 15

years after the Second World

War. Indeed until that time the

Bank appeared positively averse

to economics; and the work

consisted very largely in the

compilation of balance of pay-

ments statistics.

The first attempt to compile

"in a simple form" tables of

figures for the Governors and

senior officials on the real

economy, the banking system,

public finance, and the markets

came in August 1921. Quoting

intriguingly from internal docu-

ments of the day, the bulletin

says: "Later, memoranda on

monetary or economic

questions were written by the

section for the Governors, and

an attempt was made out of

Bank hours to read books and

pamphlets on financial and

economic subjects." though

readers were warned not to

"become infected with the ideas

or the language of an

economist."

But he finds it hard to believe

there really is a monster, so he

puts forward his own theory

instead. Nessie, he says, offers

Britain a marvellous diversion

from inflation and unemploy-

ment.

The crossed-out "British Ship-

builders" above does prove

reassuringly that J. Graham Day,

who last week quit as chief

executive of the organising com-

mittee of the proposed State

Body, did intend doing the job

when his Christmas cards were

printed.

Of course, that would have

been before the latest Parlia-

mentary tussles. However, I am

not sure what to make of the

choice of subject on the front

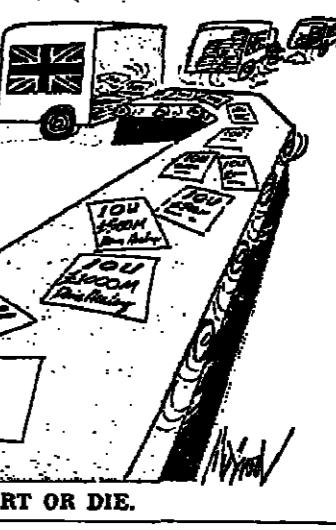

of the card. This shows the old

Padstow lifeboat (man-powered)

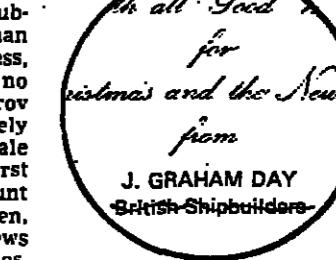

cutting through stormy seas.

Symbolic of rescuing whom, I

wonder?

EXPORT OR DIE

J. GRAHAM DAY
British Shipbuilders

The crossed-out "British Ship-builders" above does prove reassuringly that J. Graham Day, who last week quit as chief executive of the organising committee of the proposed State Body, did intend doing the job when his Christmas cards were printed.

Of course, that would have been before the latest Parliamentary tussles. However, I am not sure what to make of the choice of subject on the front of the card. This shows the old Padstow lifeboat (man-powered) cutting through stormy seas. Symbolic of rescuing whom, I wonder?

Overseas earnings lift CompAir to £9.38m.

INTERNAL SALES for the 52 weeks to October 8, 1976, of CompAir expanded sharply to £35m, compared with £25.96m. in the previous 52 weeks and net profit increased from £m. to £9.38m. after £2.44m. and £3.1m. for the first half. Earnings per 25p share for the year were up from 8.4p. to 10.2p. The dividend is raised from 3.207p net with a final 2.007p.

Overseas earnings made the major contribution to the proved results which have been achieved despite difficult trading conditions in many parts of the world, the directors state. Business at the start of the year was in line with expectations and an assessment of the outlook for 1977 will be given at the annual general meeting on February 16, they add.

SWK's £2.75m. sales, net profit and fixed assets.

Exchange gains of £5.872,000, principally on overseas net assets, have been transferred direct to reserve. The tax charge in 1976 has been saved by exceptional adjustments in respect of prior years amounting to 20.3m. The company manufactures air compressors, pneumatic tools, etc.

Baggeridge expands to £303,176

AGAINST AN indicated £240,000 pre-tax profit of Baggeridge Brick Company expanded to £303,176 for the year to September 30, 1976, compared with £230,02 for the previous year, after £120,000 (£25,000) for the first half.

Earnings per 25p share for the year increased from 2.69p to 3.61p. The dividend is stepped up from 1.90025p to 2.00035p net.

ADAMS FOODS

The offer by Adams Foods for Broadhurst and Co. (Gadebrook) has been declared unconditional subject to the listing of the company's shares on the Stock Exchange. Acceptances have been received for 441,775 out of 467,000 Ordinary shares, the whole of the 37,456 "A" Ordinary shares and 25,000 out of 26,000 Preference shares.

W. OF E. TRUST — TYNDALL

The West of England Trust has allotted 114,512 Ordinary shares in acquiring 28,622 Ordinary shares from Dentsply International in its acquisition of Tyndall Group. An unconditional offer to acquire 184,680 Ordinary shares in Tyndall was made on November 18 and remains open for

Banco do Estado de Sao Paulo S.A.

London Branch

wishes to extend to all its friends in the U.K.

Warmest Seasonal Greetings

acceptance until December 31. WOT now holds 90.8 per cent. of the capital of Tyndall.

BOARD MEETINGS

Advance at Eldridge Pope

BREWERS, maltsters and wine and spirit merchants, Eldridge Pope & Co. reports turnover up 25 per cent. to £9.68m. for the year to September 30, 1976, and pre-tax profits of £1.16m. compared with £0.92m. including extraordinary items of £04,133 (£53,254). Profits after tax advanced from £34,932 to £62,277.

The dividend total is lifted from 4.92p to 6p net per £1 share with a final of 3.68p. The company is closed.

The directors say the over-riding factor was the summer weather which resulted in substantially increased sales of beer notably lager.

Traditional draught ale also made strong progress but the packaged trade slipped back in line with the market.

In the second half wine sales showed signs of recovery though sales of spirits continued to stagnate.

Robt. Fleming appointed SUITS advisers

Robert Fleming, the City merchant bank with Scottish connections, has been appointed financial adviser to Scottish and general investments, two of whose directors, including Sir Hugh Fraser, the chairman, were sharply criticised in a recent Stock Exchange report.

The SUITS Group, announcing this yesterday, said that it had asked Fleming "to consider with them plans for the future conduct and development of the business of the company."

This announcement drew a favourable response from the committee of institutional investors which recently asked the Board to say why Sir Hugh and Mr. Nicholas Redmayne, a fellow director, should remain on the Board. The Stock Exchange had criticised share sales by Sir Hugh and Mr. Redmayne, while clearing them of insider dealing, and made other criticisms of the company's management in the past 18 months.

Sir Hugh has, however, threatened to sell his family stake if he is ousted as chairman.

A statement from the institutional committee said it welcomed the appointment of Fleming "which, it believes, will contribute to resolving the management problems of the company which have been of great concern to it."

SHARE STAKES
Bishopsgate Property and General Investments has sold its holding of 2,573,200 London Shop Property Trust Ordinary shares to Kine Air Developments, which increased its holding in Wilson Bros. by 10,000 shares to 2,438,200 shares.

ASSOCIATES DEALS
Capel-Cure Myers on Monday bought 4,000 Dunford and Elliott at 39p for a discretionary investment client. Capel-Cure Myers purchased 20,000 Dunford-Elliott at average 38p for associates of the company.

Joseph Sebag and Co. bought 2,111 London City and Westcliff at 22p on behalf of Lorbo.

Lindustries sees over £5.12m.

TURNOVER for the 28 weeks to October 16, 1976, of Lindustries increased from £34.49m. to £40.07m., and pre-tax profit advanced from £1.45m. to £3.05m.

Mr. W. E. Luke, the chairman, points out, however, that in the final six months of the previous 18-month accounting period there was a considerable upturn in profits and an increase of this proportion will not be forthcoming for the full year.

Nevertheless, he is confident that in the current year the profit of £5.12m. attained during the comparable 12-month period will be exceeded.

Earnings per 25p share for the 28 weeks increased from 4.1p to 7.72p, and the interim dividend is lifted from 1.2p to 1.6p net. Advanced for the 18-month period was £1.45m. Turnover for that period was £104.89m. and pre-tax profit £7.02m.

In order to make comparisons easier, the figures for the final 22 weeks of that period have been calculated by apportioning the figures previously reported for the period March 15, 1975, to April 3, 1976. They show a turnover of £70.4m., profit £4.86m. and earnings per share 12.84p.

The directors say the over-riding factor was the summer weather which resulted in substantially increased sales of beer notably lager.

Traditional draught ale also made strong progress but the packaged trade slipped back in line with the market.

In the second half wine sales showed signs of recovery though sales of spirits continued to stagnate.

Robt. Fleming appointed SUITS advisers

This announcement drew a favourable response from the committee of institutional investors which recently asked the Board to say why Sir Hugh and Mr. Nicholas Redmayne, a fellow director, should remain on the Board. The Stock Exchange had criticised share sales by Sir Hugh and Mr. Redmayne, while clearing them of insider dealing, and made other criticisms of the company's management in the past 18 months.

Sir Hugh has, however, threatened to sell his family stake if he is ousted as chairman.

A statement from the institutional committee said it welcomed the appointment of Fleming "which, it believes, will contribute to resolving the management problems of the company which have been of great concern to it."

Change of Address

SENTRY INSURANCE

The Sentry INSURANCE GROUP is moving to its new head office at 56 Leadenhall Street, London EC3A 2BJ (telephone 01-481 3464), on Thursday, 16th December 1976.

The head and registered offices of the following Group companies will be at Leadenhall Street from that date:

Sentry Insurance Group (U.K.) Limited
City of Westminster Assurance Company Limited • Cloverleaf Insurance Company Limited
Consolidated European Insurance Company Limited • Gaudery Limited
Sentry Insurance Management Limited • Sentry Insurance Services Limited
Sentry Underwriting Agencies Limited • Sentry (U.K.) Insurance Company Limited

Some companies are big in construction.

Some are big in natural resources.

Who's big in both?

Tarmac

Look closely at the top ten companies in the construction industry. They all fall neatly into one category or the other. Except one.

Tarmac balances its huge construction business with the manufacture and supply of building materials and the utilisation of vast natural resources.

While we are engaged in as many as 500 building and civil engineering contracts on any one day, we are also drawing on almost limitless reserves of stone, from over 100 quarries. Providing the basis for other group activities such as the production of road surfacing materials and ready mixed concrete.

At the same time we supply more waterproofing materials to the construction industry than any company in Europe.

This carefully maintained balance gives us our unique strength in the construction industry.

Probably the most soundly based international construction company in Western Europe.

**Laurence
Scott
Limited**

INTERIM REPORT

The directors have today declared an interim dividend of 0.8p (1975/6: 0.7p) per share on the Ordinary (25p) shares for the year to 31st March 1977. The dividend will be paid on 31st March 1977 to shareholders on the register on 4th March 1977. The register will not be closed.

UNAUDITED FIGURES (£'000s) FOR THE SIX MONTHS TO 30th SEPTEMBER 1976 ARE:

	6 months 30th September	6 months 30th June	15 months 31st March
Group turnover	1976	1975	1976
Group trading surplus before depreciation, interest and taxation	13,591	10,183	31,570
Depreciation and plant leasing	324	223	602
Interest less received	32	132	302
Taxation (52%)	1,021	1,791	1,723
— Group profit/(loss) before taxation	531	2,717	895
— Group profit/(loss) after taxation	490	521	828
Interim dividend per share	67	52	—
Earnings/(loss) per Ordinary share	0.8p	0.7p	—
	5.81p	4.71p	8.99p (annualised)

* Differing reporting periods due to change of accounting year.

NOTES.—

- For the 15 months ended 31st March 1976, dividends of 3.4p (equivalent to an annual rate of 2.72p) per share were paid. It is the intention to recommend dividends totalling 2.99p per share for the current year.
- Although the order input for electric motors has been below works capacity for more than 18 months, the shortfall is more than offset by the considerably increased activity in the control gear divisions.
- Inflation continues to demand that, to be viable, industry must increase its profits. The above figures indicate that the progress of this latter part of 1975/6 has been maintained and the directors anticipate that the full year's results will be a record by a useful margin. This is essential backing for the £3 million capital investment programme now under way.

GOTHIC WORKS, NORWICH NR1 1JD. 15th December 1976

MINING NEWS

The threat to world mineral supplies

BY KENNETH MARSTON, MINING EDITOR

GROWING concern is being felt about the threat to mineral supplies in the latter part of this century. The threat arises from the recent merger of the Overseas Mining Association and the United Kingdom Metal Mining Association.

The retiring president, Mr. D. R. Mitchell, comments on the impact on mining operations of low metal prices and inflation. And he calls for the U.K. Government to give greater support to the U.K. mine operators and mining finance houses than has been shown over recent years.

Mineral Development in the Eighties Prospects and Problems, British-North American Committee, 1 Gough Square, London, EC4 £1.50.

The problems have been already underlined by the recent submission of the leading European mining groups to the president of the Commission of the European Communities. No further power will be given to the British-Euopean Institute, the breakdown of the Nine-Euro system has come from the British-North American Committee which points out that the U.K. is entirely dependent on imports of 15 of 20 ferrous and non-ferrous metals considered and is 90 per cent. dependent on three of the others.

The Committee considers that fears of OPEC-type cartels in non-fuel minerals seem unlikely to be realised. It stresses that if producer countries are to reap the benefits of effective development of mineral resources in the years ahead there must be some agreed basis accepted by producers and consumers for attracting capital, ensuring markets and apportioning benefits.

Another voice to be raised on the problem of ensuring future

cent. increase in net income for the year to the end of last October.

The profit was \$2.9m. (£2.27m.) or 77 cents per share, compared with \$3.6m. 71 cents per share, earned in fiscal 1975. The total amount of taxes of all kinds was down to \$3.9m. from \$3.4m. the previous year. Revenue from concentrate sales was \$22.1m. against \$23.5m.

Craigmont's exploration costs have increased owing to its involvement in the search for oil and gas, and the immediate prospects for higher earnings do not look very encouraging.

The price of copper, on which Craigmont depends, averaged 63 cents a lb. during the last fiscal year, but has since declined to languish under 60 cents a lb. in New York for nearby positions.

DENISON'S BC COAL PROSPECT

THE PROSPECT of bringing Quintette Coal's 1.5m. tonnes column, another farm-in deal with the U.S. Steel-Sabina partner ship.

The newcomer to the Canadian base-metal prospector is the Canadian oil-shovel of West Germany's Metallgesellschaft group. It contributed \$450,000 (£265,000) of a \$600,000 two-year spending programme. Sabina were 65p yesterday.

Quintette comes to production it will expand Denison's position as a significant producer of energy resources outside its traditional involvement in uranium. At present Denison is linked with two Japanese companies, Mitsui Mining and Tokyo Electric in the Quintette project.

If uranium's involvement goes through as planned, and it needs the agreement and approval of the boards of the respective partners involved, as well as the Government, then the equity in Quintette will be held by Denison, metal prices and record a 10 per cent. to 32.25 per cent. the two

years within two years.

The extra stocks will enable

higher concentrate production in

1977. With an expansion pro-

gramme nearing completion, pro-

duction should be at 2,800 tonnes

a year within two years.

In the past fortnight Saint Piran

shares have advanced from 50p

to 55p, but yesterday, after the

figures, they succumbed to profit-

taking and closed at 49p.

Japanese companies, 45 per cent. and Imperial, 16.18 per cent. Quintette is 10.18 per cent. The prospectus states: "What is clear is that Mr. Stephen B. Roman calls a final feasibility study is to be completed "on schedule" this year and the decision to proceed with production is expected in 1977. The plan is for an initial production of 1m. tonnes of metallurgical coal a year in 1980, rising to 3m. tonnes in 1984."

Mr. Roman has already lined up ten large customers. Two members of the Japanese steel industry, Nippon Kokan, and Kobe Steel, have agreed to negotiate for the purchase from Quintette of an estimated 1.2m. tonnes a year for a long-term period.

The project would require some help from the B.C. Government. "We are satisfied that the B.C. Government will lend its support and co-operation in creating the necessary infrastructure for the northeastern area of British Columbia," Mr. Roman says.

Saint Piran's upsurge

BASKING IN the glow of high production from the Cornish mine, South Crofty, and an increase in the price of tin, Saint Piran's management is a year older, rising 76 cents in net income for the six months to December 31, 1976, from £290,000 in 1975. The total for the plan year to March 31 was £178,000.

An interim dividend of 0.425p net is declared. Last year there was no dividend at this stage and the final payment for the year was 1.25p net.

The recovery in Saint Piran's net income thus began in the second half of the 1975/76 financial year. In the latest six months to the end of September, the London Metal Exchange cash tin price rose from £3,850.5 per tonne to above £4,700. Tin in the port of Saint Crofty in the same period was 1,072 tonnes against 881 tonnes in the 1975 first half.

The managing director of Saint Piran, Mr. Peter Adey states: "The prospects have never been better." South Crofty has been mining more ore than has been milled because of thick veins of tin, which means that more ore is broken than is removed until the stone is completed.

The extra stocks will enable

higher concentrate production in

1977. With an expansion pro-

gramme nearing completion, pro-

duction should be at 2,800 tonnes

a year within two years.

In the past fortnight Saint Piran

shares have advanced from 50p

to 55p, but yesterday, after the

figures, they succumbed to profit-

taking and closed at 49p.

ROUND-UP

Japanese steel industry sources in Tokyo said that 1977 iron ore and coking coal imports would be reduced owing to lower than expected crude steel production. The industry has contracts for the import of 14.5m. tonnes of iron ore and 6.5m. tonnes of coal, but there is a provision for an increase or decrease of 10 per cent. on either side of these figures.

Iron ore mining and milling resumed at Mount Newman in Western Australia following a 37-day strike of engine drivers at Port Hedland. 25 bulk carriers are awaiting shipments.

Penetrating further and further into the earth's crust, engineers at the world's deepest gold mine, the Anglo-American group's Western Deep Levels in South Africa, have drilled an inclined borehole a record length of 1,237 metres—more than three-quarters of a mile long, starting more than 1.5 miles underground. They have intersected gold reefs beneath the present level workings, a cheaper and more informative fashion than would have been possible had they started on the surface.

Mining BRIEFS

KADUMA SYNDICATE—October 1976. Production of iron ore, 1.5m. tonnes.

CONZINC RIOTINT—MALAYSIA—SYNTHETIC ZINC—October 1976. 11 tonnes (October 10 tonnes).

ST. PIRAN—November production of tin concentrates (70 per cent. purity) totalled £1,000.20 tonnes (October 12 tonnes); Alumina 25 tonnes (October 25 tonnes).

Midway jump by Braithwaite Engineers

Turnover of Braithwaite and Co. Engineers expanded from £4.86m. to £6.28m. for the six months to September 30, 1976 and profits jumped from £210,490 to £282,011.

Excluding unforeseen circumstances, the company anticipates that next half profit will not be less than that for the first.

The outlook for the constructional steelwork industry is not encouraging and suitable orders to follow current long-term contracts will be difficult to obtain owing to the excess of capacity over demand. The sales effort in seeking new contracts particularly from overseas has been increased and there is continuing investment in new plant and machinery to improve efficiency, they tell members.

The interim dividend is raised from 2.85p in £3.75m per share last year to 3.1p in £3.75m per share this year.

Turnover of £1,000,000 per month before tax.

Net profit £43,011, 10.1%.

Dividends: ordinary £1.00 per share; preference £0.50 per share.

Ordinary dividend retained 30%; preference 20%.

Westerly Marine turns in £0.22m.

Turnover of glass fibre yacht builders, Westerly Marine Construction, for the year to July 31, 1976, was £5,939,000 and profit before tax was £222,600. Exports at £3,041,000 accounted for 62 per cent. of total sales.

Mr. D. Sanders, the chairman, said the figures were most pleasing as the first half of the year had been badly affected by the restrictions on lending and a hike in rates of VAT in the U.K. market.

Westerly has a 20 per cent. holding in the company.

Laws and Regulations. One of the principal activities UKMMA was to examine the effect of proposed new laws, regulations affecting the metal mining industry in the United Kingdom and this will continue to be a prime concern of Mining Association; a new committee has been set up to undertake such work. During the course of the year, report of the Stevens Committee on minerals planning control was published. This report and its recommendations were great significance to our U.K. members; there are parts of recommendations on which we have urged that action should be taken without delay, but unfortunately the latest indication is that the Government will not be able to proceed on them for several months.

Government departments have sent us papers on a variety of matters for information or comment. These have all responded to, either by the Association or by members particularly concerned with the subject matter of an enquiry.

Acknowledgments. Finally, on behalf of all our members it gives me much pleasure to thank the Committees of Council of the Association for their continued valuable work and to pay special tribute to our Secretary, Mr. S. J. Whiteman, for his efficient services and dedication to our affairs.

BIDS AND DEALS

Dunford and Elliott sees £5m. for 1976-77

Dunford and Elliott is forecasting pre-tax profits of £5m. for 1976-77 but is holding back on budget figures. The forecast is for trading profits of £5m. for the 52 weeks ending October 1, 1976; a pre-tax profit of £5m. and earnings of £3.35m.

This would give earnings per share of 31½p or 18p on full conversion of convertible stock and the new preference shares.

The circular which has been sent to shareholders following the approval at a meeting yesterday of the Board's proposals for a 5m. rights issue of convertible preference shares.

The circular is a prelude to a more detailed rejection of the 3.6m. bid from Johnson, Matthey & Bown which Dunford has described as "opportunist and wholly inadequate".

Contained in the circular are summaries of Dunford's internal financial information which the Board has accused FB of misusing in its take-over plans.

The budget information is in two parts: the first, prepared between June and September, shows a trading profit of £9.3m. which after interest charges of £5.5m. and earnings of £1.5m. leaves a higher trading profit of £1.5m., interest of £3.1m. pre-tax profits of £5.3m. and after a deduction in deferred tax due to incorporation of newly calculated tax losses, earnings of £1.7m.

It was the trading profit figure of £1.7m. which was inadvertently disclosed by JFB's own during the recent Court of Appeal hearings brought by JFB against an injunction granted to Dunford, preventing JFB from proceeding with its offer.

Dunford directors regard the revised budget as "capable of entertainment" but a formal forecast ought to be con-

servative" and is accordingly a strong recovery phase and requires a period of stability to keep the benefit of the acquisition of Brown Bayley Steel and the recent development programme.

No further capital expenditure of any magnitude is necessary for the next three or four years and thereafter only a modest investment in ancillary plant should be required to increase outputs further to meet the requirements of the next decade.

The increased profits, together with the very low tax payable and minimal capital expenditure necessary over the next few years, will enable borrowings to be materially reduced at the same time as shareholders' funds are increasing thereby strengthening the capital structure of the company.

Mr. Welsh said he thought the "present figures would show the JFB bid to be entirely superfluous" and that he hoped shareholders would agree that "there is no way that shareholders could consider selling their company at just over one year's after tax earnings". He recommended shareholders ignore it and not reject JFB's offer.

Dunford's shares need ahead yesterday on the news of an official profits forecast by 5p to 4p compared with the offer price of 45p.

Johnson and Firth Brown has convened an extraordinary meeting for January 10 to decide the first official closing date for its offer, to approve an increase in its authorised capital from £26.1m. to £28m.; this is to enable it to implement the Dunford offer and also to make its proposed conditional one-for-three rights issue to raise some £10m.

It was the trading profit figure of £1.7m. which was inadvertently disclosed by JFB's own during the recent Court of Appeal hearings brought by JFB against an injunction granted to Dunford, preventing JFB from proceeding with its offer.

Dunford directors regard the revised budget as "capable of entertainment" but a formal forecast ought to be con-

Battle looms as Hestair puts in offer for Spear & Jackson

Hestair, the industrial holding company, is bidding approximately £25.65m. for Sheffield cutlery and hand tools group Spear and Jackson following the announcement last month that it had taken up a stake of 18.4 per cent in the company.

The bid is almost certain to be accepted. Spear and Jackson have issued an immediate statement to the effect that it would be considering the terms of the offer with its financial advisers, merchant bankers Robert Fleming, who are being advised by the Spear and Jackson Board to take no action. Having noted the terms of the offers, the Board of Spear and Jackson "will give shareholders their considered views following despatch of the formal offers".

Spear and Jackson was confident yesterday that it could repel the bid, which is regarded as inadequate in light of the 170p market price share. The chairman and his family interests alone account for over 22 per cent of the votes.

There is also the prospect of third party entering the picture. It was confirmed that there had been other approaches, including one from abroad.

Terms of the bid are three times in Hestair for every two shares in Spear and Jackson. This value is offered, with Hestair closing st night at 71p, at 166½p for 100 shares. Spear and Jackson Ordinary are 100p.

Arrangements have also been made with Barclays Merchant Bank for a cash alternative with 94½p a share. Spear and Jackson ended the day 3p higher at 100p, after 108p.

Hestair, which operates in the areas of commercial vehicles, agricultural engineering, education and leisure and employment agencies is also forecasting that its group will make pre-tax profits before minority interests of £1m. for the year ending January 31. This figure compares with £1.1m. for the previous financial year. The final dividend for 1976-7 is forecast at 5.0000p net share.

SMITH INDS. Smith Industries has acquired Miller and Edwards and its associate M. and E. Seals. The

comment star has caught Spear and Jackson's attention.

Lon. City and Westcliff rejection details

he property portfolio of Lon. City and Westcliff has been reduced by Robert Ellis, 3m., against a book value of £1.5m. on September 30, 1976. This represents a reduction of 50% in the September asset £6 per share figure of 40.2p.

However, after directors' estimates of the additional value in residential portfolio on a take-up basis, the additional value within the commercial portfolio (worth 10.5p per share), plus the names received in the liquidation of the Israeli Bank and the value of £1.5m. per share emerged at 39.5p.

The undated results for the 12 months to September 30, 1976, show that LCW made an operating loss before tax of £1.5m. of which £800,000 related to the Centre Nord property. There are also extraordinary losses of around £400,000, including £350,000 relating to exchange losses.

It is anticipated that overwriting of the Richard Ellis valuation will be reduced by a further 20% in the year ending September 30, 1977, and that there will be increases in market value as a result of the affairs of LCW, and it is a right of this knowledge that the directors are expecting to be able to recommend a return to dividends next year "at a rate significantly higher than the payments of the last two years."

Lonrho immediately took back the LCW document last night, stating that it did not intend to increase its offer. The statement argued that the Richard Ellis valuation were to be substantiated, the asset value £1.5m. would be reduced and that the additional £1.5m. that it was hoped would be recovered from the Israel-British settlement would only increase this to 19.8p per share, "still less than Lonrho's

Robert Ellis valuation was an 'open market basis'. The document says, and the executive directors accept the valuation, the group's properties had "been sold in the pressed market conditions prevailing at the valuation date."

Genting opposed to Golden Hope merger

An open threat to the plan for a three-way merger of Golden Hope Plantations and two other companies in the Harrison and Crosfield group emerged yesterday with the news that Genting Highlands, Hotel Berhad, the South East Asian concern which with associates has recently built up a 21 per cent stake in Golden Hope, is opposed to the merger.

It was reported from Kuala Lumpur yesterday that Genting found the terms unattractive. Golden Hope, Pataling and London Asiatic, in each of which Harrison and Crosfield and associates hold interests of 20 per cent, is to be acquired under the merger scheme by a new Malaysian company, HPPC, which would in turn be partly owned by a new UK company, HME.

A spokesman for N. M. Rothschild, advisors to Genting, said yesterday that Genting had agreed to hold off signing the present proposal until a new Malaysian company, HPPC, which would in turn be partly owned by a new UK company, HME.

"No further capital expenditure of any magnitude is necessary for the next three or four years and thereafter only a modest investment in ancillary plant should be required to increase outputs further to meet the requirements of the next decade."

The increased profits, together with the very low tax payable and minimal capital expenditure necessary over the next few years, will enable borrowings to be materially reduced at the same time as shareholders' funds are increasing thereby strengthening the capital structure of the company.

There is a real worry that the scheme contains an element of "over-financing", with Harrison agreeing to pay 26 pence per share in the new U.K. company and not all other shareholders expected to follow suit.

Harrison claims that it is optimum for the U.K. company to retain control of its investment.

Baring Brothers, which is acting as advisor to the merging companies, made no comment on the new development yesterday but as a 75 per cent majority of shareholders' votes at the meeting scheduled for January 10 is required to allow the scheme to proceed, Genting's action poses a serious problem.

CONCRETE BUYS DOWSEIT PILING

CONCRETE has acquired Dowseit Piling and Foundations, an unlisted public company, for £65,000 in cash. Irrevocable undertakings have been obtained from holders of 90.3 per cent of the company's shares, including directors who hold 40.5 per cent, for the terms after a capital reorganisation are £1.50 a share.

For the year ended March 31, 1976, Dowseit's pre-tax profits were £272,000 (£16.585 per share). At March 31, 1976, Dowseit's net tangible assets amounted to £60,350.

SWS SELLS ADDA STAKE

Adda International announces that it has been advised by Slater Walker Securities of the sale of its holding of 3,009,448 shares representing 16.88 per cent of the company's capital.

CGF—BRITISH BORNEO PETROLEUM

Discussions are in progress which may result in Consolidated Gold Fields making a cash offer for the approximately 75 per cent of the British-Borneo Petroleum's share price of £1.95, and a net asset value of £1.60p after the unremarked. The Syndicate capital it does not already own.

As far as we can see, nobody comes out of this rather shabby story with credit, and it will be interesting to see how the European Commission, whose responsibility it is, reacts to Mr. Rodger's defiance.

After all, transport harmonisation is one of the fundamental concepts of the EEC and if the U.K. proves that it is possible for the Community transport laws to be ignored at the whim of sectional interests, how long will it be before other member countries follow suit and disregard laws which do not happen to please them?

There is a very real danger that if Mr. Rodger's decision is allowed to pass unremarked, the Commission could ultimately find itself

in a position to reduce his gross income to a more reasonable level.

A HUGE PROJECT. THREE COMPANIES FORMED INTO PARTNERSHIP. IT TOOK FUNDS. IT TOOK EXPERTISE. IT TOOK CHASE.

'We had to review the raw material availability, the competitiveness of the project, the capacity of the operators and the marketing arrangements for the products,' says Chase.

Four of the key Chase people on the Bamble Project from left to right: Andrew Greatrex, Executive Director of Chase Manhattan Limited, George Thiel, Head of the Nordic Area, Jim Adamson, Head of the European Petroleum Division London, and Andre Brand, Chase Relationship Manager.

For one year and four months Andre Brand lived most continuously with the Bamble Project. Between November 1974 and March 1976 the giant petrochemical complex, nestled in the folds of what was once virgin land in a Norwegian fjord, occupied around three-quarters of his working life. "I have lost count of the number of times I went to Norway in connection with this project, but it must have been more than 25," says London-based Brand.

All of this effort was devoted to the assembling of two financing packages totalling over \$150 million, for land is not a petrochemical man but a Relationship Manager in Chase Manhattan Bank's Nordic Area based in London. It was a measure of the complexity of the whole project that he and several other senior executives from different parts of the bank should have had to commit themselves to it for so long.

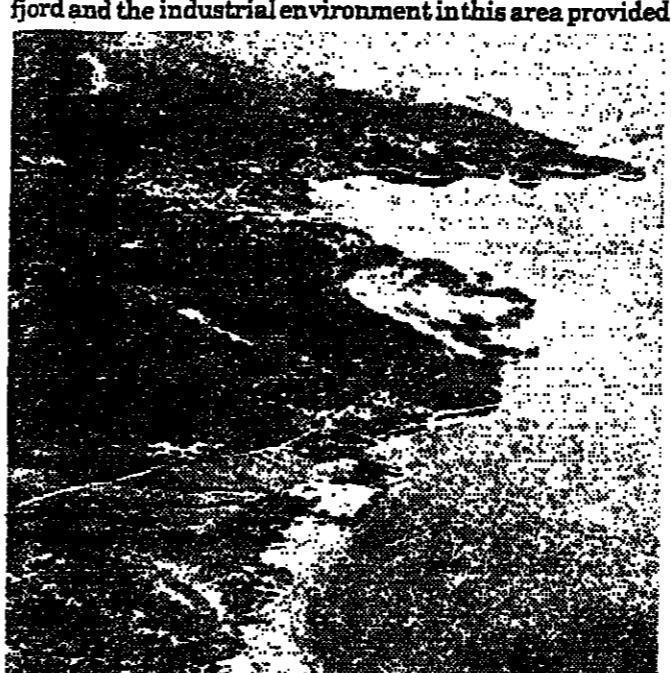

THE PROJECT

Bamble was designed to exploit by-products of the oil produced by the Ekofisk field in the North Sea.

Ekofisk is located in the Norwegian sector but it had proved technically more convenient to pipe the oil ashore at Teesside in England rather than in Norway.

The Norwegian government agreed to this arrangement on the understanding that the natural gas liquids would be brought back in tankers to a petrochemical complex built on a green-field site in Norway. Bamble was chosen among other reasons because it was located on deep water and Norak Hydro's

large chemical plant complex at Porsgrunn across the fjord and the industrial environment in this area provided

Part of the Bamble plant site, a farmland adjoining a Norwegian fjord.

some of the necessary infrastructure for a large project such as this.

The project involving the three companies as partners comprised two stages. First was to be an ethylene plant. Its production target was 300,000 tons a year of ethylene and 50,000/70,000 tons of propylene. Half the ethylene would be absorbed in a Norsk Hydro vinyl chloride plant which was to be built nearby and the other half in the second stage polyolefin plants. This second stage would produce plastics suitable for ultimate conversion into a wide range of consumer and industrial products.

A PROPOSAL

The objective was clearly defined. One question was how to finance it. The three partners invited Chase to look at the project and come up with a proposal for an international financing.

Chase's philosophy when dealing with projects like Bamble, points out George Thiel, head of the Bank's Nordic Area, is centred upon its concept of the Relationship Manager. "It is not a question of sending a man in to do one deal, take a fee and then get out. The leadership of the team comes from the man who has the long-term relationship with the customer", he says.

continued...

The Bamble Project continued...

The underlying assumption was that bank finance was going to be needed on a scale so big that it would take several banks to supply it. Any loans would therefore need the participation of a number of international banks.

Brand's role, as Relationship Manager was in essence that of co-ordinator, working together with industry specialists and Euromarket specialists to produce a package at once acceptable to the borrowers and the participating banks. Satisfying the needs of three diverse customers and the demands of the banking markets was a task calling for skill, patience and not a little diplomacy.

CATALYST

Ultimately, Thiel says, the Bank was itself playing the role of a catalyst. The international loans, although big, were only part of a much wider package. The bank's job was also to assess how much debt the project could support in total and to recommend how other types of finance, both domestic and international, should be utilized to create the proper balance.

Thiel emphasizes that the deal would have been impossible without the Norwegian banks. "We think it makes every sense to work with local banks as much as possible," he says.

The first step was to take a detailed look at whether Bamble made sense financially. Brand says, "We had to review the raw material availability, the competitiveness of the project, the capacity of the operators and the marketing arrangements for the products".

TEAM EFFORT

Inevitably much of the work was highly technical and Brand had to call on other departments of the Bank for help. "We had a team effort here. It's our strategy to pull in all areas within the Bank which can give specialist knowledge to provide the borrower with the best possible package that we can put together."

Chase has built up in-house technical expertise as a result of the formation of a number of industrial groups manned by technical experts. Their job is to provide expert advice on the viability of projects which the bank might want to finance. Bamble depended for its base materials upon the output of Ekoifisk, so at an early stage Brand brought in Jim Adamson, originally a petroleum engineer who heads the European Petroleum Co-ordination Division in London.

Adamson knew a lot about Ekoifisk from the past.

"I was asked to review the source of the feedstock," he says. "My task was to talk to my oil company contacts to determine the availability of the natural gas liquids. I went to Oslo to look into the forecasts on the supply contracts and subsequently visited oil companies in London to discuss production levels and the reasonableness of the plant owners' estimates."

The ethylene cracker at Bamble. Completion is scheduled in 1977.

Air-photo: Fjellanger Widere AS

On a similar basis, Ray Careaga, a chemical engineer and technical director of Chase's chemicals division in New York, was called in to advise on the viability of the ethylene and polyolefin plants, together with the internationally recognised firm, Chem Systems International, in the case of the polyolefin plants.

STRUCTURING A PACKAGE

Meanwhile, work on the structuring of the financial package was proceeding. From the outset Brand had called in Peter Sterling, a project finance expert at Chase Manhattan Limited, Chase's London-based merchant banking arm.

Together their purpose was to devise a package which would satisfy the borrowers' need and meet Chase and market requirements. An essential part of the overall financing was to be raised domestically and here the Norwegian banks, Andenesen Bank for the first stage and Den norske Creditbank for the second, played a leading role.

"A major problem", Brand recalls, "was that we were dealing with three very different entities". To ease the marketing process it was agreed that the loans for all three partners should be arranged simultaneously, although there was no joint financial responsibility and each was borrowing individually.

COMPLICATIONS

Norsk Hydro was already a well-known and respected name among international bankers. Statoil had the full backing of the Norwegian government. Saga Petrokemi was an entirely new concern. To meet the differing nature and requirements of each borrower, a number of variations, therefore, had to be built into the structure of the separate deals, even though they were tied together under a common umbrella.

The problem was further complicated by the fact that, while all three partners had agreed to a joint international financing for part of their commitment to the ethylene plant, only Saga wanted financing specifically identified with its share of the polyolefin plants.

After almost a year of negotiations, a financing package was broadly agreed upon, embracing a substantial amount of export credit finance and long term bond issues in the Norwegian capital markets, for Norsk Hydro and Saga Petrokemi, international loans and equity participation for all three partners. It was agreed that Chase would arrange a \$120 million seven-year loan for the ethylene plant, split on a 3:2:1 basis between Norsk Hydro, Statoil and Saga to reflect ownership shares, plus a further \$33 million, also for seven years, for Saga's polyolefin plant involvement.

THE SYNDICATION

As the final touches were added to the package and discussions were started with other international banks, Chase Manhattan Limited took on an increasingly important role. Andrew Greatrex in charge of Western European syndication says, "It became pretty much a full-time commitment for two people at CML for six months. I went to Norway about six times, mostly well before the loan signing."

It took two to three months to finalise the financing structure in agreement with the three partners and to incorporate it in the form of explanatory and legal documents necessary for other banks to assess the deal and decide whether or not they might be interested. By January 1976, however, CML was ready to take the deal into the market.

For the \$33 million Saga financing, which was arranged together with Den norske Creditbank, CML went to a restricted group of banks from Europe and North America. All eight of the international banks invited agreed to participate, as did three other Norwegian banks.

The regulations formally coming into force on January 1, subject all credits involving a sum of over Sch.1m. (about \$33,000) to a federal levy ranging from 0.8 per cent. to 1.5 per cent.

What upset both lenders and borrowers was not so much the government's intention to find new revenue sources to finance a massive budget deficit, but rather the sloppy way in which the new measures had been formulated. It was only after repeated protests that export factoring and interbank credits were exempted from the levy. Foreign borrowers and public authorities are also not subject to this measure.

While some crucial points are still not completely clear, the latest version, which was finally voted by the Socialist majority in Parliament, provided for a de facto back-dating of the regulations. In order to avoid massive borrowing operations during the Parliamentary and public debates, money borrowed after November 1 is already subject to the new levy.

INTL. FINANCIAL AND COMPANY NEWS

AUSTRIAN BANKING

Conflict over new levy

BY PAUL LENGYAI

THE AUSTRIAN economy, after recovering for almost a year from the deepest recession since the war, has just been hit by a package of steeply increased taxes, levies and stamp duties in addition to an upward revision of officially regulated prices. However, none of the measures appears to have caused such a storm as the new economic weapon—a federal levy to be imposed on loans to industrial and private borrowers. Since the Treasury's first draft was presented on October 20 to the institution concerned, its main provisions have been changed so often that many Socialist Members of Parliament, after the adoption of the Bill on November 20, admitted their ignorance as to the full implications of the new law.

The regulations, formally coming into force on January 1, subject all credits involving a sum of over Sch.1m. (about \$33,000) to a federal levy ranging from 0.8 per cent. to 1.5 per cent. What upset both lenders and borrowers was not so much the government's intention to find new revenue sources to finance a massive budget deficit, but rather the sloppy way in which the new measures had been formulated. It was only after repeated protests that export factoring and interbank credits were exempted from the levy. Foreign borrowers and public authorities are also not subject to this measure.

While some crucial points are still not completely clear, the latest version, which was finally voted by the Socialist majority in Parliament, provided for a de facto back-dating of the regulations. In order to avoid massive borrowing operations during the Parliamentary and public debates, money borrowed after November 1 is already subject to the new levy.

The leaders of the main opposition people's party, Dr. Josef Taus, himself one of the country's top bankers before his entry into politics last year, was quick to point out the ominous implications of the levy. Dr. Taus calculated that the new regulations will raise the cost of a three-year loan at 9 per cent. subject to annual repayments in three equal stages to at least 8.7 per cent. and of two-year loans to

because every new contract savings contributes to the uncertainty with regard to the payment of another levy, the medium-term outlook.

Thus, the interest premium for

new measures will necessarily be reduced from 3.5 per cent. to 2

and thus more costs for the unchanged 6 per cent. interest

paid by the bank concerned,

and no withdrawal is possible

for five years (bilateral loans

years). The state premium for

building society deposits is to

be cut from 25 per cent. to 17

per cent. Last but not least

the 15 per cent. federal rebate

or the nominal price granted to

small investors (up to

Sch.100,000 worth of securities

per annum) will also be cut to

10 per cent.

The forthcoming change

absorbs the 0.8 to 1.5 per cent.

federal levy.

But as it may, the govern-

ment will also have to calculate

the adverse psychological impact

of its squeeze measures, at a

time when there is as yet no

convincing evidence of a

sustained upsurge in industrial

investment.

The credit levy is

after all, only a part of the tax

package which is one way or

another liable to hit every

Austrian. Business circles were

also protesting against the in-

crease in wealth tax from

0.5 per cent. to 1 per cent. as of

January 1977.

Vigorous expansion of com-

mercial credits (up by 18 per cent.

in October on a year-to-year

basis), continued high savings

rate (up by 19 per cent.) and a

revival of demand for fixed

interest securities combined to

a decline in the long term

interest rate from 9.43 per cent.

in January to 8.5 per cent. in

November are the main factors

which characterise the banking

scene. However, the impending

changes in the elaborate system

of federal subsidies for com-

mercial banks and credit

co-operatives.

At the same time, the new

measures will also lead to a

further sharpening of the com-

petition between the various

sectors of the banking system,

namely the commercial banks,

savings banks and credit

co-operatives.

At the same time, over

1m. premium savings bonds

on life insurance policies will mature

in November.

Austrian bankers

estimate that only one-third to

one-half of this total (equalling

for example two months of the

aggregate retail trade turnover

in Austria) will be spent, and

the rest reinvested in contrac-

tual or "normal" but anonymous

savings. It will then be

seen whether the consequences

of record budget deficits have

denied the small investor's com-

fort in the banking

and the Government's ability to

keep inflation within manageable

bounds.

The Financial Times Thursday December 16 1976

Nijverdal expecting further loss

By Michael Van Ooijen

AMSTERDAM, Dec. 15.—Nijverdal, Holland's largest textile company, revealed today it was again expecting a loss of Fls.22m. on its Fls.610m. in 1976, less than the same figure. The company also announced further drastic cutbacks by one-quarter.

Nijverdal said in a statement that Almelo where it had risen by 17 per cent. period—January to October—was compared with the same last year, it had been able to achieve the net price improvements. Hardly as far as the sale of building society deposits is concerned, the major reorganization programme depressed.

It was also stated that the financing of the enterprise had been safeguarded in difficult period by a re-application for a subloan worth Fls.25m.

Nijverdal added later that its activities were mainly in mainline sectors such as household and industrial textiles, garment restructuring programme, unprofitable

textile material affected the production of clothing material. The company said the basis of the developments in the sector—strongly rising in a market that was growing—in the coming period, the reduction of profit capacity will have to keep pace as make the company again.

Nijverdal, which already staffed by 4,300 people, as a result of reorganization added that the staff plans would continue next two years which mean another cut in some 1,200, cutting staff by a quarter.

Higher sale spur National profit hopes

By Our Own Correspondent

AMSTERDAM, Dec. 15.—Nationale Nederlanden's biggest company, is expected to increase its per share earnings by the right amount to "equal" it to 15.00 level.

Starting this project executive Board meeting, the company also that it was looking for over rise of about 4% compared with the cent increase achieved. It was pointed out that without exceptions, new acquisitions, premium life policies considerations and rate fluctuations, the rise this year could be to 18 per cent.

Nationale, which to recent estimates some 25 per cent. of life market and around the domestic non-life noted in day's state the "serious deterioration non-life results reported had not yet been felled an upward turn. This case particularly on market.

foreign and international bonds

were smaller at around \$6bn. compared with \$6.6bn. in the previous quarter, the bulletin says.

The growth of the London market—as measured by the banks' gross foreign currency liabilities—slowed considerably in the third quarter to \$1.6bn. as against \$3.4bn. in the previous quarter. Furthermore

BOOKS

Fertile land

BY GEOFFREY MOORE

The New Oxford Book of American Verse edited by Richard Ellmann. Oxford University, £7.50. 1,132 pages.

The first Oxford Book of American Verse edited by Bliss Carman appeared in 1927. It is no disparagement because all the names we have since seen in an eighteenth century broadside on John Paul Jones and a couple of poems by Lip Freneau, the first strictly United States poet. There it was a paradise of dainty lyrics, a garland of poetry by our poets redeemed by some of the names we have since come to expect: Bryant, Emerson, Whittier, Poe, Thoreau, Whitman, Dickinson, Robinson, Lindsay, Masters, Sandburg.

In 1950 the late Professor F. Matthiessen of Harvard argued that "in the second Oxford Book he greatly reduced the number of contributions with only a few personal aberrations—the greater the minor, the greater the select few in some time, and bringing the whole up to date. Thus, in the twentieth century there was a loss of Eliot, Pound, Wallace Stevens and Williams, and the Woodward Reeses and the like. Imagined Guineys of man's pathology were probably relegated. In the New Oxford Book of American Verse, Professor Richard Ellmann has included in the Matthiessen edition, adding representative samples of the poets who have come to seem important since the late forties.

He problem, always, in representing the true nature of American poetry for the general reader is where to start. It does really begin with that period when Matthiessen himself called "the American Renaissance". Yet if the anthologist left the poets who wrote before him omits a considerable amount of American history, admittedly, there were few in time of whom one could say, "I stand on heart, that they are intrinsic literary value. Nevertheless, they have their place in the development of American poetry and only by knowing them can the reader understand the unique contribution of peculiarly American poets Emerson and Emily Dickinson, to represent the 180 years between the founding of the mouth Colony and the end of 18th century Matthiessen's Puritan poets Anne Bradstreet and Edward Taylor.

* Geoffrey Moore is Professor of American Literature at the University of Hull.

Raphael Soyer's 'Dancing Lesson' (1926) from the book reviewed below

Into the melting pot

BY C. P. SNOW

The Immigrant Jews of New York: 1881 to the Present by Irving Howe, with the assistance of Kenneth Libet. The Litman Library of Jewish Civilization. Routledge and Kegan Paul, £20.00, 714 pages.

Between 1880 and the First World War well over 1 million Jewish immigrants fled from the Tsarist pogroms in Eastern Europe and settled in abject poverty in New York. Within two generations their descendants became one of the most successful and valuable elements in American society. This book is a masterly study of the process, intellectually detached, emotionally involved—Mr. Irving Howe, who has done notable work in literature and political science, is himself a fine representative of those descendants.

The book will not need recommending to anyone with Jewish connections. More significant though, it ought to be compulsory reading for anyone wishing to understand modern America. Further, it ought to teach some important lessons to us Gentiles who would have collapsed under the hardships and more than hardships of the first wave of immigration. And any reader with the slightest sensitivity will detect the reluctant irony in Mr. Howe's account: for this is a story of a triumph which contained, right from the beginning, the seeds of a defeat.

These immigrants came mostly from the Russian pale and Poland, were Yiddish speaking, and carried their own Yiddish culture with them. To start with, they worked as peddlars and in the sweat shops of the garment class. Can anyone imagine

the first part of that exhortation here?

The price of those conquests was predictable. In going outwards into America the Yiddish culture couldn't help but destroy itself. The art is half forgotten. The Jewish identity is being clung to, but many of its plinths have been sown away. Mr. Howe views the chances with the inextinguishable hope that has always been necessary for Jewish survival, but also with a tinge of resigned sadness. If I were in his place, I should feel exactly the same.

There is a singular omission in this fine book. Howe is an eminently fair, for he is an accomplished critic in several fields about the American-Jewish creative successes. He doesn't so much as mention the greatest.

The "Jewish explosion" as it has been called, began about 100 years ago. By world standards it has had its most dazzling effect in science and this most of all in science. Mr. Howe might even eye down the names of American Nobel prize winners.

At least 30 per cent, probably many more, are Jewish. A high proportion came from previous

immigration. And he is writing about. He has missed so many spectacular stories. One example:

I. J. Rabi was an immigrant from Romania just before 1900, made better. In Forward, at the age of two. He was brought up in the strictest Hasidic environment. He discovered the charms of science at 13, discarded Hasidism, became a world citizen and one of the best physicists alive. He won a Nobel prize in his early 40s. When he is around the rest of us sound like peasants.

What is a Parliament?

BY KENNETH BRADSHAW

Parliaments of the World: A Reference Compendium prepared by Valentine Herman and Françoise Mendel. Macmillan, £30. 985 pages.

The pricing of works of reference has been largely paid off as regrettably frequent. Collectors of parliamentary reference books who have lately paid out £25 or more for the latest edition of Erskine May will be seeking assurance that this new compendium, offered at £5 more, is good value for money.

Parliaments of the World is a survey of 56 Parliaments. They are nearly all member-Parliaments of the Inter-Parliamentary Union (the sponsor of this work) which may be described broadly as an organisation akin to the UN, but composed of back-bench MPs rather than Foreign Ministers.

The criteria laid down for the inclusion of a Parliament in this book—as for membership of the Union itself—are catholic: the Parliaments studied extend from the People's assemblies of Eastern Europe at one end of the scale to the Spanish Cortes (under Franco's regime) at the other. Indeed, the Union's aim was to include every Parliament in the world. In the event only Fiji, Malta, South Africa, the two Vietnams and Zambia, among non-members of the Union, contributed to the study. But the 56 countries who did take part are drawn from every continent and of course include those of Western Europe and North America, whose Parliaments largely furnished the Union's membership for the first 50 of its 90 or so years of existence.

The variety of institutions and systems in the world that to-day pass under the comprehensive description "Parliaments" was first studied by the Union in 1961, perhaps by way of illustrating its own variety of membership. In 1966 the study was brought up to date and entirely

Jules Verne by Jean Jules-Verne. Macdonald and Jane's, £6.50, 245 pages

In his novel, *From Earth to the Moon*, Verne envisaged a spacecraft the same weight and height as was to be used 100 years later in the Apollo 9 moonshot "launching" it from the same place—Florida. The U.S. astronaut Frank Borman actually landed in the Pacific about two miles from the point Verne chose for his hero's splashdown. Despite these leaps into the modern age, Verne remains

Birds, bees and butterflies

BY ROBIN LANE FOX

The drought ruined the grass; a man-made lake in Bavaria; the beetles killed the elms; the Arctic Tern uses the winds for the third volume of the new W. J. Bean, Trees and Shrubs Hardy in the British Isles (John Murray, £18.25). It remains a classic, in the class by itself. Among the glossies, the Italian Fruits of the Earth (Cassell, £8.50, 302 pages) contrives to make modern photographs look as handsome as possible. The coloured pictures are superb, and the text is sober and full of detail. The artists deserve a cheer.

On a lesser scale, D. M. Turner Eddinger's British and Irish Orchids (Macmillan, £4.95, 180 pages) eschews colour plates, but gives you a good chance of identifying any of the many varieties, accurately described, mercifully. They are not too precisely located in the field. Roy Green's Asiatic Primulas (Alpine Garden Society, £3.30, 163 pages) is a model guide for botanists and gardeners: publishers could learn much from its standards of accuracy, printing, price and general expertise.

Birds, however, are even more remarkable than birds. Daphne More is a bee-keeper, and although her Bee Book (David and Charles, £4.50, 142 pages) is only concerned with the latest moralising ("I know several bachelors of science and doctors of philosophy who have been out of work for months") among the memories of the author's bees and tales of his tape-recorded weasels.

Birds have been flocking out lately. The Birdlife of Britain (Mitchell Beazley, softcover, £3.95, 272 pages).

Experts have arranged a group of illustrations round each region of the world, giving a clear picture with which to identify anything from an Arctic Loon to a lovely Victoria Crowned Pigeon. Brief comments sing out the habits of birds and bees, family by family.

Bees, however, are even more remarkable than birds. Daphne More is a bee-keeper, and

as for plants, we can look to the beetles killed the elms; the Arctic Tern uses the winds for the third volume of the new W. J. Bean, Trees and Shrubs Hardy in the British Isles (John Murray, £18.25). It remains a classic, in the class by itself. Among the glossies, the Italian Fruits of the Earth (Cassell, £8.50, 302 pages) contrives to make modern photographs look as handsome as possible. The coloured pictures are superb, and the text is sober and full of detail. The artists deserve a cheer.

On a lesser scale, D. M. Turner Eddinger's British and Irish Orchids (Macmillan, £4.95, 180 pages) eschews colour plates, but gives you a good chance of identifying any of the many varieties, accurately described, mercifully. They are not too precisely located in the field. Roy Green's Asiatic Primulas (Alpine Garden Society, £3.30, 163 pages) is a model guide for botanists and gardeners: publishers could learn much from its standards of accuracy, printing, price and general expertise.

Polunin and Everard's Trees and Bushes of Europe (Oxford, £5.25, 206 pages) keeps up to their usual mark. The photos are mostly of leaves in close-up, so the habit of a tree may still puzzle you. But the descriptions should bring Europe's taller wild flora within your grasp.

If you stay at home, put up the barricades with John Seymour's pleasant Complete Book of Self-Sufficiency (Faber, £5.50, 286 pages). It is a comprehensive, but seductive dream: two pages on how to tend a field, sketches are reproduced, though they confuse me and do not tell much of importance. There is a text of personal reminiscences and some useful observations on mating, egg-laying and territory, the evolution of flight; Sir Peter Scott, the consulting editor, says

that you could have a run for your money on an acre, and his gardening makes sense. But it founders on the cow. You need her, but she needs foods from outside. The "alternative strategy" is not a stumper, but what man does not like to think he is an island?

Sailors beware

BY ALEC BEILBY

With only the London International Boat Show in the New Year to brighten the yachtsman's winter gloom, it is good to see some attractive new books appearing specifically for those who enjoy the sea. Leader in the field is The Oxford Companion to Ships and the Sea, edited by Peter Kemp (Oxford University Press, £12, 971 pages). This is a totally absorbing work covering almost every possible subject to do with maritime matters beginning with the definition of the humble Able Seaman and finishing with a Zulu, and anyone who thinks that a Zulu is a black gentleman from the southern regions of Africa surely needs this book.

This is a masterly study of the process, intellectually detached, emotionally involved—Mr. Irving Howe, who has done notable work in literature and political science, is himself a fine representative of those descendants.

Something of a collision, or perhaps a confusion, has occurred with the publication, at about the same time, of Tall Ships, by Philip McCutchan (Wesleyan and Nicholson, £4.95, 160 pages) and Tall Ships, by Malcolm Drummond and Mike Willoughby (Angus and Robertson, £13.50 until December 31 and then £15, 160 pages). The difference, in fact, is reflected in the prices. The former book is a general history of the old square-rigged ships from the early 18th century to the present day: the latter, while touching on history,

is a study of the sail training bamboo spars and the deprivations of the voyage and to conditions between the crews that have not been quietly forgotten. Unfortunately, the translation of Lord Ambrose Greenway, one of the original German's most imaginative photographers of ships and the sea, is real. This is a pity, but in spite of the problem, it is an incredible story of courage, stamina and survival.

The Channel Islands have held a certain navigational mystique for yachtsmen for many years. Terrifying tide races, equally alarming rises and falls of tide and rocks that have claimed many a ship are all part of this, but Malcolm Robson has done much to take some of the sting out of the place. He went to Sark in 1947 to establish the electricity system and never left. To-day he is the only non-Sarkois with a Sark pilot's licence, is a quarantining member of the Chief Pleas of Sark and holds the title of "Sieur".

Having skippered an inter-island vessel for fifteen years he has put all his knowledge down

in Channel Islands Pilot (Nautical Publishing Company, £7.50, 173 pages). This is a delightful book that, apart from unfolding the mysteries of pilotage in the area, is full of wry comment and anecdotes about places discussed that will certainly appeal to the yachtsman's sense of humour.

Though it is primarily a technical work, having read it one feels that one has successfully completed a Channel Island cruise in delightful company.

Crimes in short

BY WILLIAM WEAVER

A Distant Banner by Roy Lewis. Collins, £2.95, 198 pages

Roy Lewis in Wales again. The setting is a work site, with an idealistic, if muddled graduate of the bumbling, sympathetic protagonist. His mates on the tireless job are a strange, but thoroughly credible lot, and the author draws each of them with a story of character than a thriller or a mystery. There is, indeed, a murder, and in the end his murderer is revealed; but mostly this is a novel of people and places, written with affection and taste.

A Gallowsbird's Song by Torben Nielsen. Collins, £2.95, 204 pages

Sub-Magistrate. A former police officer, Torben Nielsen believes that most crime writers make things too pat, too easy for themselves or their fictional detectives. So he writes a more "real" story by showing his Superintendant Anchor following legal leads, making mistakes, etc. All well and good, but the Lake District setting is unreal—and indeed murder are unreal—and incredible far beyond anything invented by those clever English ladies Nielsen criticises.

Someone is Killing the Great Chefs of Europe by Nan and Ivan Lyons. Jonathan Cape, £3.50, 243 pages

FARMING AND RAW MATERIALS

EEC wheat price plan attacked

By Our Commodities Staff

THE NEW system for supporting a price of so-called bread-making wheat to be introduced by the EEC for the 1976-77 season will push up the prices of both seed and feed grains and the cost of living. Mr. C. J. Tilley, president of the Grain and Feed Association, claimed yesterday.

Mr. Tilley said that the Commission had decided bread-making varieties of wheat required special measures of support despite the fact that they were produced far in excess of the Community's capacity to use the bread that could be made from them.

The result would be to put up the price of North American wheat used in the manufacture of British bread when for the time in two years world wheat prices had fallen steadily.

EEC proposals for levies on

imported marine and vegetable oils were also attacked by Mr.

Low demand hits timber production

By Our Commodities Staff

A LOW level of demand for softwood in the 12-months to end of March, the Forestry Commission said in its annual report yesterday.

As a result of the generally low-level conditions was that in year as a whole, forest production was 50,000 cubic metres (tonnes) or about 3 per cent lower than in each of the two years.

It was also 300,000 cubic litres or some 16 per cent, on the level required to meet the commission's longer term objectives of expanding output. The net income from the 1m. cubic metres of timber oved was just over £9m.

Japan's ferro nickel imports

TOKYO, Dec. 15. — JAPANESE SMELTERS hope to include a contract with Indonesia's Aneka Tambang by the end of this year on Japan's 1977 ports of ferro nickel from the smelter in Sulawesi, said, reports Reuter.

The talks, which started last month, concentrated on the amount of ferro nickel Japan is buy in 1977, but they faced going as the Indonesian er is much more than Japan's, they said.

Drop in U.K. beef output 'considerable' next year

By PETER BULLEN

THERE WILL be considerably less beef available in Britain next year, the Meat and Livestock Commission said in its quarterly market survey today.

Compared with this year, the amount of beef will be down, the quantity of lamb will be the same but there will be more pork available.

However, the MLC does hold some hope for the future, pointing to signs of expansion in the cattle and sheep breeding numbers which should lead to increased production but not before 1978 because of the lengthy breeding cycle involved.

With fewer home-bred cattle on British farms, output of beef in the past quarter has been down 16 per cent on last year's level and for the whole of 1976 is forecast to be 1,046,000 tons—180,000 tons less than the record amount produced in 1975.

Strangely in the year which has seen the worst drought for centuries, the average weights of beef animals have risen about 2 per cent, which will provide more supplies from abroad are unlikely to offset the reduction in home produced beef.

With a drop in supplies and higher price levels coinciding with restrictions on incomes, consumer expenditure on meat is likely to decline slightly as a

expansion in terms of extra beef produced will not become apparent until 1979 at the earliest.

Extra beef may be imported next year if the EEC carries out its plan to ease its import restrictions, but increased supplies from abroad are unlikely to offset the reduction in home produced beef.

After two years of decline the U.K. sheep flock shows definite signs of expansion. Lambing rates next spring will probably be lower than this year's record level.

On the assumption that there is reasonable weather, a further increase in ewe lamb retentions for breeding and a similar carry-over of lambs next winter as in 1976-77, mutton and lamb production in 1977 is likely to be about the same as in 1976, and some 6 per cent down on 1975.

On the assumption that there is reasonable weather, a further increase in ewe lamb retentions for breeding and a similar carry-over of lambs next winter as in 1976-77, mutton and lamb production in 1977 is likely to be about the same as in 1976, and some 6 per cent down on 1975.

After two years of decline the U.K. sheep flock shows definite signs of expansion. Lambing rates next spring will probably be lower than this year's record level.

On the assumption that there is reasonable weather, a further increase in ewe lamb retentions for breeding and a similar carry-over of lambs next winter as in 1976-77, mutton and lamb production in 1977 is likely to be about the same as in 1976, and some 6 per cent down on 1975.

STOCK EXCHANGE REPORT

Sharp late falls in leaders following mini-budget Share index down 10.5 at 313.8 for two-day fall of 19.9

Account Dealing Dates of 4,925 compared with 5,770 on Option Tuesday and 4,871 a week ago.

*First Declar- Last Account Dealings tions Dealings Dec. 9 Dec. 10 Dec. 21 Nov. 29 Dec. 30 Dec. 31 Jan. 4 Jan. 13 Jan. 14 Jan. 25

** New time dealings may take place from 9.30 a.m. two business days earlier.

The immediate reaction of equity markets in the eagerly awaited mini-budget was one of marked disappointment. After losing a little ground on scattered nervous selling during official dealings leading equities were marked down sharply in the late trading when a fair amount of stock came on offer. The scale of the reaction was well illustrated by the FT-30 share index which extended a modest fall of 24 at 3 p.m. to one of 10.5 at 313.8 at the close.

Dealmings in British Funds cessed at 2.30 p.m. but prices were expected to open lower today, reflecting the sharp reaction in sterling on foreign exchange markets in response to the Chancellor's proposals. Fractional gains at the close of official business were reflected in an improvement of 0.63 to 35.92 in the Government Securities index.

Gilts harder at 3.30 pm

The 10 per cent increase in the duty on tobacco and alcoholic drinks was less harsh than expected and, although dull, the Tobacco and Brewery sectors held up reasonably well. Overall, the trend was to lower levels but secondary issues were given a sideways boost by the late activity in the leaders and significant changes in the former were few and far between. Falls led rises by nearly 2.1 in FT-counted Industrials, while the FT-Actuaries All-share index gave up 1.1 per cent to 138.64. Official markings

of 4,925 compared with 5,770 on Tuesday and 4,871 a week ago.

In a continuation of the previous evening's late recovery movement, British Funds were considered to have behaved well in the face of a November trade deficit which was the third largest ever. Business was well represented by gains extending to 3 p.m. against the short-term medium and longer-dated issues were often 1 harder in the run-up to the 3.30 p.m. close when business ceased for the day. Initial reaction to Mr. Healey's measures was one of disappointment, partly because of the lack of monetary targets, and quotations at the longer end of the market may open as much as 1 lower to day, but such depends on the course of sterling.

Institutional, two-way business provided the bulk of an increased volume in the investment currency market. For most of the day, rates were on a declining trend but his late business in sterling prompted a marked recovery in the premium to 116.1 per cent, up 3 on balance, after a low point of 112 per cent. Yesterday's SE conversion factor was 0.7224 (0.7177).

Most of the action in the banking sector took place in inter-office dealings as prices wilted quite sharply on disappointment with the Budget. Discounts came in for a sharp mark-down and double-figure falls were seen in Allen, Harry & Ross, 25p, Carter, Ryder, 25p, and Somerby, Marshall and Campion, 210p, recorded falls of between 20 and 50p, while Union lost 16 to 27p and Alexander 13 to 17p. Among smaller-priced issues, Smith St Aubyn fell 9 to 47p and Clive receded 4 to 30p. The big at 111p, H. P. Bulmer despite four Banks, idle for most of the day, also turned down late and finished with losses to 11, as in National Westminster, at 192p.

Against the dull trend in In-

surance, Leslie and Godwin interim figures, Phoenix closed a stand off with a speculative gain like amount off at 30p, while 5 to 107p, Sun Alliance, however, Magnet and Southern declined 3 shed 7 to 32p and "Royals" lost to 100p. Elsewhere, A. V. Cement receded 4 to 100p and A.P. Cement 6 to 125p. O. C. Software was notable for a reaction of 3 to 20p following news of the Boardroom dispute.

Taking the view that the Budget's duty increase might

moderate the gains extending to 3 p.m. against the short-term medium and longer-dated issues were often 1 harder in the run-up to the 3.30 p.m. close when business ceased for the day. Initial reaction to Mr. Healey's measures was one of disappointment, partly because of the lack of monetary targets, and quotations at the longer end of the market may open as much as 1 lower to day, but such depends on the course of sterling.

Bulmer despite four Banks, idle for most of the day, also turned down late and finished with losses to 11, as in National Westminster, at 192p.

Against the dull trend in In-

house of Fraser, 63p. Formaster eased 2 to 32p, James Walker Non-Voting 3 to 25p. Against the trend, K. O. Boardman International closed fractionally higher at 3p following further consideration of the interim report. Mall Orders had an easier tendency, Empire Stores easing a penny to 69p and Freemans (London) receding 2 to 115p.

Having fluctuated narrowly around the overnight level of 300p, ICI reacted sharply in the late trade to close 10 higher at the day's lowest of 285p. Elsewhere, British Benzol Carbonising finished a penny higher at 24p on the first-half profits increase. Plytex, with interim figures to-day, eased 2 to 40p, while losses of 3 were seen in Albright and Wilson, 76p, and Yorkshire, 31p.

EMI dull

Electricals turned reactionary in the late trade and closed at the day's worst, EMI featured with a decline of 9 to 285p and General Electric were finally off at 157p. Losses of 4 were sustained by Electrohome, 210p, and United Scientific ended 3 off at 125p despite the disclosure of sharply increased earnings, while Pye Holdings, a firm market recently on the planned reorganisation, lost a like amount to 35p. Farnell Electronics contracted with a rise of 4 to 71p, while another smaller-priced issues, trac-tor and trailer-priced issues, traction and improvements were seen in Dublair, 10p, and Automated Security, 12p.

Stores came on offer late and closed with some fairly substantial losses. Gieves & Hawkes dropped 5 to 157p for a two-day fall of 11, while Marks and Spencer, 55p, and British Home Stores, 127p, both closed 4 down.

Burton "A" shed a penny to 26p in front of to-day's preliminary figures, while the other 4 in the group, Burton "B", 24p, and Weston-Evans 2 to 41p on the respective first-half results. TCKC, however, fell 3 to a low for the year of 125p following the disappearance mid-way of its £1.2m. profit forecast. Duxford and Elliott, 14p, closed 4 down.

Miners' vote favours industrial action

BY ALAN PIKE, LABOUR STAFF

THE NATIONAL Union of Mineworkers' early retirement in earnest. The campaign now moves into its next and most crucial stage declared. Mr. Lawrence Daly, NUM general secretary, said he believed the union's aims could be met within the social contract, although not until after the present phase of incomes policy expires in July.

Discussions shortly to take place within the trade union movement would aim at achieving a much more flexible phase three, and this gave him no doubt that it would be possible to reach agreement with the TUC and Government on an improved offer.

A total of 78 per cent. of the 204,124 miners taking part in the ballot followed an executive recommendation to reject the Coal Board's offer of an early retirement and postpone industrial action if necessary. Voting was 155,765 (78 per cent.) for the executive recommendation and 45,559 (22 per cent.) against in a 77.5 per cent. poll.

The next move will be more talks between the union and the Coal Board. There is bound to be an informal exchange of views when the two sides meet on other issues tomorrow, but the union executive is not due to consider the ballot result until Tuesday.

With Christmas intervening this means it may be January—the date by which the union is demanding a reduction in the retirement age from 65 to 60—year, with staged reductions to

More talks

He said that in addition to further negotiations with the Coal Board there would inevitably be talks with the TUC and Government. Only in the light of the outcome of all these discussions would the question of any industrial action arise.

At present, there is a wide gap between the union's demand for a retirement at 60 from next year, with staged reductions to

55 by 1980, and the Coal Board's more limited proposals. The scheme leading to voluntary retirement at 62 for underground workers with at least 25 years service, but this is certain to be improved on negotiation.

The obvious reason for improvement is in the 25-year qualifying period, but the Board will be anxious to ensure that any scheme eventually agreed reflects the special claim of underground workers to early retirement, and that it does not further hamper the industry's productivity difficulties by creating impossible manpower shortages.

The Board will continue to make it clear that the industry cannot finance early retirement itself, leaving the Government to meet the cost.

All the major coalfields exceeded the overall 78 per cent. vote in favour of the executive in yesterday's ballot. The highest votes in favour—92 per cent.—were in South Wales and Scotland, followed by 88 per cent. in Yorkshire, and 88 per cent. in Kent.

Mr. Arthur Scargill, the Left-wing Yorkshire area president, reacted to the result by repeating that only a "meaningful response" from the Coal Board—which included both underground and surface workers—would be acceptable.

Next pay policy stage 'should last two years'

BY MICHAEL BLANDEN

THE GOVERNMENT should consider making the next stage of the wages policy, due to begin in July, run for two years, the latest issue of the Bank of England Bulletin, said today.

In its assessment of the economic situation, the Bank suggests that the Government will face major problems in making the fall in living standards required in the next year or two acceptable.

The Bank says whether all the necessary wage adjustments can be made in one year

depends on the pace of inflation.

The assessment prepared on December 8 while discussions to

finalise yesterday's economic package were still going on in the Cabinet provides the general background for the latest round of measures.

The hope had been, first of all, that the Chancellor would

signal a decisive shift away

from the public sector and towards industry.

Instead, he has produced another list of half-hearted measures which only

marginally affect the fundamental imbalances in the economy.

And the second main hope

is that the IMF would insist upon

ruthless and clearly defined annual rate of inflation in

monetary targets — is also the disastrous July-September largely unfulfilled.

The Government has evidently managed to reduce only to £7.7bn next

year and £6.6bn, or so in 1978-79.

Prospects for the balance of payments, the Bank says, now appear more favourable, in spite

of the deterioration in recent months. The Bulletin underlines the effects of the sharp fall in sterling and the difficulties

which the authorities have faced with diminishing reserves in

sustaining support operations.

In recent months, the Bank

says, intervention has been

smaller than earlier in the year

and the need to conserve official reserves became an increasingly important constraint on the amount of official intervention.

But, there is a prospect of the external payments moving into current balance by the end of next year, provided there is a moderately rapid rate of growth in world trade. This depends, however, on countries such as the U.S. and Germany adopting more expansionary policies.

Even without any general wage rises, adjustments including
